

JUNIOR RESEARCHER MENTORING PROGRAMME 2022

Code:	JRMP2022_29
School / Department:	School of Nursing
Name of Research Leader:	Dr Arkers Wong Kwan Ching, Assistant Professor
Research Topic:	Improving Post-acute Stroke Follow-up Care by Adopting Telecare Consultations in a Nurse-led Clinic During COVID-19 and Beyond: A Hybrid Type 2 Implementation-effectiveness Randomized Trial
Short Description of the Research Project:	<p>Currently, the COVID-19 pandemic has inspired healthcare organizations in Hong Kong to consider alternative modes of care delivery. Telecare consultation may be a promising option to substitute for the conventional face-to-face consultation mode. However, to our knowledge, nurses in Hong Kong have not tried to use telecare technology when consulting their patients in the nurse-led clinic. The present study will be the first in Hong Kong to fill this service and knowledge gap in the care of post-stroke patients.</p> <p>Participating students can have a chance to observe how a nurse consultant in a public hospital communicates and works with stroke patients. They will also get a chance to interview patients, input the collected data in a software called SPSS, and receive training about how to conduct a research at a university level.</p>

No. of Places Offered:	5
Frequency of Meetings:	Bi-weekly
