Studying Shanghai's Economical Development On The Basis Of Economical Periods

Fenggu Dong (SHUFE)

Abstract On the basis of domestic and foreign research results about the economical periods, according to the databases of the monthly economical data of Shanghai, using the traditional economical boom analyzing methods, We make Shanghai's economical boom indexes, which describe the fluctuation characteristics of Shanghai's economical periods. Using time series tools in econometrics, we analyze the typical cases of the fluctuations in Shanghai's economy, probe into the impact of the invest, finance and currency policies against the Shanghai's economical fluctuations. And thus we sum up out the inner mechanism of the Shanghai's economical fluctuations.

Analysis on the Macro-economic Situation in China

Jianmin Dou (SHUFE)

Abstract Through analyzing the current economic situation in China, the report pointed out the change of structural price rise towards obvious inflation should mainly be prevented. To achieve this goal, the change of the economy growing quickly towards superheat should be prevented. The report emphatically analyzes the origin and influence of the inflation, governing countermeasures of inflation, as well as the current macro-economic policy goals in China.
