### ITC Academic Advising Orientation 2014/15 & Workshops on Examination Preparation

Academic advising at ITC aims to help students to acquire an accurate prospect of different specialisms and make proper decision of their academic choices about their study at ITC that suit their professional and personal goals. With the support of CoP – Academic Advising Funding, we offered the following two activities in the first semester of 2014/15.

## ITC Academic Advising Orientation 2014/15

In the ITC Academic Advising Orientation, outstanding alumni from different sectors of the textile industry and final year students from different specialisms were invited to share their learning experience and career development with our Year 1 students. Students also discussed their concerns with scheme leaders, academic advisors, and year tutors in a casual manner so as to map out their individual future direction and learning path. Issues including specialism selection, internship, student competitions were addressed. Positive responses were received. Students fully agreed that the reception captured their interest and enhanced their insight of the industry.

#### Workshops on Examination Preparation

In consideration of large number of Senior Year Admitted (SYA) students in ITC with major difficulties in preparing written examination, workshops to orient students towards subject examination were offered during the revision period. With the support of workshop facilitators, students organized their subject materials more effectively and better understood the answering skill in written examinations. The workshops provided students with a caring and supportive learning environment within ITC.
