1. **General Information**

Summary of Programme Details:

Name of University: The Hong Kong Polytechnic University

Faculty: Construction and Environment (FCE)

Department: Building and Real Estate (BRE)

Programme: BSc (Hons) in Building Engineering and Management

(BEM)

Mode of Attendance: Full-time

Mode of Operation: Credit-Based Programme

Mode of Finance: UGC Funded

Duration: Normally two years

Total Credits Requirements: 69 credits (plus 2 training credits)

Commencing: September 2021

Level of Award: BSc (Hons) in Building Engineering and Management

Contributing Departments / Centres

Host Department: Building and Real Estate (BRE)

Contributing Departments and Centre:

- Department of Applied Mathematics (AMA)
- English Language Centre (ELC)
- Chinese Language Centre (CLC)

Programme Planning Committee

Head of the Department Associate Head (Teaching) Undergraduate Scheme Chair BEM Award Co-ordinator BEM Deputy Award Co-ordinator

2. Programme Aims, Objectives and Outcomes

Programme Aims

The BEM programme aims to produce graduates who can develop into highly competent and professional building engineers for Hong Kong, China and the international market. It aims to equip students with the knowledge and ability in the production of buildings and facilities so that they will be able to contribute effectively to project and facilities management teams engaged in complex building projects.

Programme Outcomes

Programme outcomes refer to the intellectual abilities, knowledge, skills and attributes that an all-rounded preferred graduate from BEM programme should possess.

To ensure fulfilment of the goal of developing all-round students with professional competence, it is required that outcome statements encompass the following two categories of learning outcomes:

Professional/Academic Knowledge and Competence

Upon successful completion of the programme, the graduate is expected to have acquired the ability:-

- (i) To possess knowledge of building engineering principles, processes and methods for the successful completion of all types of construction projects.
- (ii) To use the techniques, skills and engineering principles for different types of construction.
- (iii) To apply construction management knowledge and skills in personnel, financial and operational practices and communication aspects required for efficient building production.
- (iv) To identify, structure and analyse diverse problems arising from the changing social, economic, environmental and technological pressures.
- (v) To solve identified construction problems with appropriate solutions.
- (vi) To evaluate alternative strategic options.
- (vii) To select appropriate construction materials, practices and methods in compliance with sustainable development.
- (viii) To exercise professional judgement in the consideration of alternatives in complex situations.

Attributes for All-roundedness

As all undergraduate programmes are under the BRE Degree scheme, the attributes for all-roundedness listed are the same under the scheme.

Upon successful completion of the programme, the students are expected to possess the following attributes for all-roundedness:-

- (i) To possess skills to identify, analyse and solve problems.
- (ii) To have an understanding of professional, social and ethical responsibilities.
- (iii) To communicate effectively.
- (iv) To reflect on knowledge gap for life time learning.
- (v) To contribute as team member and to lead effectively.
- (vi) To identify contemporary issues.

Note: PolyU aspires to develop all its students as all-round graduates with professional competence, and has identified a set of highly valued graduate attributes can be developed through the curricular activities of this programme, some (including the all-rounded attributes of 'to reflect on knowledge gap for life time learning' and 'to identify contemporary issues' contained therein in the curriculum mappings of the Majors in BSc (Hons) in Building Engineering & Management) are primarily addressed through co-curricular activities offered by faculties, departments, and various teaching and learning support units of the University. Students are encouraged to make full use of such opportunities to develop these attributes.

Graduate attributes and institutional learning outcomes for undergraduate degree programmes

Competent professional:

Graduates should be able to integrate and to apply in-depth discipline knowledge and specialised skills that are fundamental to functioning effectively as an entry-level professional (professional competence); understand the global trends and opportunities related to their professions (global outlook); and demonstrate entrepreneurial spirit and skills in their work, including the discovery and use of opportunities, and experimentation with novel ideas (entrepreneurship).

Critical thinker:

Graduates should be able to examine and critique the validity of information, arguments, and different viewpoints, and to reach sound judgments on the basis of credible evidence and logical reasoning.

Innovative problem solver:

Graduates should be able to identify and define problems in both professional and day-to-day contexts, and produce innovative solutions to solve problems.

Effective communicator:

Graduates should be able to comprehend and communicate effectively in English and Chinese, where appropriately, orally and in writing, in professional and day-to-day contexts.

Lifelong learner:

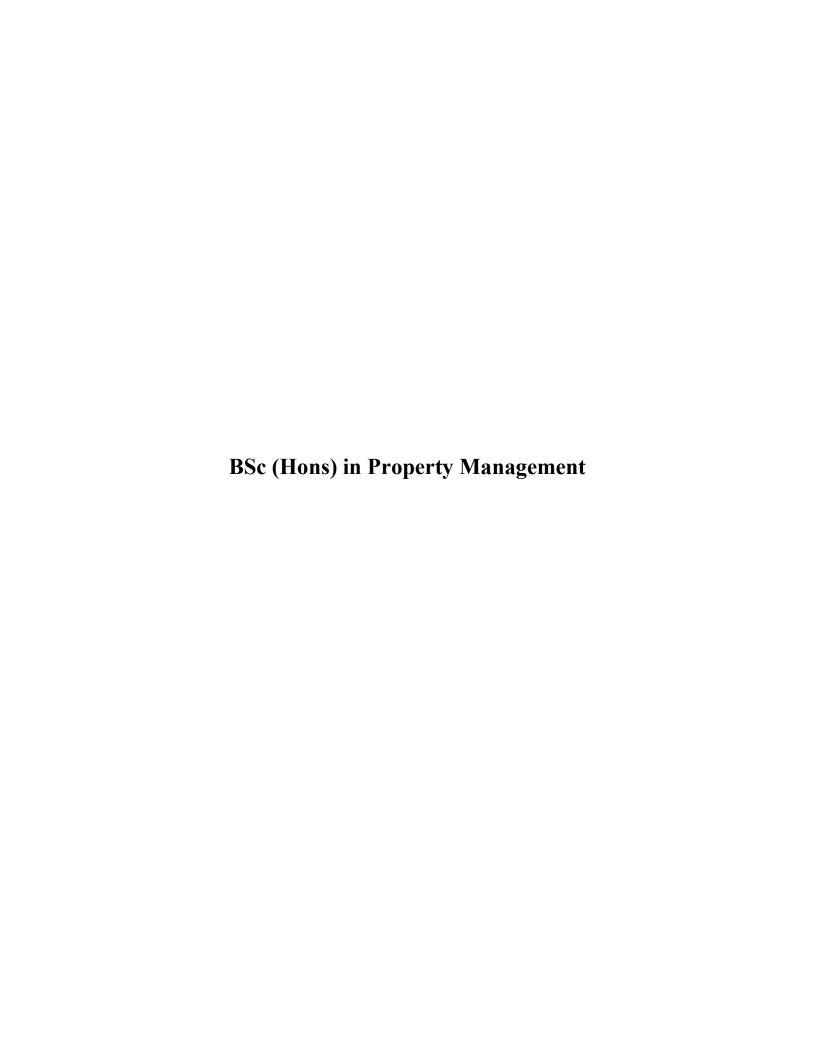

Graduates should be able to recognise the need for continual learning and self-improvement, and be able to plan, manage and evaluate their own learning in pursuit of self-determined goals.

Ethical leader:

Graduates should have an understanding of leadership and be prepared to serve as a leader and a team player (leadership and teamwork); demonstrate self-leadership and psychosocial competence in pursuing personal and professional development (intrapersonal competence); be capable of building and maintaining relationship and resolving conflicts in group work situations (interpersonal competence); and demonstrate ethical reasoning in professional and day-to-day contexts (ethical reasoning).

Socially responsible global citizen:

Graduates should have the capacity for understanding different cultures and social development needs in the local, national and global contexts (interest in culture and social development); and accept their responsibilities as professionals and citizens to society, their own nation and the world (social, national, and global responsibility).

1. **General Information**

Summary of Programme Details:

Name of University: The Hong Kong Polytechnic University

Faculty: Construction and Environment (FCE)

Department: Building and Real Estate (BRE)

Programme: BSc (Hons) in Property Management (PMT)

Mode of Attendance: Full-time

Mode of Operation: Credit-Based Programme

Mode of Finance: UGC Funded

Duration: Normally two years

Total Credits Requirements: 72 credits (plus 2 training credits)

Commencing: September 2021

Level of Award: BSc (Hons) in Property Management

Contributing Departments / Centres

Host Department: Building and Real Estate (BRE)

Contributing Departments and Centre:

- Applied Social Sciences (APSS)
- English Language Centre (ELC)
- Chinese Language Centre (CLC)

Programme Planning Committee

Head of the Department Associate Head (Teaching) Undergraduate Scheme Chair PMT Award Co-ordinator

2. Programme Aims, Objectives and Outcomes

Programme Aims

The PMT Programme aims to provide students with a broad-based and inter-disciplinary education in the context of property and housing management as well as facilities and corporate asset management and to develop them as all-rounders who can understand and work with the interplay between social, economic, political, legal, technological and commercial issues and problems incidental to the property management. Students are equipped with the ability to identify the issues and to solve the strategic and operational problems in property management. It is intended to prepare students for a professional career in property management in Hong Kong and the region with the essential knowledge and prerequisite skills for the profession.

Programme Outcomes

Programme outcomes refer to the intellectual abilities, knowledge, skills and attributes that an all-rounded preferred graduate from PMT programme should possess.

To ensure fulfilment of the goal of developing all-round students with professional competence, it is required that outcome statements encompass the following two categories of learning outcomes:

Professional/Academic Knowledge and Competencies

Upon successful completion of the programme, the students are expected to attain the following abilities:-

- (i) To apply professional and vocational knowledge in property management, including its operational logistics and multi-disciplinary facets.
- (ii) To identify and solve problems in property management practices.
- (iii) To communicate effectively with social skills as a competent property manager.
- (iv) To practise as a professional property manager in compliance with the legal and ethical requirements of the profession.
- (v) To appreciate the multi-disciplinary dimensions of property management practices and the interests of the stakeholders in the industry.
- (vi) To explore options for the property management practices with creative and critical mind-set.

Attributes for All-roundedness

As all undergraduate programmes are under the BRE Degree scheme, the attributes for all-roundedness listed are the same under the scheme.

Upon successful completion of the programme, the students are expected to possess the following attributes for all-roundedness:-

- (i) To possess skills to identify, analyse and solve problems.
- (ii) To have an understanding of professional, social and ethical responsibilities.
- (iii) To communicate effectively.
- (iv) To reflect on knowledge gap for life time learning.
- (v) To contribute as team member and to lead effectively.
- (vi) To identify contemporary issues.

Note: PolyU aspires to develop all its students as all-round graduates with professional competence, and has identified a set of highly valued graduate attributes that can be developed through the curricular activities of this programme, some (including the all-rounded attributes such as 'to reflect on knowledge gap for life time learning and to identify contemporary issues' contained therein in the curriculum mappings of the Majors in BSc (Hons) in Building Engineering & Management, BSc (Hons) in Property Management and BSc (Hons) in Surveying) are primarily addressed through co-curricular activities offered by faculties, departments, and various teaching and learning support units of the University. Students are encouraged to make full use of such opportunities to develop these attributes.

Head of the Department Associate Head (Teaching) Undergraduate Scheme Chair SUV Award Co-ordinator SUV Deputy Award Co-ordinator

2. Programme Aims, Objectives and Outcomes

Programme Aims

The Programme aims to prepare students with fundamental knowledge and skills in the interdisciplinary professions of land, property and construction for their immediate employability and lifelong learning. The Programme underpins surveying studies with the disciplines of economics, urban substainable, management and technology. Graduates will enter the professions of building surveying, quantity surveying, planning & development, property and facility management or general practice surveying as graduate trainees but with full potentials to readily become full-fledged professional surveyors and finally take leading and strategic roles in the profession and business of land, property and construction and make contributions to the community through their chosen professional services.

Programme Outcomes

Programme outcomes refer to the intellectual abilities, knowledge, skills and attributes that an all-round preferred graduate from surveying programme should possess.

To ensure fulfilment of the goal of developing all-round students with professional competence, it is required that outcome statements encompass the following two categories of learning outcomes:

Professional/Academic Knowledge and Competencies

Upon successful completion of the programme, the students are expected to attain the following abilities:-

- (i) To comprehend and identify issue and problems concerning land, property and construction at project level.
- (ii) To comprehend and identify issue and problems concerning land, property and construction at corporate level.
- (iii) To comprehend and identify issue and problems concerning land, property and construction at industry level.
- (iv) To comprehend and identify issues and problems concerning land, property and construction at macro social-economic and political level.
- (v) To advise clients through rendering surveying services.
- (vi) To identify, formulate and solve problems related to the surveying profession and real estate industry.
- (vii) To analyse and interpret data of the industry
- (viii) To formulate and implement strategies, policies and solutions for sustainable development and construction.

Attributes for All-roundedness

As all undergraduate programmes are under the BRE Degree scheme, the attributes for all-roundedness listed are the same under the scheme.

Upon successful completion of the programme, the students are expected to possess the following attributes for all-roundedness:-

- (i) To possess skills to identify, analyse and solve problems.
- (ii) To have an understanding of professional, social and ethical responsibilities.
- (iii) To communicate effectively.
- (iv) To reflect on knowledge gap for life time learning.
- (v) To contribute as team member and to lead effectively.
- (vi) To identify contemporary issues.

Note: PolyU aspires to develop all its students as all-round graduates with professional competence, and has identified a set of highly valued graduate attributes that can be developed through the curricular activities of this programme, some (including the all-rounded attributes such as 'to reflect on knowledge gap for life time learning and to identify contemporary issues' contained therein in the curriculum mappings of the Majors in BSc (Hons) in Building Engineering & Management, BSc (Hons) in Property Management and BSc (Hons) in Surveying) are primarily addressed through co-curricular activities offered by faculties, departments, and various teaching and learning support units of the University. Students are encouraged to make full use of such opportunities to develop these attributes.

Graduate attributes and institutional learning outcomes for undergraduate degree programmes

Competent professional:

Graduates should be able to integrate and to apply in-depth discipline knowledge and specialised skills that are fundamental to functioning effectively as an entry-level professional (professional competence); understand the global trends and opportunities related to their professions (global outlook); and demonstrate entrepreneurial spirit and skills in their work, including the discovery and use of opportunities, and experimentation with novel ideas (entrepreneurship).

Critical thinker:

Graduates should be able to examine and critique the validity of information, arguments, and different viewpoints, and to reach sound judgments on the basis of credible evidence and logical reasoning.

Innovative problem solver:

Graduates should be able to identify and define problems in both professional and day-to-day contexts, and produce innovative solutions to solve problems.

Effective communicator:

Graduates should be able to comprehend and communicate effectively in English and Chinese, where appropriately, orally and in writing, in professional and day-to-day contexts.

Lifelong learner:

Graduates should be able to recognise the need for continual learning and self-improvement, and be able to plan, manage and evaluate their own learning in pursuit of self-determined goals.

Ethical leader:

Graduates should have an understanding of leadership and be prepared to serve as a leader and a team player (leadership and teamwork); demonstrate self-leadership and psychosocial competence in pursuing personal and professional development (intrapersonal competence); be capable of building and maintaining relationship and resolving conflicts in group work situations (interpersonal competence); and demonstrate ethical reasoning in professional and day-to-day contexts (ethical reasoning).

Socially responsible global citizen:

Graduates should have the capacity for understanding different cultures and social development needs in the local, national and global contexts (interest in culture and social development); and accept their responsibilities as professionals and citizens to society, their own nation and the world (social, national, and global responsibility).

3. General Entrance Requirements

Normal Applicants

The basic entrance requirement is a Higher Diploma or Associate Degree in Construction related discipline or equivalent from a recognized institution.

Selection

Selection of applicants for admission is based on academic qualifications and other relevant qualifications. Short-listed applicants may be required to attend an interview. The purpose of the interview is to assess the applicants':-

- Command of spoken English;
- Depth and breadth of general knowledge, and
- Motivation for entering the programme.

The final selection of students will be based on a balance of academic attainment, motivation, and the interview report, if any.

In all cases, the final decision as to the suitability of any applicant will be the sole discretion of the Head of Department.

4. Intended Learning Outcomes, Curriculum Mapping, Programme Curriculum and Progression Pattern of Programmes

BSc (Hons) in Building Engineering & Management

Subject Descriptions

'Level' codes reflect the intellectual demand on the students. The levels of the subjects are coded according to a common coding system of the Hong Kong Polytechnic University.

| <u>Level</u> | | Explanation |
|--------------|---|--|
| 2 | = | Standard comparable to Year 2 of a 4-year degree Major |
| 3 | = | Standard comparable to Year 3 of a 4-year degree Major |
| 4 | = | Standard comparable to the final year of a 4-year degree Major |

The University adopts a university-wide standard for subject level weighting for calculating the award GPA, and to use the weighting of 2 for Level 2 subjects; and a weighting of 3 for Level 3 and 4 subjects.

The Programme Curriculum and Examination Schedule for each academic level are detailed in Programme Curriculum Table from Stage 3 to Stage 4.

Subjects are referred by subject codes. The alphabets refer to the responsible departments whilst the three-digit reference numbers, the first digit (i.e. 2, 3 or 4) indicates the level of the subjects.

The typical progression patterns of BSc (Hons) in Building Engineering & Management illustrate the semesters in which these subjects are recommended to be taken, if the programme of the Major is to be completed in the minimum time.

NOTE

*Programme Curriculum displays the Discipline-specific Requirements (DSR) for the Major in Building Engineering & Management only.

Details of the General University Requirements (GUR) can be found from their respective websites provided by the University.

Intended Learning Outcomes of BEM programme

To ensure fulfilment of the goal of developing all-round students with professional competence stipulated by the University, it is required that outcome statements encompass the following two categories of learning outcomes:-

A. Professional/Academic Knowledge and Competence

Upon successful completion of the programme, the graduate is expected to action the following abilities:-

- (i) To possess knowledge of building engineering principles, processes and methods for the successful completion of all types of construction projects.
- (ii) To use the techniques, skills and engineering principles for different types of construction.
- (iii) To apply construction management knowledge and skills in personnel, financial and operational practices and communication aspects required for efficient building production.
- (iv) To identify, structure and analyse diverse problems arising from the changing social, economic, environmental and technological pressures.
- (v) To solve identified construction problems with appropriate solutions.
- (vi) To evaluate alternative strategic options.
- (vii) To select appropriate construction materials, practices and methods in compliance with sustainable development.
- (viii) To exercise professional judgement in the consideration of alternatives in complex situations.

B. Attributes for All-roundedness

As all undergraduate programmes are under the BRE Scheme, the attributes for all-roundedness listed are the same under the scheme.

Upon successful completion of the programme, the students are expected to possess the following attributes for all-roundedness:-

- (i) To possess skills to identify, analyse and solve problems.
- (ii) To have an understanding of professional, social and ethical responsibilities.
- (iii) To communicate effectively.
- (iv) To reflect on knowledge gap for life time learning.
- (v) To contribute as team member and to lead effectively.
- (vi) To identify contemporary issues.

Curriculum Mapping: BSc (Hons) in Building Engineering & Management

This curriculum map gives a holistic view of the degree to which each intended learning outcome will be taught and assessed in your programme.

The following indicators (I, R, A) to show the treatment of the programme outcome in a subject:

I (Introduced) That the learning leading to the particular intended outcome is introduced in that subject. R (Reinforced) That the learning leading to the particular intended outcome is reinforced in that subject.

A (Assessed) That the performance which demonstrates the particular intended outcome is assessed in that subject

Notes:

- 1. * Senior year intake students need to take 2 CAR subjects, which must be different from the CAR subjects taken during their study of Higher Diploma or Associate Degree. In the meantime, the students must meet the language requirements (English reading, writing; Chinese reading, Writing), and China-related study through CAR subjects, if not yet during their previous study. The student can take CAR subjects in any semester before graduation.
- 2. ** Planning for study tour or comparative international study shall be commenced from year 1, semester 1. The study tour or field study shall be completed during the Semester 1 of year 2.
- 3. *** The Department reserves the rights to review/revise the subjects offered and time of offer.

BSc (Hons) in Property Management

Subject Descriptions

'Level' codes reflect the intellectual demand on the students. The levels of subjects are coded according to a common coding system of the Hong Kong Polytechnic University.

| <u>Level</u> | | Explanation |
|--------------|---|--|
| 1 | = | Standard comparable to Year 1 of a 4-year degree Major |
| 2 | = | Standard comparable to Year 2 of a 4-year degree Major |
| 3 | = | Standard comparable to Year 3 of a 4-year degree Major |
| 4 | = | Standard comparable to the final year of a 4-year degree Major |
| 5-6 | = | Standard at postgraduate level |

The University adopts a university-wide standard for subject level weighting for calculating the award GPA, and to use the weighting of 2 for Level 1 and 2 subjects; and a weighting of 3 for Level 3 and 4 subjects.

The Programme Curriculum and Assessment Methods for each academic level are detailed in Programme Curriculum Table from Stage 1 to Stage 4.

Subjects are referred by subject codes. The alphabets refer to the responsible departments whilst the three-digit reference numbers, the first digit (i.e. 1, 2, 3 or 4) indicates the level of the subjects.

The typical progression patterns of BSc (Hons) in Property Management illustrate the semesters in which these subjects are recommended to be taken, if the programme of the Major is to be completed in the minimum time.

'Electives' are those subjects which are optional. These give students some choices in composing their study programme.

NOTE

*Programme Curriculum displays the Discipline-specific Requirements (DSR) for the Major in Property Management only.

Details of the General University Requirements (GUR) can be referred to their respective websites provided by the University.

Intended Learning Outcomes of PMT programme

To ensure fulfilment of the goal of developing all-round students with professional competence stipulated by the University, it is required that outcome statements encompass the following two categories of learning outcomes:-

A. Professional/Academic Knowledge and Competence

Upon successful completion of the programme, the graduate is expected to action the following abilities:-

- (i) To apply professional and vocational knowledge in property management, including its operational logistics and multi-disciplinary facets.
- (ii) To identify and solve problems in property management practices.
- (iii) To communicate effectively with social skills as a competent property manager.
- (iv) To practice as a professional property manager in compliance with the legal and ethical requirements of the profession.
- (v) To appreciate the multidisciplinary dimensions of property management practices and the interests of the stakeholders in the industry.
- (vi) To explore options for the property management practices with creative and critical mind-set.

B. Attributes for All-roundedness

As all undergraduate programmes are under the BRE Scheme, the attributes for all-roundedness listed are the same under the scheme.

Upon successful completion of the programme, the students are expected to possess the following attributes for all-roundedness:-

- (i) To possess skills to identify, analyse and solve problems.
- (ii) To have an understanding of professional, social and ethical responsibilities.
- (iii) To communicate effectively.
- (iv) To reflect on knowledge gap for life time learning.
- (v) To contribute as team member and to lead effectively.
- (vi) To identify contemporary issues.

Relationship between the programme intended learning outcomes (PILOs) of the PMT and the Institutional learning outcomes of $\hbox{Poly} U$

| ILOs of BEM Programme | Institutional Learning Outcomes | | | | | | |
|---|---------------------------------|---------------------|------------------------|---------------------------------|---------------------|-------------------|--|
| (Category A) | Competent professional | Critical thinker | Effective communicator | Innovative problem solver | Lifelong learner | Ethical leader | Socially responsible global citizen |
| (i) | X | X | | X | | X | |
| (ii) | X | X | | X | X | | |
| (iii) | X | X | X | X | | | |
| (iv) | X | X | | X | X | X | X |
| (v) | X | X | X | X | | X | X |
| (vi) | X | X | X | X | X | | |
| ILOs of BEM Programme (Category B) | Competent professional | Critical thinker | Effective communicator | Innovative problem solver | Lifelong learner | Ethical leader | Socially responsible global citizen |
| (i) | X | X | X | X | | | |
| (ii) | X | X | X | X | X | X | X |
| (iii) | X | X | X | X | X | X | |
| (iv) | X | | | X | X | | X |
| (v) | X | X | X | X | | X | |
| (vi) | X | X | X | X | | X | X |

Curriculum Mapping: BSc (Hons) in Property Management

This curriculum map gives a holistic view of the degree to which each intended learning outcome will be taught and assessed in your programme.

The following indicators (I, R, A) to show the treatment of the programme outcome in a subject:

I (Introduced) That the learning leading to the particular intended outcome is introduced in that subject.

R (Reinforced) That the learning leading to the particular intended outcome is reinforced in that subject.

A (Assessed) That the performance which demonstrates the particular intended outcome is assessed in that subject

BSc (Hons) in Surveying

Subject Descriptions

'Level' codes reflect the intellectual demand on the students. The levels of the subjects are coded according to a common coding system of the Hong Kong Polytechnic University.

| Level | | Explanation |
|-------|---|--|
| 2 | = | Standard comparable to Year 2 of a 4-year degree Major |
| 3 | = | Standard comparable to Year 3 of a 4-year degree Major |
| 4 | = | Standard comparable to the final year of a 4-year degree Major |

The University adopts a university-wide standard for subject level weighting for calculating the award GPA, and to use the weighting of 2 for Level 2 subjects; and a weighting of 3 for Level 3 and 4 subjects.

The Programme Curriculum and Examination Schedule for each academic level are detailed in Programme Curriculum Table from Stage 3 to Stage 4.

Subjects are referred by subject codes. The alphabets refer to the responsible departments whilst the three-digit reference numbers, the first digit (i.e. 2, 3 or 4) indicates the level of the subjects.

The typical progression patterns of BSc (Hons) in Surveying illustrate the semesters in which these subjects are recommended to be taken, if the programme of the Major is to be completed in the minimum time.

NOTE

*Programme Curriculum displays the Discipline-specific Requirements (DSR) for the Major in Surveying only.

Details of the General University Requirements (GUR) can be found from their respective websites provided by the University.

Intended Learning Outcomes of Surveying programme

To ensure fulfilment of the goal of developing all-round students with professional competence stipulated by the University, it is required that outcome statements encompass the following two categories of learning outcomes:-

A. Professional/Academic knowledge and competencies

Upon successful completion of the programme, the students and expected to attain the following abilities:-

- (i) To comprehend and identify issue and problems concerning land, property and construction at project level.
- (ii) To comprehend and identify issue and problems concerning land, property and construction at corporate level.
- (iii) To comprehend and identify issue and problems concerning land, property and construction at industry level.
- (iv) To comprehend and identify issues and problems concerning land, property and construction at marco social-economic and political level.
- (v) To advise clients through rendering surveying services.
- (vi) To identify, formulate and solve problems related to the surveying profession and real estate industry.
- (vii) To analyse and interpret data of the industry.
- (viii) To formulate and implement strategies, policies and solutions for sustainable development and construction.

B. Attributes for All-roundedness

As all undergraduate programmes are under the BRE Scheme, the attributes for all-roundedness listed are the same under the scheme.

Upon successful completion of the programme, the students are expected to possess the following attributes for all-roundedness:-

- (i) To possess skills to identify, analyse and solve problems.
- (ii) To have an understanding of professional, social and ethical responsibilities.
- (iii) To communicate effectively.
- (iv) To reflect on knowledge gap for life time learning.
- (v) To contribute as team member and to lead effectively.
- (vi) To identify contemporary issues.

Relationship between the programme intended learning outcomes (PILOs) of the SUR and the Institutional learning outcomes of PolyU

| ILOs of BEM Programme | | | Institutional | Learning Out | comes | | |
|---|------------------------|---------------------|------------------------|---------------------------------|---------------------|-------------------|--|
| (Category A) | Competent professional | Critical thinker | Effective communicator | Innovative problem solver | Lifelong learner | Ethical leader | Socially responsible global citizen |
| (i) | X | X | | X | | X | |
| (ii) | X | X | | X | | | |
| (iii) | X | X | | X | X | X | |
| (iv) | X | X | | X | | X | X |
| (v) | X | X | X | X | | | |
| (vi) | X | X | X | X | X | | |
| (vii) | X | X | X | | | | |
| (viii) | X | X | X | X | X | X | X |
| | | | | | | | |
| ILOs of BEM Programme (Category B) | Competent professional | Critical thinker | Effective communicator | Innovative problem solver | Lifelong learner | Ethical leader | Socially responsible global citizen |
| (i) | X | X | X | X | | | |
| (ii) | X | X | X | X | X | X | X |
| (iii) | X | X | X | X | X | X | |
| (iv) | X | | | X | X | | X |
| (v) | X | X | X | X | | X | |
| (vi) | X | X | X | X | | X | X |

Curriculum Mapping: BSc (Hons) in Surveying

This curriculum map gives a holistic view of the degree to which each intended learning outcome will be taught and assessed in your programme.

The following indicators (I, R, A) to show the treatment of the programme outcome in a subject:

I (Introduced) That the learning leading to the particular intended outcome is introduced in that subject. R (Reinforced) That the learning leading to the particular intended outcome is reinforced in that subject.

A (Assessed) That the performance which demonstrates the particular intended outcome is assessed in that subject

Level 2 Subjects

NOTE:

Students must complete and pass all the Discipline-Specific Subjects and all Discipline-Specific Elective Subjects of their chosen surveying discipline for graduation.

- 1. Surveying students are required to opt ONE Discipline from the 5 surveying disciplines: BS, GP, PD, PFM and QS.
- 2. International study tour is to take place in the Summer Semester of stage 3. Students need to commence their study tour preparation, organization and liaison work from Semester 1 of stage 3.
- 3. BRE466 is a **6-credit** core subject spanning across from year 4 Semester 1 to Semester 2

CW = Coursework CA = Continuous Assessment E = Elective

General University Requirements (GUR)

| Area and Credit Requirement | Curriculum Requirement |
|--|---|
| Cluster-Area Requirements (CAR) [6 credits; min. 3 credits should be in subject designated as "China-related"] | Students should not take more than 3 credits (1 subject) from the same cluster area. Students need to fulfill the English and Chinese reading and writing requirements and 3 credits of China Studies requirement (CSR) Students may apply for a waiver if they have fulfilled the English and Chinese reading and writing requirements and/or CSR requirement in their previous studies. |
| Service Learning [3 credits] | Prior to its full implementation, students may take a 3-credit free elective in lieu of the Service Learning requirement |
| Language and Communication Requirements (LCR) | Having met the equivalent standard of the Undergraduate Degree Language and Communication Requirement (LCR) (Note 1) |

Note 1: Students not meeting the equivalent standard of the Undergraduate Degree LCR will be required to take additional LCR subjects. These students will have to take in an assessment test to ascertain the LCR subjects required.

PROGRESSION PATTERN

BSc (Hons) in Surveying

Total credits for the curriculum framework for the senior year intake is 72 credits (plus 2 training credits), including 9 credits for General University Requirements, and 63 credits for Discipline-Specific Requirements. Unless otherwise specified, subjects are compulsory and carry 3 credits.

Notes:

- 1. ** Surveying students are required to opt **ONE** Discipline from the 5 surveying disciplines offered by the Department.
- 2. *** Planning for study tour or comparative international study shall be commenced from year 1, semester 1. The study tour or field study shall be completed during the Semester 1 of year 2.
- 3. The Department reserves the rights to review/revise the subjects offered and time of offer.

5. Assessment

Assessment plays an important role in enhancing students' learning. Assessment is the process of finding out and putting a value on a student's achievements in studying a programme. It is a means to measure the learning outcomes/goals of a subject/programme. With the movement from a norm-referenced to a criterion-referenced model of measurement in this University, students are assessed and measured of their performance against an explicit set of standards. Therefore, the prime objective of assessment is to enable students to demonstrate their abilities in attaining the intended learning outcomes and fulfilling the intended learning outcomes and requirements of a subject/programme. Assessment is also served as feedback both to students of their performance and learning in progress and attainment of the subject/programme and to the teaching faculty of their teaching.

Different assessment methods including formative and summative assessments are adopted as deemed appropriate to the subjects depending on the natures of the subject disciplines and the alignment of the intend learning outcomes of the courses. The assessment methods are contained therein in the subject specifications, which are distributed to all students in the beginning of the academic year. It is also reinforced by the subject lecturers by informing the students at the learning commencement on the assessment modes, standards and criteria.

With the move to criterion-referenced assessment, rubrics are developed to assess student performance with a scoring scale along a task-specific continuousness of criteria for some subjects. Students' work is evaluated against scoring standards/criteria, and the assessment can be done entirely through coursework such as integrated projects, design projects, professional studies and dissertation. Innovative, originality, research techniques, group effort, individual contribution or work, communication and presentation skills (oral and written), independence in working and co-operation with teams can be thus assessed according to the specified criteria and intended learning outcomes of the subjects.

In most other subjects, the student performance in each subject is assessed through a combination of coursework and examination. Weightings are allocated to coursework and examination of a subject, e.g. 30% and 70%, 40% and 60% or 50% and 50% respectively. Coursework includes assignments, case studies, seminar/tutorial presentation, role-playing, fieldwork, tests and other forms of learning activities. Grades will be assigned to reflect both individual contribution and group effort in the case it is not an individual piece of work. Examination is an end of unit/subject assessment. Grades are usually awarded to the written examinations. Marking schemes are provided to ensure assessment and grading on student performance are based on criteria and standards. The quality of examination papers and marking schemes is scrutinized by the external examiners and departmental academic advisor.

Other than projects and dissertation, where appropriate, some subjects can employ 100% continuous assessment. Usually students are assessed in their performance attainment of technical skills over an extended period of time, for example, measurement, estimating & documentation, and engineering surveying.

In the case of group projects, both aggregating grades and assigning grades are given to group effort and individual contribution in a group. This is to ensure that there will be no 'non performer'. Moreover, peer interactive learning in project proposal/solutions, and different components of the project, presentations, reports and communication are included in the grading for the group effort.

Assessment Method

Students' performance in a subject is assessed by either of the following methods:-

- (a) <u>Coursework only</u>: To pass a subject by this method, a student must attain a minimum Grade 'D' in coursework (tests, assignments, projects, laboratory work, field exercises, presentations and other forms of classroom participation).
- (b) Examination and Coursework (the weighting of each component is stated in the Subject Portfolio): To pass a subject by this method a student must attain a minimum Grade 'D' in coursework and a minimum Grade 'D' in the examination.
- (c) <u>Continuous Assessment</u>: Both **Project** and **Capstone Project** are of this type of assessment where students are assessed through a period of time with stages of work and progress together with the final products of works. The 'Guidance Notes for the Capstone projects' detailed the assessment and process.

Assessment methods and parameters are determined by the Subject Leader who will inform the students of the details at the beginning of each semester.

<u>Grading</u> (in accordance with C1-8 General Assessment Regulations of AR Handbook on Academic Regulations and Procedures)

At the end of each semester, students will be informed of the grade achieved for each subject normally.

Assessment grades shall be awarded on a criterion-reference basis. A student's overall performance in a subject shall be graded as follows:-

| Subject Grade | Short Description | Elaboration on subject grading description |
|---------------|----------------------|---|
| A+ A A- | Excellent | Demonstrates excellent achievement of intended subject learning outcomes by being able to skillfully use concepts and solve complex problems. Shows evidence of innovative and critical thinking in unfamiliar situations, and is able to express the synthesis or application of ideas in a logical and comprehensive manner. |
| B+ B B- | Good | Demonstrates good achievement of intended subject learning outcomes by being able to use appropriate concepts, and solve problems. Shows the ability to analyse issues critically and make well-grounded judgements in familiar or standard situations, and is able to express the synthesis or application of ideas in a logical and comprehensive manner. |
| C+ C C- | Satisfactory | Demonstrates satisfactory achievement of intended subject learning outcomes by being able to solve relatively simple problems. Shows some capacity for analysis and making judgements in a variety of familiar and standard situations, and is able to express the synthesis or application of ideas in a manner that is generally logical but fragmented. |
| D+ D | Pass | Demonstrates marginal achievement of intended subject learning outcomes by being able to solve relatively simple problems. Can make basic comparisons, connections and judgements and express the ideas learnt in the subject, though there are frequent breakdowns in logic and clarity. |
| F | Fail | Demonstrates inadequate achievement of intended subject learning outcomes through a lack of knowledge and/or understanding of the subject matter. Evidence of analysis is often irrelevant or incomplete. |

Note:

- Marking rubrics aligned with these Grade Descriptors need not include all aspects of the grade descriptor.
- Marking rubrics aligned with these Grade Descriptors may include other aspects aligned with particular subject matter or field of study requirements but are not included in the grade descriptor.

^{&#}x27;F' is a subject failure grade, whilst all others (from 'D' to 'A+') are subject passing grades. No credit will be earned if a subject is failed.

The grade points assigned to subject grades attained by students are as follows:

| Grade | New Grade Point | Short Description |
|-------|-----------------|-------------------|
| A+ | 4.3 | |
| A | 4.0 | Excellent |
| A- | 3.7 | |
| B+ | 3.3 | |
| В | 3.0 | Good |
| B- | 2.7 | |
| C+ | 2.3 | |
| C | 2.0 | Satisfactory |
| C- | 1.7 | |
| D+ | 1.3 | Dana |
| D | 1.0 | Pass |
| F | 0.0 | Failure |

At the end of each semester/term, a Grade Point Average (GPA) will be computed based on the grade point of the subject overall grade as follows:-

$$GPA = \frac{\sum_{n=1}^{N} Subject \ Grade \ Point_{n} \times Subject \ Credit \ Value_{n}}{\sum_{n=1}^{N} Subject \ Credit \ Value_{n}}$$

where N = number of all subjects (inclusive of failed subjects) taken by the student up to and including the latest semester/term. For subjects which have been retaken, only the grade point obtained in the final attempt will be included in the GPA calculation

In addition, the following subjects will be excluded from the GPA calculation:-

- (i) Exempted subjects
- (ii) Ungraded subjects
- (iii) Incomplete subjects
- (iv) Subjects for which credit transfer has been approved, but without any grade assigned¹
- (v) Subjects from which a student has been allowed to withdraw (i.e. those with the code 'W')

Subject which has been given an "S" code, i.e. absent from all assessment components, will be included in the GPA calculation and will be counted as "zero" grade point. GPA is thus the unweighted cumulative average calculated for a student, for all relevant subjects taken from the start of the programme to a particular reference point of time. GPA is an indicator of overall performance, and ranges from 0.00 to 4.30 from 2020/21.

Subjects taken in PolyU or elsewhere and with grades assigned, and for which credit transfer has been approved, will be included in the GPA calculation.

The Weighted GPA will be used as a guide to help determine award classifications, and the level weighting to different subjects of all disciplines and programmes will need to be specified in the Programme Requirement Document.

Weighted GPA will be computed as follows:-

$$Weighted \ GPA = \frac{\sum_{n=1}^{N} Subject \ Grade \ Point_{n} \times Subject \ Credit \ Value_{n} \times W_{n}}{\sum_{n=1}^{N} Subject \ Credit \ Value_{n} \times W_{n}}$$

where W_n = weighting to be assigned according to the level of the subject

N=1 number of all subjects counted in GPA calculation as set out in Section 5 , except those exclusions specified below

For calculating the Weighted GPA (and award GPA) to determine the Honours classification of students who satisfy the graduation requirements of Bachelor's degree awards, a University-wide standard weighting¹ will be applied to all subjects of the same level, with a weighting of 2 for Level 1 and 2 subjects, a weighting of 3 for Level 3 and 4 subjects. Same as for GPA, Weighted GPA is ranges from 0.00 to 4.30 from 2020/21.

Any subjects passed after the graduation requirement has been met will <u>not</u> be taken into account of in the grade point calculation for award classification.

Progression/Academic Probation/De-registration

The Board of Examiners shall, at the end of each semester (except for Summer Term unless there are students who are eligible to graduate after completion of Summer Term study is mandatory for the programme), determine whether each student is

- (i) eligible for progression towards an award; or
- (ii) eligible for an award; or
- (iii) required to be de-registered from the programme.

When a student has a Grade Point Average (GPA) lower than 1.70, he will be put on academic probation in the following semester. If a student is able to pull his GPA up to 1.70 or above at the end of the semester, the status of "academic probation" will be lifted. The status of "academic probation" will be reflected in the assessment result notification but not in transcript of studies.

Requests for deviation from this University-wide standard require specific approval by the APRC.

A student will have 'progressing' status unless he falls within any one of the following categories which shall be regarded as grounds for de-registration from the programme:-

- (i) the student has reached the final year of the normal period of registration for that programme, as specified in the Programme Requirement Document, unless approval has been given for extension; or
- (ii) the student has reached the maximum number of retakes allowed for a failed compulsory subject; or
- (iii) the student's GPA is lower than 1.70 for two consecutive semesters <u>and</u> his Semester GPA in the second semester is also lower than 1.70; or
- (iv) the student's GPA is lower than 1.70 for three consecutive semesters.

When a student falls within any of the categories as stipulated above, except for category (i) with approval for extension, the Board of Examiners shall de-register the student from the programme without exception.

A student may be de-registered from the programme enrolled before the time frame specified above, if his academic performance is poor to the extent that the Board of Examiners deems that his chance of attaining a GPA of 1.70 at the end of the programme is slim or impossible.

The progression of students to the following academic year will not be affected by the GPA obtained in the Summer Term, unless Summer Term study is mandatory for all students of the programme and constitutes a requirement for graduation, and is so specified in the Programme Requirement Document.

If the student is not satisfied with the de-registration decision of the Board of Examiners, he can lodge an appeal. All such appeal cases will be referred directly to the Academic Appeals Committee (AAC) for final decision. Views of Faculties/Schools/Departments will be sought and made available to AAC for reference.

Retaking of Subjects

Students may only retake a subject which they have failed (i.e. Grade F or U). Retaking of subjects is with the condition that the maximum study load of 21 credits per semester is not exceeded. Special approval by HoD is necessary should a student plans to take beyond 21 credits in one semester. For such cases, students should be reminded that the study load approved should not be taken as grounds for academic appeal.

The number of retakes of a subject should be restricted to two, i.e. a maximum of three attempts for each subject is allowed¹.

The second retake of a failed subject requires the approval from Faculty and School Board

The retake count of students admitted in or before 2019/20 will be reset to "0" in 2020/21 when the revised regulations come into effect.

Students who have failed a compulsory subject after two retakes and have been de-registered can submit an appeal to the AAC for a third chance of retaking the subject.

In case AAC does not approve further retakes of a failed compulsory subject or the taking of an equivalent subject with special approval from the Faulty, the student concerned would be re-registered and the decision of the AAC would be final within the University.

Appeals

Appeals against the decision of the Scheme Board of Examiners must be made within 7 working days after the public announcement of the examination results. A student should make the appeal to the Head of the BRE Department. The Department will inform the student of the appeal result and, if the appeal is successful, the Department will inform the Faculty. (Details are referred to C7 Student Appeals of AR Handbook on Academic Regulations and Procedures)

6. **Progression and Award**

Progression

A student will have 'progressing' status unless he falls within the following categories, either of which may be regarded as grounds for deregistration from the programme:-

- (i) the student has reached the final year of the normal period of registration for that programme, as specified in the Programme Requirement Document, unless approval has been given for extension; or
- (ii) the student has reached the maximum number of retakes allowed for a failed compulsory subject; or
- (iii) the student's GPA is lower than 1.70 for two consecutive semesters <u>and</u> his Semester GPA in the second semester is also lower than 1.70; or
- (iv) the student's GPA is lower than 1.70 for three consecutive semesters.

Graduation Requirements

A student will be eligible for award if all the following conditions are satisfied:-

- (i) accumulation of the requisite number of credits for the particular award, as defined in the definitive programme document; and
- (ii) satisfying the residential requirement for at least one third of the credits required for the award to be completed under the current enrolment at PolyU; and
- (iii) satisfying all requirements as defined in the definitive programme document and as specified by the University; and
- (iv) having a Grade Point Average (GPA) of 1.70 or above at the end of the programme.

A student is required to graduate as soon as all the conditions for award are satisfied.

Guidelines for Award Classification

The following are guidelines for the Boards of Examiners when determining award classifications. The BoE will exercise its judgement as to the award for each student and may use other relevant information.

| Honours Degree | Guidelines | |
|-----------------------|---|--|
| | | |
| 1 st | The student's performance/attainment is outstanding, and identifies | |
| | him as exceptionally able in the field covered by the programme in | |
| | question. | |
| 2:i | The student has reached a standard of performance/attainment, which | |
| | is more than satisfactory but less than outstanding. | |
| 2:ii | The student has reached a standard of performance/attainment judged | |
| | to be satisfactory, and clearly higher than the "essential minimum" | |
| | required for graduation. | |
| 3 rd | The student has attained the "essential minimum" required for | |
| | graduation at a standard ranging from just adequate to just | |
| | satisfactory. | |

The following table indicates the ranges of award GPA for determining award classifications:

| Honours classification | All other programmes | Award GPA |
|------------------------|----------------------|-------------|
| 1st | Distinction | 3.60 - 4.30 |
| 2:i | Credit | 3.00 - 3.59 |
| 2:ii | Pass | 2.40 - 2.99 |
| 3rd | | 1.70 - 2.39 |

A Pass-without-Honours degree award will be recommended only under exceptional circumstances, when the student has demonstrated a level of final attainment which is below the 'essential minimum' required for graduation with Honours from the programme in question, but when he has nonetheless covered the prescribed work of the programme in an adequate fashion, while failing to show sufficient evidence of the intellectual calibre expected of Honours degree graduates.

Subject Portfolio

Level 3 Subjects:

| BRE302 | Structure II |
|--------|--|
| BRE315 | Property Valuation |
| BRE326 | Maintenance Technology & Management |
| BRE336 | Development Control Law |
| BRE337 | Property Law |
| BRE341 | Property Management I |
| BRE345 | Measurement, Documentation & Estimating |
| BRE349 | Building Services I |
| BRE350 | Project Management and Procurement |
| BRE361 | Construction Technology & Materials II |
| BRE362 | Urban Economics and Property Investment |
| BRE363 | Construction Economics |
| BRE364 | Construction Contract Law and Administration |
| BRE365 | International Study |
| BRE366 | Analytical Skills and Methods |
| BRE369 | Integrated Professional Workshop II |
| BRE397 | Property Management Accounting |

Level 4 Subjects:

| BRE415 | Dispute Resolution |
|---------|--|
| BRE418 | Real Estate Development |
| BRE426 | Geotechnical and Foundation Engineering |
| BRE427 | Applied Property Investment |
| BRE4281 | Construction Engineering Management |
| BRE4291 | Real Estate Marketing |
| BRE431 | Housing Studies |
| BRE432 | Property Management II |
| BRE435 | Design, Adaptation and Conversion |
| BRE436 | Applied Property Valuation |
| BRE437 | Facility Management |
| BRE439 | Engineering Contract Procedure |
| BRE4393 | Temporary Work Design |
| BRE440 | Cost and Value Management |
| BRE442 | Forecasting & Competition in the Built Environment |
| BRE453 | Building Services II |
| BRE461 | Environmental Impact and Assessment |
| BRE462 | Advanced Construction Technology |
| BRE463 | Business Valuation and Accounts |
| BRE464 | Urban Planning (Workshops) |
| BRE465 | Asset Management |
| BRE466 | Capstone Project |
| BRE469 | Integrated Professional Workshop III |
| BRE470 | Information Technology and Building Information Modelling for Construction |

Service Teaching:

| AMA1110 | Basic Mathematics I – Calculus and Probability & Statistics |
|----------|--|
| AMA290 | Engineering Mathematics |
| APSS265 | Self-Understanding and Communication Skills |
| APSS4522 | Health Policy |
| APSS4531 | Current Management Issues Practices and Issues in Human Service Organizations |
| CLC3231P | Chinese Communication for Construction and Land Use |
| BRE1000 | BRE Freshmen Seminar |
| CSE20290 | Introduction to Geotechnology |
| ELC3421 | English for Construction and Environmental Professionals |
| BRE358 | Industrial Safety I |
| LSGI2961 | Engineering Surveying |
| | |
