

PROGRAMME DOCUMENT FOR RESEARCH DEGREE PROGRAMMES

1.General Information

| | |
|-----------------------------------|--|
| Programme Title | Doctor of Philosophy (PhD)/Master of Philosophy (MPhil) in Applied Physics |
| Programme Code: | From 2018/19 cohort onwards 11601 (full-time FD/FTD/FTM) 11601 (part-time PD/PTD/PTM) Before 2018/19 cohort 88011 (full-time PhD), 88111 (part-time PhD), 88012 (full-time MPhil), 88112 (part-time MPhil) |
| Host Department | Department of Applied Physics |
| Medium of Instruction | English |
| Mode of Study | Full-time/Part-time (FT/PT) |
| Duration | 4-Year PhD FT: 48 months normal, 72 months maximum PT: 96 months normal, 108 months maximum 3-Year PhD FT: 36 months normal, 60 months maximum PT: 72 months normal, 84 months maximum 2-Year MPhil FT: 24 months normal, 36 months maximum PT: 48 months normal, 60 months maximum |
| Requirement for Graduation | In addition to English enhancement subjects, students have to complete the following Coursework Components 4-Year PhD - At least 22 credits 3-Year PhD - At least 15 credits 2-Year MPhil - At least 9 credits National Education Requirement Complete the e-learning module on “Understanding China and the Hong Kong Special Administrative Region, P.R.C.” and pass an assessment before thesis submission. Research Components A thesis and an oral examination on the thesis are required for both PhD and MPhil. |
| Final Award | M.Phil. or Ph.D. degree dependent on the enrollment |

2. Programme Structure

| | | |
|---|---|---|
| Coursework components: | <p>4-Year PhD (22 credits)</p> <p>Ethics: Research, Professional & Personal Perspectives (1 credit)</p> <p>Research Seminars III (4 credits)</p> <p>Practicum (2 credits)</p> <p>5 Elective Subjects (15 credits)</p> <p>3-Year PhD (15 credits)</p> <p>Ethics: Research, Professional & Personal Perspectives (1 credit)</p> <p>Research Seminars II (3 credits)</p> <p>Practicum (2 credits)</p> <p>3 Elective Subjects (9 credits)</p> <p>2-Year MPhil (9 credits)</p> <p>Ethics: Research, Professional & Personal Perspectives (1 credit)</p> <p>Research Seminars I (2 credits)</p> <p>2 Elective Subjects (6 credits)</p> <p>With effect from 2021/22 cohort onwards, all RPg students shall be required to take the Research Language Skills Assessment (RLSA) in their first semester of study at PolyU to be arranged by ELC. Based on their performance of the RLSA, students will need to take relevant subjects according to the following arrangement.</p> | |
| | RLSA performance¹ | <i>Required English enhancement subjects</i> |
| | Band 1 in both Writing, and Speaking tasks | exempted |
| | Band 2 or above in both Writing, and Speaking tasks | ENGL6016: <i>Advanced Academic English for Research Students: Publishing and Presenting</i> |
| | Band 3 or below in either Writing, or Speaking tasks | ELC6011 and ELC6012 ELC6011: <i>Presentation Skills for Research Students</i> ELC6012: <i>Thesis Writing for Research Students</i> |
| <p>Note 1: Band 1 is the highest grade and Band 5 the lowest.</p> <p>Before thesis submission, students are required to take and pass the above English enhancement subjects.</p> | | |

| Training Component | <p>With effect from 2021/22 cohort onwards, stipend recipients shall receive certain training as assigned by the HoD/DoS in consultation with the Supervisor(s) in his/her department <u>for not less than 100 hours per year</u> for teaching and professional service.</p> <p>Stipend recipients are required to report the teaching and service training in annual progress reports.</p> | | | | |
|-------------------------------------|--|----------------|-------------|------------------|---|
| National Education Component | <p>With effect from 2022/23 cohort onwards, all RPg students shall be required to complete the e-learning module on “Understanding China and the Hong Kong Special Administrative Region, P.R.C.” and pass an assessment before thesis submission as a graduation requirement.</p> <p>Students could access the e-Learning module via Learn@PolyU. The course ID for research postgraduate students is listed below.</p> <table border="1" data-bbox="507 797 1401 954"> <thead> <tr> <th>Course ID code</th><th>Course Name</th></tr> </thead> <tbody> <tr> <td>UCHKSAR_RPg_2022</td><td>Understanding China and the Hong Kong Special Administrative Region, P.R.C. (RPg)</td></tr> </tbody> </table> | Course ID code | Course Name | UCHKSAR_RPg_2022 | Understanding China and the Hong Kong Special Administrative Region, P.R.C. (RPg) |
| Course ID code | Course Name | | | | |
| UCHKSAR_RPg_2022 | Understanding China and the Hong Kong Special Administrative Region, P.R.C. (RPg) | | | | |
| Research components: | <p>Students are required to submit a thesis when their study is completed. The thesis should summarize the findings of the student’s original and independent research.</p> <p>An oral examination on the submitted thesis is required for the student. The oral examination comprises the following parts where the sequence is to be determined by individual board of examiners (BoE):</p> <ul style="list-style-type: none"> • A closed session in which the BoE holds a preliminary discussion in the student’s absence. • A full oral presentation by the student to the BoE and others in attendance. • An open question period, involving the members of the BoE and others in attendance. Questions from the floor must be addressed through the Chair of the BoE, who will exercise discretion on the appropriateness of a question to be put forward to the examinee. • A session involving further discussion between the student and the BoE. • A closed session, in which the BoE assesses the thesis and the student’s performance in the student’s absence. • A closed session, in which the BoE informs the student of the BoE’s recommendations. | | | | |

3.The Rationale, Aims and Intended Learning Outcome of the Programme

| University Overarching Aims of Research Degree Programmes | Intended Learning Outcomes of M.Phil. and Ph.D. Programmes* |
|--|--|
| <p>The research degree programmes are designed in such a way to enable the student to:</p> <ul style="list-style-type: none"> a. acquire competence in research methods and scholarship; and b. display sustained independent effort and independent original thought. <p>The PhD programmes should target to produce academics or industrial R & D professionals.</p> | <p>Upon completion of the programmes, Ph.D. and M.Phil. students will be able to</p> <ul style="list-style-type: none"> a1. solve theoretical and experimental problems of the related research field of studies with the previous accumulated knowledge and problem solving skills, a2. communicate clearly and effectively in English, excel in report writing and presentation skill, a3. collaborate smoothly with others in team work, demonstrate a sense of responsibility, accountability, leadership and team spirit, b1. develop capability of independent thinking, and c1. possess a desire for life-long learning and self-learning. <p>In addition to the above learning outcomes (a1-a3,b1 and c1), PhD students are also expected to be able to</p> <ul style="list-style-type: none"> a4. Have more in-depth understanding on the knowledge of the research subjects and expected to have stronger publication record. b2. Expected to discover new problems and formulate the problems to analyze, evaluate, synthesize and propose solutions to problems of a general nature with innovative/creative ideas where appropriate. c2. Can develop a future career in their field of professions making use of their depth foundation built in the study as academics, researchers or industrial R&D professionals. |

4.The Curriculum

M.Phil /Ph.D. in Applied Physics

| Stage/ Semester | Subject Code | Subject | Credit | Compulsory/ Elective | Pre- requisite | Remarks |
|--------------------|--------------------|--|--------|-------------------------|-------------------|--|
| 1/1 | HTI6081 | Ethics: Research, Professional & Personal Perspectives | 1 | C | None | |
| All | AP601(A/B) | Research Seminars I | 1 | C | None | Students are recommended to complete one credit per year (for full-time students) or per two years (for part-time students) to fulfil the above- mentioned requirement, with an overall assessment grade of Pass and Fail. However, as deemed appropriate by the Chief Supervisor, they are allowed to complete at most two credits per year (for full-time students) or per two years (for part-time students) to fulfil the research seminar credit requirement. |
| All | AP602(A/B/C) | Research Seminars II | 1 | C | None | |
| All | AP603 (A/B/C/D) | Research Seminars III | 1 | C | None | |
| D | AP605 | Practicum | 2 | C | None | <p>Students are allowed to complete these two credits any time before they graduate. They can choose to complete these two credits in two different semesters or within the same semester, subject to the approval of the Chief Supervisor. Stipend recipients are <u>not</u> allowed to fulfill part of their departmental training requirement through the completion of the Practicum credits as Practicum is credit-bearing and part of the coursework requirements.</p> <p>For students who are required to undertake teaching supporting activities, they should be required to complete the training programmes organised by the EDC and ELC before the commencement of any teaching supporting activities.</p> |
| D | AP616 | Smart Materials and Structures | 3 | E | None | |
| D | AP617 | Advanced Instrumentation for | 3 | E | None | |

| | | | | | | |
|---|--------|--|---|---|---|---|
| | | Materials Analysis | | | | |
| D | AP618 | Science and Technology of Micro- and Nano-systems | 3 | E | None | |
| D | AP619 | Microfabrication Laboratory | 3 | E | None | |
| D | AP620 | Atomistic View of Matter: Modeling & Simulation | 3 | E | None | |
| D | AP621 | Advanced Electron Microscopy: Theory and Practice | 3 | E | None | |
| D | AP622 | Emerging Memory Technologies | 3 | E | AP20012, AP30011, AP40006 or equivalent | |
| D | AP6912 | Guided Study in Polymer Electronics | 3 | E | None | For the number of guided study subjects that can be taken, no more than 9 credits for 4-year full-time PhD/8-year part-time PhD, no more than 6 credits for 3-year full-time PhD/6-year part-time PhD, and no more than 3 credits for 2-year full-time MPhil/4-year part-time MPhil, are allowed. |
| D | AP6913 | Guided Study in Optical Properties of Luminescent Materials | 3 | E | None | |
| D | AP6914 | Guided Study in Ferroelectric Materials | 3 | E | None | |
| D | AP6915 | Guided Study on Research Topics in Applied Physics | 3 | E | None | |

| | | | | | | |
|---|----------|--|---|---|---------|---|
| D | ELC6011 | Presentation Skills for Research Students | 2 | C | None | Before thesis submission, students are required to take and pass this English enhancement subjects. |
| D | ELC6012 | Thesis Writing for Research Students | 3 | C | ELC6011 | |
| D | ENGL6016 | Advanced Academic English for Research Students: Publishing and Presenting | 3 | C | None | |

D – dependent on the arrangement from offering department.

Elective subjects (E) offered by other departments/universities

For PhD or MPhil students who find difficulty in taking the suggested elective courses from the curriculum, they could propose other available research postgraduate subjects offered by other departments/universities as their elective courses but subject to approval from DRC.

Curriculum Map

The curriculum map gives a holistic view of the programme to which each intended learning outcome will be taught and assessed in the programme (see “The Rationale, Aims and Intended Learning Outcome of the Programme” section). The corresponding curriculum map is given in the Appendix - **Attachment II**.

5.Summary of the Subject Information

| Subject Code | Subject Name | Credit | Pre-requisite | Teaching Methods | Assessment Methods |
|---------------------|---|---------------|---|-----------------------------------|---------------------------------------|
| HTI6081 | Ethics: Research, Professional & Personal Perspectives | 1 | None | Lecture/seminar/ workshop | Report /presentation |
| AP601 (A/B) | Research Seminars I | 1 | None | seminar/ workshop/ conference | Attendance/ report |
| AP602 (A/B/C) | Research Seminars II | 1 | None | seminar/ workshop/ conference | Attendance/ report |
| AP603 (A/B/C/D) | Research Seminars III | 1 | None | seminar/ workshop/ conference | Attendance/ report |
| AP605 | Practicum | 2 | None | Lecture and Hands-on experiments | SFQ, HoD/DoS/delegate review |
| AP616 | Smart Materials and Structures | 3 | None | Lecture and Hands-on experiments | Continuous assessment and examination |
| AP617 | Advanced Instrumentation for Materials Analysis | 3 | None | Lecture and Hands-on experiments | Continuous assessment and examination |
| AP618 | Science and Technology of Micro- and Nano-systems | 3 | None | Lecture and Hands-on experiments | Continuous assessment and examination |
| AP619 | Microfabrication Laboratory | 3 | None | Lecture and Hands-on experiments | Continuous assessment and Test |
| AP620 | Atomistic View of Matter: Modeling & Simulation | 3 | None | Lecture and Hands-on experiments | Continuous assessment and examination |
| AP621 | Advanced Electron Microscopy: Theory and Practice | 3 | None | Lecture and Hands-on experiments | Continuous assessment and examination |
| AP622 | Emerging Memory Technologies | 3 | AP20012, AP30011, AP40006 or equivalent | Lecture and Hands on experiments | Continuous assessment and Project |
| AP6912 | Guided Study in Polymer Electronics | 3 | None | Personal supervision and training | Report |
| AP6913 | Guided Study in Optical Properties of Luminescent Materials | 3 | None | Personal supervision and training | Report |

| | | | | | |
|----------|--|---|---------|------------------------------------|--|
| AP6914 | Guided Study in Ferroelectric Materials | 3 | None | Personal supervision and training | Report |
| AP6915 | Guided Study on Research Topics in Applied Physics | 3 | None | Personal supervision and training | Report |
| ELC6011 | Presentation Skills for Research Students | 2 | None | Seminar | Continuous assessment |
| ELC6012 | Thesis Writing for Research Students | 3 | ELC6011 | Seminar | Continuous assessment |
| ENGL6016 | Advanced Academic English for Research Students: Publishing and Presenting | 3 | None | Lecture and interactive activities | Class Participation/ Individual Presentation/ Term Paper |

The detailed Subject Description Forms of all subjects are given in the Appendix.

6. Terms and Conditions

This Programme Document is subject to review and changes which the programme offering Faculty/Department/School can decide to make from time to time. Students will be informed of the changes as and when appropriate.

This Document should be read together with the “Regulations and Administrative Procedures for the Degrees of MPhil and PhD” and the “Research Student Handbook”.

Subject Description Form

| | |
|---|--|
| Subject Code | HTI6081 |
| Subject Title | Ethics: Research, Professional & Personal Perspectives |
| Credit Value | 1 |
| Level | 6 |
| Pre-requisite / Co-requisite/ Exclusion | None |
| Objective | <ul style="list-style-type: none"> • To equip students with a deep appreciation of ethical guidelines and codes of conduct that they can apply in their research studies at PolyU and in their future professional and personal lives. |
| Intended Learning Outcomes <i>(Note 1)</i> | <p>On successful completion of this subject, students will be able to:</p> <ol style="list-style-type: none"> 1. Demonstrate knowledge and understanding of the need for ethical behavior and guiding codes of ethics in research and the professions. 2. Understand, discuss and apply ethical principles and codes across a range of disciplines and scenarios 3. Demonstrate awareness of current ethical issues and problems in relation to their own discipline and research area 4. Critically analyze and discuss scenarios cases of possible or actual ethical misconduct 5. Discuss how the guiding principles of ethics in research extend and apply to business, professional and personal codes of conduct and why this important to integrity and the well being of business, the professions and our community. 6. Show a fundamental understanding of the issues of copyright, plagiarism and proper citation, and be able to apply this in their own work. |
| Subject Synopsis/ Indicative Syllabus <i>(Note 2)</i> | <ul style="list-style-type: none"> • The need for ethics training and the meaning of ethical behavior in research: case studies, disasters and learning by the mistakes of others • Philosophy and codes of ethics and their origins • Culture, religion and the law – how these relate to ethical codes of conduct • Obtaining ethical approval for a research project: procedures and processes • Ethics in life science, humanities, education, business and industry: common issues, guiding principles, discipline specific scenarios • Ethics and human behavior: individual, professional and societal responsibilities • Recent ethical issues affecting Hong Kong and the society in general • Ethical use of information in thesis writing: understanding copyright, plagiarism and proper citation |

| Teaching/Learning Methodology (Note 3) | Lecture/seminar/workshop | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| | Selected readings and videos |
| | Declaration of Helsinki (revised 2008) |

Note 1: Intended Learning Outcomes

Intended learning outcomes should state what students should be able to do or attain upon completion of the subject. Subject outcomes are expected to contribute to the attainment of the overall programme outcomes.

Note 2: Subject Synopsis/ Indicative Syllabus

The syllabus should adequately address the intended learning outcomes. At the same time over-crowding of the syllabus should be avoided.

Note 3: Teaching/Learning Methodology

This section should include a brief description of the teaching and learning methods to be employed to facilitate learning, and a justification of how the methods are aligned with the intended learning outcomes of the subject.

Note 4: Assessment Method

This section should include the assessment method(s) to be used and its relative weighting, and indicate which of the subject intended learning outcomes that each method purports to assess. It should also provide a brief explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes.

The Hong Kong Polytechnic University

Subject Description Form

| | |
|--|--|
| Subject Code | AP601 (A/B) |
| Subject Title | Research seminars I |
| Credit Value | 1 |
| Level | 6 |
| Pre-requisite / Co-requisite/ Exclusion | None |
| Objectives | <p>The main objectives of this series of research seminars/workshops are to</p> <ul style="list-style-type: none"> • provide an opportunity for our research students and research staff to present the latest results of their research achievement to their peers, • bring together research students, research staff, and professors within AP department to exchange and share knowledge and experience on various aspects of scientific research, • provide an in-depth analysis and study of specific research topics and update the knowledge of recent development in the related research communities, and to • invite local and oversea research scientists/professors to present their recent advancement and/or to explain their view in the future development of research areas of excellent. <p>Hence, this series of research seminars/workshops will</p> <ul style="list-style-type: none"> • bring together research students, research staff, academicians and experts to exchange and share knowledge and experience on various aspects of scientific research with the invited speakers, and • improve our connection and visibility to the research communities. |
| Intended Learning Outcomes | <p>Upon completion of the research seminars /workshops, students will be able to:</p> <ul style="list-style-type: none"> • achieve instant critical thinking – analysis and evaluation of assumption, claims, evidence, and arguments during the short period of discussion as well as raise questions. • improve information literacy – develop capability to distinguish different kinds of information sources, composing search strategies, and retrieving useful and relevant information. • refine communication skill – demonstrate the capability in written and spoken (English as a medium) to present and discuss research information within the scientific community and society. • establish networking – get to know researchers and scientists in their field of studies. |
| Subject Synopsis/ Indicative Syllabus | <ul style="list-style-type: none"> • Nanomaterials included 2D materials • Photonic Materials and Devices • Smart Materials and Devices • Theoretical and Computational Physics |

| | | | | | | | | |
|---|---|-------------|--|---|---|---------|--|--|
| Teaching/Learning Methodology | In order to stimulate and motivate the students’ interest in the seminar/workshop participation, the hottest and latest advancement research topics will be presented. This will lead to the students’ further exploration of potential novel research directions and studies as well as stimulate the students’ creative thinking. | | | | | | | |
| Assessment Methods in Alignment with Intended Learning Outcomes (per year) | Specific assessment methods/tasks | % weighting | Intended subject learning outcomes to be assessed (Please tick as appropriate) | | | | | |
| | | | a | b | c | | | |
| | 1. Attendance in 10 research seminars | 40 | ✓ | | | | | |
| | 2. Submission of one technical report on one of the research seminars | 30 | | | ✓ | | | |
| | 3. Presentation | 30 | | ✓ | | | | |
| | Total | 100 | | | | | | |
| | a) Attendance in research seminars/workshops, b) language proficiency, c) writing skill for technical report. The overall assessment grade is of Pass or Fail. | | | | | | | |
| Student Study Effort Expected (per year) | Contact: | | | | | | | |
| | ▪ Seminar attendance | | | | | 20 Hrs. | | |
| | ▪ Present at seminar/workshop/conference | | | | | 2 Hrs. | | |

Subject Description Form

| | |
|---|---|
| Subject Code | AP620 |
| Subject Title | Atomistic View of Matter: Modeling & Simulation |
| Credit Value | 3 |
| Level | 6 |
| Pre-requisite/ Co-requisite/ Exclusion | Nil |
| Objectives | This course will teach the physics that governs materials at the atomic scale and relate these processes to the macroscopic world. |
| Intended Learning Outcomes | <p>Upon completion of the subject, students will be able to:</p> <ul style="list-style-type: none"> a) design, perform and analyze computer experiments using electronic and atomistic simulation techniques appropriate for the problem at hand; b) extract materials properties from the simulations; c) recognize the approximations and estimate the level of accuracy to be expected from each modeling technique, and d) critically read the current scientific literature on computational modeling and simulation of materials. |
| Subject Synopsis/ Indicative Syllabus | <p>The quantum mechanics of bonding: Atoms, molecules, molecular orbital theory, linear combination of atomic orbitals, variational principle</p> <p>Electronic structure calculations: Hartree, Hartree-Fock, post-Hartree-Fock, density functional theory and beyond, Koopmans theorem, modeling crystals</p> <p>Molecular dynamics simulations: Numerical integrators, neighbor list, spatial decomposition, interatomic potentials, parameterization, mean square displacement, auto-correlation, nudged elastic band</p> <p>Classical and statistical mechanics: thermodynamical ensembles, Boltzmann equation, equipartition energy, fluctuations, normal modes analysis, phonons, harmonic oscillator, specific heat, thermostats, barostats</p> <p>Advanced techniques: coarse grain simulations, atomistic electrochemistry, multi-scale modeling</p> |
| Teaching/Learning Methodology | <p>The course will make extensive use of cloud computing to enhance the learning using nanoHUB.org as well as its features for collaboration and publishing. Students will perform <i>ab initio</i> calculations using density functional theory and other advanced techniques as well as molecular dynamics simulations.</p> <p>Lecture: The concepts will be presented in class including some illustrative</p> |

| | | | | | | |
|--|---|-------------|--|----------|---|---|
| | examples and live simulations. Homework assignments will be provided periodically for the students to apply the concepts developed in class and to solve problems of current research. | | | | | |
| | Computer laboratory: During laboratory sessions, students will perform atomistic simulations individually or in groups to gain a deeper understanding of topics related to the lectures. These sessions aim at developing the students’ intuition and critical thinking upon discussion and exchange of ideas in order to engage in the proposed activities. | | | | | |
| Assessment Methods in Alignment with Intended Learning Outcomes | Specific assessment methods/tasks | % weighting | Intended subject learning outcomes to be assessed (Please tick as appropriate) | | | |

| Objectives | The aim of this subject is to introduce concepts of electron microscopy and develop the ability of students to use the electron microscopes for material characterizations. |
| Intended Learning Outcomes | <p>Upon completion of the subject, students will be able to:</p> <ul style="list-style-type: none"> a) Understand the fundamental theory of electron optics b) Understand the working principles of transmission electron microscopy(TEM) and scanning electron microscopy(SEM) c) Identify the functions of analytical TEM d) Master the practical skills of TEM and SEM operations e) Select appropriate methods for particular purposes of real material characterizations |
| Subject Synopsis/ Indicative Syllabus | <p>Electron Optics: Fresnel diffraction; Fraunhofer diffraction; Fourier transform; Phase Contrast; Resolution; Aberration; Kinematic diffraction; Dynamical diffraction; Electron wave in crystals</p> <p>SEM: Secondary electron; Contrast; Resolution; Backscattered electron; EBSD; LEEM</p> <p>TEM: TEM compositions; Diffraction; Imaging; Spectroscopy</p> <p>Techniques for TEM and case study: HRTEM; SAED; CBED; Diffraction contrast; STEM; Lorentz Microscopy; Holography; EDS; EELS; in situ TEMs</p> |
| Teaching/Learning Methodology | <p>Lecture: Basic theory and knowledge behind all experiments will be systematically introduced in lectures. Class work and assignments related to the content of lectures will be used to enhance students learning.</p> <p>Laboratory session: Experiments are essential for students to relate the concepts to practical applications and they are exposed to hand-on experience and proper use of equipment and also analytical skills on interpreting experimental results.</p> |

| | | | | | | | | |

The Hong Kong Polytechnic University

Subject Description Form

| | |
|--|--|
| Subject Code | AP622 |
| Subject Title | Emerging Memory Technologies |
| Credit Value | 3 |
| Level | 6 |
| Pre-requisite/ Co-requisite/ Exclusion | Undergraduate-level courses about electronic circuits, solid-state physics and semiconductor physics are required, e.g., AP20012, AP30011 and AP40006 |
| Objectives | The objective of this subject is to introduce concepts of the memory sub-system from the device cell structures to the array and architecture design with emphasis on the industry trend and cutting-edge technologies. The concept of memory hierarchy is used as an outline through the whole course. The in-memory computing and in-sensor computing for artificial intelligence will be also covered. |
| Intended Learning Outcomes | <p>Upon completion of the subject, students will be able to:</p> <ul style="list-style-type: none"> (a) Understand the working principles of conventional charge-based memory technology (b) Understand the working principles of emerging non-charge-based memory technology (c) Understand the fundamentals of in-memory computing and in-sensor computing (d) Understand the working principles of cross-point memory array for artificial neural network (e) Experimentally carry out the micro-fabrication and characterization of emerging memory using the facilities inside cleanroom |
| Subject Synopsis/ Indicative Syllabus | <p>Charge-based memory technology: Static Random Access Memory, Dynamic Random Access Memory, Flash Memory, etc</p> <p>Non-charge-based memory technology: Resistive switching memory, phase-change memory, magnetic memory, etc</p> <p>In-memory computing and in-sensor computing: the principles of multiplication and accumulation</p> <p>Cross-point memory array for artificial neural network</p> |
| Teaching/Learning Methodology | Lecture: Basic theory and knowledge will be systematically introduced in lectures. Class work and assignments related to the content of lectures will be used to enhance students learning. |

| | | | | | | | |
|--|--|-------------|---|---|---|---|---|
| Assessment Methods in Alignment with Intended Learning Outcomes | Specific assessment methods/tasks | % weighting | Intended subject learning outcomes to be assessed (Please tick as appropriate) | | | | |
| | | | a | b | c | d | e |
| | (1) Continuous assessment | 50 | √ | √ | √ | √ | √ |
| | (2) Project | 50 | √ | √ | √ | √ | √ |
| | Total | 100 | | | | | |
| | <p>Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:</p> <p>Assignments will strengthen the students' basic knowledge and the analytical skills to solve the problems related to this subject. The course is a cutting edge technology-oriented course, thus the students are expected to actively read the related literature as part of the learning process. Hence, the proposed assessment methods are necessary to assess the intended learning outcomes.</p> <p>Students should have gained the basic knowledge of a) charge-based memory technology and b) non-charge-based memory technology; c) have a thorough understanding of in-memory and in-sensor computing; and d) be able to understand the working principle of memory array for artificial neural network.</p> | | | | | | |

|--|---|
| Subject Code | ELC6011 |
| Subject Title | Presentation Skills for Research Students |
| Credit Value | 2 |
| Level | 6 |
| Pre-requisite/ Co-requisite/ Exclusion | Nil |
| Objectives | This subject is designed to improve research students' academic speaking proficiency, enhance their awareness of academic conventions during an academic discussion/presentation, and develop their skills in using clear, appropriate, persuasive and analytical language for their delivery of effective academic presentations. |
| Intended Learning Outcomes (Note 1) | Upon completion of the subject, students will be able to: <ul style="list-style-type: none"> a. organise academic presentations logically by following academic conventions b. present research contribution by critically analysing previous research; c. use clear, appropriate, persuasive and analytic language for presentations at seminars, conferences and viva: and d. defend research logically, critically, and persuasively. |
| Subject Synopsis/ Indicative Syllabus (Note 2) | <ol style="list-style-type: none"> 1. Critical analysis of prior research Understanding academic presentation process and the structure; identifying language features appropriate for academic speaking settings. 2. Awareness of academic conventions Developing awareness of citation practices, and language use adopted in the related disciplines. 3. Inter and intra section connections Using effective signpost language to organize and connect different parts of an academic presentation. 4. Clear, appropriate, persuasive, and analytical language use Summarising, evaluating, and citing sources; describing and discussing research data; objectively evaluating research contribution. |

Note 1: Intended Learning Outcomes

Intended learning outcomes should state what students should be able to do or attain upon subject completion. Subject outcomes are expected to contribute to the attainment of the overall programme outcomes.

Note 2: Subject Synopsis/Indicative Syllabus

The syllabus should adequately address the intended learning outcomes. At the same time, overcrowding of the syllabus should be avoided.

Note 3: Teaching/Learning Methodology

This section should include a brief description of the teaching and learning methods to be employed to facilitate learning, and a justification of how the methods are aligned with the intended learning outcomes of the subject.

Note 4: Assessment Method

This section should include the assessment method(s) to be used and its relative weighting, and indicate which of the subject intended learning outcomes that each method is intended to assess. It should also provide a brief explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes.

| Subject Code | ELC6012 |
| Subject Title | Thesis Writing for Research Students |
| Credit Value | 3 |
| Level | 6 |
| Pre-requisite/ Co-requisite/ Exclusion | ELC6011 |
| Objectives | This subject aims to improve research students' academic writing proficiency, enhance their understanding of the academic audience, develop their awareness of academic conventions, and develop their skills in using clear, appropriate, persuasive, and analytical language in thesis writing. |
| Intended Learning Outcomes (Note 1) | <p>Upon completion of the subject, students will be able to present their research effectively in a thesis through:</p> <ol style="list-style-type: none"> presenting the study clearly, appropriately and concisely in the Abstract; providing the Introduction analytically; reviewing the literature critically; analysing the appropriateness of the methodology used in the study; reporting and discussing the findings of the study; and discussing the significance of the study in the Conclusion. <p>To achieve the above outcomes, students are expected to use language, text structures, and cohesive devices appropriate to the academic audience, select and present information analytically, concisely and appropriately, examine and cite sources critically, and analyse the impact and significance of the research persuasively.</p> |
| Subject Synopsis/ Indicative Syllabus (Note 2) | <ol style="list-style-type: none"> Critical analysis of prior research Understanding research thesis writing process and the structure of a thesis; identifying language features of thesis writing. Awareness of academic conventions Developing awareness of citation practices, referencing format and language use adopted in the related disciplines. Inter and intra paragraphing connections Using effective cohesive devices to plan, organize and connect different parts of a research thesis. |

| | <p>4. Clear, appropriate, persuasive and analytical language use</p> <p>Summarising, evaluating and citing sources; describing and discussing research data; objectively evaluating research contribution; writing, revising, and proofreading written texts.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| <p>Teaching/Learning Methodology</p> <p>(Note 3)</p> | <p>The study method is primarily seminar-based. Activities include teacher input as well as individual and group work involving writing practice, evaluation of texts, mini-presentations and discussions. Practical work will involve analysing texts such as journal articles and research theses that are relevant to students’ research areas. Students will be provided with opportunities to apply the language skills acquired to the preparation of their own thesis. Students will be referred to information on the Internet and the ELC’s Centre for Independent Language Learning.</p> <p>Learning materials developed by the English Language Centre are used throughout this course. Additional reference materials will be recommended as required.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| Level | 6 |
| Pre-requisite/ Co-requisite/ Exclusion | None |
| Objectives | <p>The objective of the subject is to enable research postgraduate students to publish successfully in international journals and deliver effective conference presentations. This is achieved by equipping students with the essential English language skills and linguistic knowledge to effectively communicate the background, rationale, findings, and significance of their research. Students will be guided systematically to (1) improve their academic English; (2) acquire and apply knowledge of the generic and linguistic features of conference presentations and research articles; and (3) increase the persuasiveness of their spoken and written discourse. The primary focus will be on writing research articles.</p> |
| Intended Learning Outcomes <i>(Note 1)</i> | <p>Upon completion of the subject, students will be able to:</p> <ol style="list-style-type: none"> a. Be familiar with the differences between spoken and written academic English; b. Analyze and apply generic structures and linguistic features in research writing; c. Write research articles in clear, accurate and appropriate English; d. Prepare articles for publication in light of comments from editors and reviewers; e. Structure and deliver clear and persuasive presentations in English. |
| Subject Synopsis/ Indicative Syllabus <i>(Note 2)</i> | <p>Part 1 – Publishing in international journals: (2/3)</p> <ul style="list-style-type: none"> ▪ Interacting with readers; ▪ Writing effective introductions and literature reviews; ▪ Describing research methods; ▪ Discussing the implications and significance of the findings; ▪ Drawing conclusions; ▪ Writing abstracts; and ▪ Addressing editors' and reviewers' comments. <p>Part 2 – Delivering an effective conference presentation: (1/3)</p> <ul style="list-style-type: none"> ▪ Structuring and delivering conference presentations in clear and appropriate academic English; ▪ Interacting with an audience and responding to questions. |

| Teaching/Learning Methodology <i>(Note 3)</i> | <p>A learner-centered and highly interactive mode of teaching will be adopted. Students will engage in activities where they can share their experience and concerns, put forth their own thinking and comment on each other’s research ideas, and critique each other’s academic writings. Students will be encouraged and guided to discover for themselves the various linguistic and generic features of successful presentations and academic writing through intellectually challenging tasks.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

Note 1: Intended Learning Outcomes

Intended learning outcomes should state what students should be able to do or attain upon subject completion. Subject outcomes are expected to contribute to the attainment of the overall programme outcomes.

Note 2: Subject Synopsis/Indicative Syllabus

The syllabus should adequately address the intended learning outcomes. At the same time, overcrowding of the syllabus should be avoided.

Note 3: Teaching/Learning Methodology

This section should include a brief description of the teaching and learning methods to be employed to facilitate learning, and a justification of how the methods are aligned with the intended learning outcomes of the subject.

Note 4: Assessment Method

This section should include the assessment method(s) to be used and its relative weighting, and indicate which of the subject intended learning outcomes that each method is intended to assess. It should also provide a brief explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes.
