

**QEF eLearning Ancillary Facilities Programme  
Development & Dissemination Scheme**

**Online Briefing Session of Borderless Lab 365:  
A Student-centered Learning Science Experiment Platform  
to Enhance STEM Education**

***Introduction of Borderless Lab 365***

The Department of Applied Physics (AP) at the Hong Kong Polytechnic University has developed a student-centered experiment platform called Borderless Lab 365 for secondary and primary schools. Through the Development & Dissemination scheme of the Quality Education Fund (QEF) eLearning Ancillary Facilities Programme, AP has planned to disseminate this platform to secondary as well as primary schools. In this briefing session, we will introduce the function of this platform and how we can set up this platform in your schools.
