

**Hubert Lo (2011 BEM graduate)**

**Construction Officer**

**1. How has your on-the-job training helped you to perform your job duties?**

**Please give one or two examples.**

I acquired invaluable experiences during the on-the-job training, and I have learnt to communicate and do business with people from various backgrounds, such as clients, architects, and sub-contractors.

By having regular coaching sessions with company directors and project managers, I've been privileged to acquire a view of the company's senior management I wouldn't normally have had. This experience not only enhanced my professional knowledge, but also gave me insights into what it means to be real good leaders in a leading contractor.

**2. What was the most meaningful experience at Hip Hing Construction Co. for you? Why?**

I am currently playing an active role in the project management team, working with different parties to enhance our team's efficiency in cost controlling and to streamline operational processes. I strive to provide the best solutions with my team. Being part of this programme rewards me with significant responsibilities. The opportunity to build a harmonious and trusting team at an early stage of my career has been personally fulfilling.

**3. Do you have any advice for our current students on how to get into the Project MT Programme at Hip Hing? How should they prepare themselves?**

Be prepared for the steepest learning curve ever, not only in terms of technical know-how, but also the skills you need to know to become a future leader in the construction industry. So try to stay positive and keep an open mind whenever you encounter problems!
