

• **Brief Introduction on Application Procedures**

MPT & MOT Admission of 2023/24 (8th Cohort)

Application Period

From: 31st July, 2023

To: 14th August, 2023

Application Method

1 PolyU e-Admission

- RS Website
- MPT/MOT WebPage
- “Apply Now”

The screenshot shows the website for the Master in Physiotherapy program. At the top, there is a breadcrumb trail: Home > Study > Postgraduate Entry Level Studies > Master in Physiotherapy. The main heading is "Master in Physiotherapy" with a menu icon. Below the heading is the PolyU logo and three circular images showing students in a lab setting. A navigation bar includes "Introduction" (highlighted), "Recognition and Prospects", "Curriculum", "Entrance Requirements", "Other Information", and "Enquiries". Below this, there are links for "Student Message", "Additional Documents Required", and "Info Seminar". The main content area is titled "Aims and Characteristics" and contains a paragraph about physiotherapy. To the right, there is a sidebar with an "Apply Now" button (highlighted with a yellow callout box) and a table of program details.

Master in Physiotherapy

Introduction Recognition and Prospects Curriculum Entrance Requirements Other Information Enquiries

Student Message Additional Documents Required Info Seminar

Aims and Characteristics

Physiotherapy (PT) is the art and science of rehabilitation, preventing injuries and disabilities, restoring independence and promoting a maximal level of function in individuals with physical and psychological disorders. Physiotherapists make use of multiple physical means to provide patient care. Examples include cryotherapy, electrotherapy, exercise therapy, heat therapy, hydrotherapy, manual therapy and traction, as well as assistive devices and artificial limbs to help individuals regain maximal functional potential. Physiotherapists contribute to the multidisciplinary team through patient evaluation, treatment planning and delivery, education, research and consultation in hospitals, clinics, industry and the community.

Programme Aims

The overall aim of the MPT programme is to equip students to become qualified physiotherapists who can practice physiotherapy autonomously, safely and effectively in different settings, and to meet the health care needs of society.

MPT students are developed into lifelong learners and critical consumers of the professional and scientific health care literature. Graduates possess the ability to engage in research and to critically analyse and integrate information from different sources into clinical practice. By acquiring a strong sense of professional commitment, our graduates are able to provide high quality physiotherapy services and contribute to the advancement of the rehabilitation profession.

Characteristics

The programme is based upon a solid theoretical framework. Students learn and develop the ability to link theory to practice. The curriculum provides opportunities for students to integrate knowledge from different courses in fundamental and clinical subjects to render sound clinical judgments.
