

# WHERE INNOVATION MEETS APPLICATION

An idea is but a thought until it can be applied to solve the problems we face today and to change the world we live in. At The Hong Kong Polytechnic University, we not only impart knowledge to our graduates, but also empower them to innovate and solve real world problems. Over the years, PolyU has equipped more than 280,000 graduates to bring about changes to make our world a better place.

Since 2001, our ability to transfer cutting edge knowledge to industry and business has led to more than 140 life-changing inventions and innovations which have reaped international awards, including 40 Gold Awards. Through education and research, we at PolyU transform society and individuals, for the betterment of mankind.
