

Subject Description Form

Subject Code	ABCT5104
Subject Title	Regulatory Science for Biotech Products
Credit Value	3
Level	5
Pre-requisite	Nil
Co-requisite	Nil
Exclusion	Nil
Objectives	<ol style="list-style-type: none"> 1. To provide Quality by Design training 2. To provide GMP regulatory science training using module-based approach. 3. To train students to operate independently according to GMP compliance
Intended Learning Outcomes	<p>Upon completion of the subject, students will be able to:</p> <ol style="list-style-type: none"> a) acquire knowledge of GLP and GMP requirements. b) plan and execute GLP and GMP to fulfil the requirements of the regulatory bodies c) understand FDA requirements.
Subject Synopsis/ Indicative Syllabus	<ol style="list-style-type: none"> 1. Site Master Plan and Manufacturing Facility Layout Proposal and review (4 hours) <ul style="list-style-type: none"> - Site Master Plan and Manufacturing Facilities Layout (conceptual and basic) proposal according to the company's scopes and needs - Review and consult the company existing layout and/or provide PCM service - Lecture and training for the company staff about the basic GMP manufacturing facility maintenance. 2. GLP training (4 hours) <ul style="list-style-type: none"> - GLP concept - Establishing and implementing GLP QC lab (sterility lab, EM, chemical and microbiology lab) 3. GMP training (8 hours) <ul style="list-style-type: none"> - GMP concept - Review the current status of the company GMP compliance. 4. Quality Management System (8 hours) <ul style="list-style-type: none"> - Establishing site master file, Quality Manual, Site Quality Committee, validation process - Train and implement 6 quality systems (template and case studies) 5. Facility Management System (4 hours) <ul style="list-style-type: none"> - Establishing the basic manufacturing logistic systems and production schedule for warehouse.

	<p>-Facility chemical/biological safety manual</p> <p>6. Project Management system (4 hours)</p> <ul style="list-style-type: none"> - Basic concept (TCQ/R) of PM for biotechnology - Project monitoring, risk assessment and tools to manage the projects <p>7. Bioprocess Development Management system (4 hours)</p> <ul style="list-style-type: none"> - ICH guidelines and FDA requirements for bioprocess development in the CMC sections - Concept of DoE, Process Analytical Technology (PAT), Process Critical attributes such as PCR and FEMER <p>8. Product Characterizations Management system (3 hours)</p> <ul style="list-style-type: none"> - ICH guidelines and FDA requirements for product characterizations in the CMC sections - Concept of Bioanalytical Technology 				
<p>Teaching/Learning Methodology</p>	<p>Lectures, Mid-term, Written Assignment, Examination</p> <ol style="list-style-type: none"> 1. Attendance – Students are expected to attend at least 80% of both the lecture and tutorial classes. 2. Quiz – short quizzes will be conducted throughout the course to test their understanding of specific topics. The quizzes will be a mix of multiple-choice questions, short answers, and scenario-based problems. 3. Written Assignments – Students will be asked to write an essay on a selected topic. They will be assessed on their understanding of the topic's content. In their essays, students must also express their own opinions to demonstrate their problem-solving skills and critical thinking abilities. 4. Final Examination - Written exams assess how much students have learned about the concepts of GLP and GMP, as well as how they can be achieved in industrial settings. 				
<p>Assessment Methods in Alignment with Intended Learning Outcomes</p>	<p>Specific assessment methods/tasks</p>	<p>% (weighting)</p>	<p>Intended subject learning outcomes to be assessed (Please tick as appropriate)</p>

<p>2. Quiz</p>	<p>25</p>	<p>√</p>	<p>√</p>	<p>√</p>	
<p>3. Written Assignments</p>	<p>20</p>	<p>√</p>	<p>√</p>	<p>√</p>	
<p>4. Final Examination</p>	<p>45</p>	<p>√</p>	<p>√</p>	<p>√</p>	
<p>Total</p>	<p>100 %</p>				

	<p>Students are allowed to use GenAI tools to support their writing of and essays. If GenAI tools are used to support their essay writings, students must declare the use of such tools and how they have been used in the assessments. It should be noted that submitting a work generated by GenAI, in part or in whole, as your own (even in paraphrased form) constitutes an act of academic dishonesty; it is no different from asking another person to write your assignment or claiming others' ideas as yours.</p>	
Student Study Effort Expected	Class contact:	
	▪ Lecture	26 Hrs.
	▪ Tutorial	13 Hrs.
	Other student study effort:	
	▪ Assignment	15 Hrs.
	▪ Self study	63 Hrs.
	Total student study effort	117 Hrs
