Subject Description Form

Subject Code	ABCT5103				
Subject Title	Intellectual Property Strategy for Biotech Entrepreneurship				
Credit Value	3				
Level	5				
Pre-requisite	Nil				
Co-requisite	Nil				
Exclusion	Nil				
Objectives	1. Equip students with in-depth understanding of intellectual property rights, their significance in the biotech industry, and the intricacies of patenting.				
	2. Cultivate the ability to strategically plan and manage intellectual property portfolios in a startup environment while addressing the ethical implications and controversies in biotech patenting.				
	3. Provide a holistic perspective on international patent laws and the role of IP in drug commercialization, partnerships, and biotech business models, emphasizing practical application in real-world scenarios.				
	4. Highlight evolving trends in biotech intellectual property and foster an entrepreneurial mindset, preparing students for upcoming challenges and opportunities in a rapidly changing biotech landscape.				
Intended Learning Outcomes	Upon completion of the subject, students will be able to:				
	a) demonstrate comprehensive understanding of intellectual property rights, their significance in biotech, and the intricacies of patenting.				
	b) apply effective IP strategies for biotech startups, considering ethical dimensions and real-world scenarios.				
	c) analyze the role of international patent laws in biotech and evaluate IP's impact on drug commercialization, partnerships, and business models.				
	d) anticipate evolving biotech IP trends and showcase an entrepreneurial mindset prepared for upcoming industry challenges.				

Subject Synopsis/	1. Foundations of Intellectual Property (IP)					
Indicative Syllabus	Overview of IP rights: patents, copyrights, trademarks, trade secretsPhilosophical and economic rationales behind IP					
	2. Patenting in Biotechnology					
	- Anatomy of a patent and patent document essentials					
	- The patent application process, including provisional and non-provisional patents					
	3. Strategic IP Management in Biotech Startups					
	- Importance of a robust IP portfolio for startups					
	- Licensing, tech transfer, and IP monetization strategies					
	4. Ethical and Controversial Aspects of Biotech Patenting					
	- Patenting life: genes, organisms, and biologics					
	- Regional and global variations in biotech patent laws					
	5. International Patenting: The Patent Cooperation Treaty (PCT)					
	- Overview and advantages of the PCT system for biotech startups					
	- Navigating international patent enforcement challenges					
	6. Commercial Aspects of Biotech IP					
	- Role of IP in drug development and commercialization					
	- Strategic partnerships, mergers, and acquisitions in biotech					
	7. IP Litigation and Disputes in Biotech					
	- Common causes and case studies of biotech patent disputes					
	- Strategies for avoiding and navigating IP litigation					
	8. Business Models and IP Strategy in Biotech					
	- Key components of a biotech business model and its intersection with IP					
	- Case studies of successful business models in biotech startups					
	9. Future Trends in Biotech IP					
	- Evolving landscapes: CRISPR, AI, personalized medicine					
	- Anticipating and navigating future challenges and opportunities in biotech IP					
Teaching/Learning	Lectures, Tutorials, Assignments, Presentation.					
Methodology	1. In-class participation – Students are expected to attend the classes and					
	participate in the in-class activities including discussion and quizzes.					
	2. Written Assignments – Students will be tasked with drafting essays on					
	selected topics related to intellectual property strategies in biotech startups.					
	These essays will be assessed based on the depth of understanding of the					
	topic and its relevance to the biotech industry. Additionally, students are					
	expected to provide their own insights and perspectives, showcasing their					
	analytical prowess and capability to critically evaluate IP challenges and strategies in the biotech sector.					
	3. Presentation – In teaching intellectual property (IP) filing, case studies offer practical insights. Students will examine real-world scenarios, analyze					
	patent filings, and understand the strategies behind successful IP protection.					
	Interactive discussions, group projects, and role-playing exercises will					
	foster critical thinking and collaboration. This hands-on approach ensures					

	 students gain a comprehensive understanding of IP processes, enhancir their ability to navigate and contribute to the biopharmaceutical industry dynamic landscape. 4. Final Examination - Written exams assess how much students have learned about the concepts of intellectual property rights and their significance the biotech industry. 							
Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% (weighting)	Intended subject learning outcomes to be assessed (Please tick as appropriate)					
			а	b	c	d		
	1. In-class participation	10						
	2. Written Assignments	40			\checkmark			
	4. Presentation	50		\checkmark				
	Total	100 %						
	If GenAI tools are used to support their essay writings, students must declare the use of such tools and how they have been used in the assessments. It should be noted that submitting a work generated by GenAI, in part or in whole, as your own (even in paraphrased form) constitutes an act of academic dishonesty; it is no different from asking another person to write your assignment or claiming others' ideas as yours.							
Student Study Effort Expected	Class contact:							
	 Lecture 	26 Hrs.						
	 Tutorial 	13 Hrs.						
	Other student study effort:							
	 Assignment 				15 Hrs.			
	 Self study 				63 Hrs.			
	Total student study effort				117 Hrs
