

Subject Description Form

Subject Code	AMA2511
Subject Title	Applied Mathematics I
Credit Value	2
Level	2
Pre-requisite	Calculus I (AMA1101) or Calculus IA (AMA1102) or Basic Mathematics II –Calculus and Linear algebra (AMA1120)
Co-requisite/ Exclusion	Exclusion: Intermediate Calculus and Linear Algebra (AMA2007), Mathematics I (AMA2111)
Objectives	This subject aims to introduce students to some fundamental knowledge of engineering mathematics. Emphasis will be on the understanding of fundamental concepts as well as applications of mathematical methods in solving practical problems in science and engineering.
Intended Learning Outcomes	Upon completion of the subject, students will be able to: (a) apply mathematical reasoning to analyze essential features of different problems in their discipline; (b) extend their knowledge of mathematical and numerical techniques and adapt known solutions in various situations; (c) develop and extrapolate the mathematical concepts in synthesizing and solving new problems (d) demonstrate abilities of logical and analytical thinking.
Subject Synopsis/ Indicative Syllabus	<i>Complex Numbers:</i> Algebra and geometry of complex numbers; polar form; DeMoivre's theorem; roots of a complex number. <i>Ordinary differential equations:</i> Simple ODE of first and second order; variation of parameters; applications. <i>Laplace Transform:</i> Laplace transform and inverse Laplace transform; properties of Laplace transformation with applications to solving initial value problems. <i>Series:</i> Infinite series; convergence tests; alternating series; power series; Taylor's and Maclaurin's expansion.
Teaching/Learning Methodology	The subject will be delivered mainly through lectures and tutorials. The lectures aim to deliver and to explain the concepts, theories and techniques. Tutorials will mainly be used to develop students' problem solving ability. Students are encouraged to enhance their understanding of the subject matters through self-study.

Assessment Methods in Alignment with Intended Learning Outcomes	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate)			
			a	b	c	d
	1.Homework, quizzes and mid-term test	40%	✓	✓	✓	✓
	2. Examination	60%	✓	✓	✓	✓
	Total	100 %				
<p>Continuous Assessment comprises of assignments, in-class quizzes, online quizzes and a mid-term test. An examination is held at the end of the semester.</p> <p>Questions used in assignments, quizzes, tests and examinations are used to assess students' level of understanding of the basic concepts and their ability to use mathematical techniques in solving problems in science and engineering.</p> <p>Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:</p> <p><i>The subject focuses on understanding of basic concepts and application of techniques in engineering mathematics. As such, an assessment method based mainly on examinations/tests/quizzes is considered appropriate. Furthermore, students are required to submit homework assignments regularly in order to allow subject lecturers to keep track of students' progress in the course.</i></p>						
Student Study Effort Expected	Class contact:					
	• Lecture		19 Hrs.			
	• Tutorial		7 Hrs.			
	• Mid-term test and examination		4 Hrs.			
	• Assignments and Self study		60 Hrs.			
	Total student study effort		90 Hrs.
