

## Career Talk by Mr. Jeremy Choy – “Pathway to Success in Investment Banking Industry – Opportunities and Challenges”

On 14 October 2011 evening 6:45 p.m., Department of Applied Mathematics had invited Mr. Jeremy Choy, Vice President, Merger and Acquisition Group of a renowned Global Investment Bank, to deliver a career talk to our AMA students.

Jeremy had extensive experience in M&A advisory and financing transactions that not only he introduced the line of business of an investment bank, but also shared with our students his valuable experience by offering vivid examples. Students were very active in asking questions and Jeremy kindly gave a lot of practical tips and advice so that students could know more about the expectation of their prospective employers.

During the talk, students wondered how Jeremy coped with the stress. Jeremy told that “pursuing a career you love boosted your energy and kept you focused and caused you to perform at your best!” He also encouraged students to “think out of the box” as it helped create new ideas, new products, new processes and new services as what Steve Jobs did.

The overall feedback was very good and around 100 students attended the talk. Both the speaker and students had an enjoyable time.
