**Programme Title: Research Postgraduate Programme in Applied Mathematics** 

Hosted by: Department of Applied Mathematics (AMA)

Award: MPhil. / PhD.

Normal study period:

2 years for full-time MPhil., 4 years for part-time MPhil.
3 years for full-time 3-year PhD., 6 years for part-time PhD.
4 years for full-time 4-year PhD. (for admission with Bachelor Degree or Master Degree without any research components)

Note: This Programme Document is subject to review and changes which AMA can decide to make from time to time. Students will be informed of the changes as and when appropriate.

### Coursework/credit requirement

It was agreed that the credit requirements should also cover requirement on attending seminars and departmental training.

Credit requirement of different categories of students would then be:

| 2-year MPhil: | 9 credits   |
|---------------|---|
|               | (1 credit from HTI6081 + 2 credits from attending seminars  |
|               | (AMA67711+AMA67712) +AMA613+ 3 credits from other subjects) |
| 3-year PhD:   | 15 credits  |
| -             | (1 credit from HTI6081 + 3 credits from attending seminars  |
|               | (AMA67711+AMA67712+AMA67713)+                               |
|               | 2 credits from departmental training (AMA67721+AMA67722) +  |
|               | AMA613+ 6 credits from other subjects)                      |
| 4-year PhD:   | 22 credits  |
| -             | (1 credit from HTI6081 + 4 credits from attending seminars  |
|               | (AMA67711+AMA67712+AMA67713+AMA67714) +                     |
|               | 2 credits from departmental training (AMA67721+AMA67722) +  |
|               | AMA613+12 credits from other subjects)                      |

Other subjects can be chosen from the subject list offered by AMA, other departments or other local Universities with a similar level.

List of the subjects offered by the department are varied from year to year.

All MPhil students need to complete their coursework with a qualifying GPA of 2.75 or above, and all PhD students need to complete their coursework with a qualifying GPA of 3.0 or above before submission of their thesis for examination.

## Attendance in research seminars/workshops/conferences

Full-time students are required to attend at least 10 research seminars per year (of which at least 8 research seminars must be within AMA), in addition to workshops/conferences, and to submit a report, to the Chief Supervisor, of no less than 1,500 words (excluding references) on one of the attended seminars every year.

Part-time students are required to attend at least 10 research seminars per two years (of which at least 8 research seminars must be within AMA), in addition to workshops/conferences, and to submit a report, to the Chief Supervisor, of no less than 1,500 words (excluding references) on one of the attended seminars once every two years.

Chief Supervisors are required to assess the report (with a pass or failure grade). Students who failed to submit a report to the satisfaction of their Chief Supervisor are required to make a re-submission until a pass grade is obtained. The Chief Supervisor has to pass the record of the seminars attended by their students and the report with a pass grade to the Research Office for custody at the end of each academic year.

## Departmental Training

As part of the programme requirement, PhD students, irrespective of funding source and mode of study, must complete two training credits before graduation. To earn one credit, students will be required to engage in teaching/research supporting activities assigned by the HoD or his/her delegate for 6 hours/week in any 13-week semester.

Students are allowed to complete these two credits any time before they graduate. They can choose to complete these two credits in two different semesters or within the same semester, subject to the approval of the Chief Supervisor. Stipend recipients are allowed to fulfill part of their departmental training requirement through the completion of these compulsory training credits.

The HoD or his/her delegate is required to:

a. ensure that the activities are structured and can be assessed properly;

b. submit, at the end of the training session, an assessment report on the performance of the relevant student(s), with details of activities undertaken and an overall assessment grade of Pass or Fail.

In addition to the 2 credits requirement, the department would also assign students to mark assignments and invigilate mid-term tests and examinations in every semester. Students are also expected to help in conferences organized by the department.

### Language proficiency requirement after admission

Students should be required to take and pass the recommended remedial subjects before the submission of thesis.

### Thesis requirement

A thesis must be submitted to the satisfaction of the supervisor(s) for reviews by external examiners. The submitted thesis must contain at least one accepted/published paper in an SCI journal for PhD. students.

# Curriculum

| Key:  | C = Compulsory | CA = Continuous Assessment | E =Elective | EXAM= |
|-------|----------------|----------------------------|-------------|-------|

The Hong Kong Polytechnic University

**Department of Applied Mathematics (AMA)** 

#### **Outcome-based Rpg Programme of Applied Mathematics**

#### **Programme Aims**

The aim of the programme is to enable the students to acquire competence in research methods and scholarship in Applied Mathematics, and to display sustained independent effort and independent original thought. This programme prepares students to become academics, researchers or industrial R & D professionals upon graduation.

#### Programme Outcomes

- 1. To enhance students' research knowledge in Applied Mathematics
- 2. To enhance students' scientific writing and presentation skills
- 3. To nourish students' up-to-date research development in applied mathematics
- 4. To recognize the importance of research ethics
- 5. To learn the skill in writing research articles (for PhD programme)
