Mathematical Programming - Read Top Cited Articles for Free

Visit us at springer.com

Dear Researcher,

Mathematical Programming publishes original articles dealing with every aspect of mathematical programming: everything of direct or indirect use concerning the problem of optimizing a function of many variables, often subject to a set of constraints. This involves theoretical and computational issues as well as application studies.

The journal consists of two series:

- | **Series A** presents original expositions and surveys, and reports on computational experimentation and new or innovative practical applications
- | **Series B** focuses on a single subject, selected to respond to the current interests of the mathematical programming community

Mathematical
Optimization Society

Official Journal of the
Mathematical Optimization
Society

Read Top Cited Articles For Free!

Read a selection of the top quality articles that contribute to the continued success of **Mathematical Programming**. Enjoy free access to the most cited articles published in 2009 and 2010. This offer is valid until September 30, 2011! !

- | **On certain conditions for the existence of solutions of equilibrium problems**
Alfredo N. Iusem, Gábor Kassay and Wilfredo Sosa
- | **A coordinate gradient descent method for nonsmooth separable minimization**
Paul Tseng and Sangwoon Yun
- | **Robust solution of monotone stochastic linear complementarity problems**
Xiaojun Chen, Chao Zhang and Masao Fukushima

2010 IF 1.97

Benefits of Publishing in Mathematical Programming

- | **Rapid online publication:** Articles are published **Online First** within a couple of weeks after acceptance.
- | **Maximum exposure: High Visibility, Global Reach!** Online publication through **Springerlink** ensures that your article has the highest and broadest visibility.
- | **Fast and user-friendly online submission** with the state-of-the-art submission and peer-review system **Editorial Manager**.
