The Hong Kong Polytechnic University

Subject Description Form

Subject Code	APSS2S05				
Subject Title	Promotion of Children and Adolescent D	evelopment			
Credit Value	3				
Level	2				
GUR Requirements Intended to Fulfill	This subject intends to fulfill the following requirement(s) : Healthy Lifestyle AI and Data Analytics (AIDA) Innovation and Entrepreneurship (IE) Languages and Communication Requirement (LCR) Leadership Education and Development (LEAD) Service-Learning (SL) Cluster-Area Requirements (CAR) Human Nature, Relations and Development [CAR A] Science, Technology and Environment [CAR D] Chinese History and Culture [CAR M] Cultures, Organizations, Societies and Globalization [CAR N] History Requirement Yes or No Writing and Reading Requirements English or				
Pre-requisite / Co-requisite/ Exclusion	Nil				
Assessment Methods	100% Continuous Assessment Class participation Service proposal Performance of service project (fieldwork observation) Reflective journals Group presentation and report Total • The grade is calculated according • The completion and submission or required for passing the subject; • Student must pass all component	of all component and	assignments are		

Please read the notes at the end of the table carefully before completing the form.

Objectives	 To give a brief overview of different perspectives on child and adolescent development, needs and challenges of children and adolescents living in disadvantaged circumstances to students through design and implementation of service project. To enhance students' competencies of problem-solving, decision making, communication, team work and self-leadership. To cultivate the positive values and strengths orientation among students. To nurture students' sense of social responsibility, social awareness and promote prosocial behaviors. To nurture students' sense of care and compassion towards other people in the community, especially towards underprivileged children and adolescents.
Intended Learning	Upon completion of the subject, students will be able to:
Outcomes	(1) Understand different perspectives of child and adolescent development
(Note 1)	and apply the concepts in understanding the needs and potentials of underprivileged children and adolescents in the community.
	(2) Integrate knowledge on child and adolescent development into real life situations through critical thinking and service delivery.
	(3) Apply the knowledge and skills they have acquired in university education to deal with complex issues in the service setting and pursue continual self-improvement.
	(4) Reflect on their roles and responsibilities both as a professional in their chosen discipline and as a responsible global citizen.
	(5) Develop the sense of care and compassion towards other people, especially the underprivileged children and adolescents in the community.
	(6) Enhance psychosocial competencies such as self-confidence, innovative problem solving, decision-making capabilities, interpersonal skills, self- leadership, and teamwork.

Subject Synopsis/	The topics in the course syllabus include:
Indicative Syllabus	• Concept of service learning
(Note 2)	Principles, concepts and myths of service learning
	Benefits of service learning to the service users, the community and the students
	Ethical issues in service learning
	Proper attitudes and behaviours in service delivery
	Effective team work and problem solving skills in service learning
	Reflection as a tool for learning
	• Discipline-specific concepts
	Theories on children and adolescent development
	Ecological perspective of human development
	The "positive youth development" paradigm
	The "strengths" model of intervention
	• Project-specific concepts and skills
	Engagement and communication skills with children and adolescents
	Strategies to promote children and adolescent development
	Assessing developmental needs and behavioral changes of the children and adolescents
	• Service delivery skills
	Proper attitudes and behaviors in service delivery
	Moral and ethical concerns in serving underprivileged children and adolescents
	Developing service proposal and formulating service plan
	Classroom management and handling child/adolescent misbehaviors

Teaching/Learning Methodology	The Subject is a 2-semester subject (Semester 1 & 2 / Semester 2 & 3) which includes:
	• E-learning Module in service learning
(Note 3)	Students are requested to attend the 10 hours e-learning module developed and delivered by the Service-Learning and Leadership Office at PolyU, introducing the basic concepts and practice of service learning.
	Students are required to complete the e-learning module within the first six weeks of the semester.
	• Lectures and seminars
	Lectures are provided to equip students with discipline-specific knowledge, including developmental theories of child and adolescent development, ecological model of human development, positive youth development model, the strengths model of intervention.
	Seminars are provided to equip students with the project-specific skills such as engagement and communication skills of children and adolescents, ways to promote their competence, assessment of child and adolescent development, generic service planning, delivery and evaluation etc.
	Service orientation would be given to students so that they have more ideas on the service project.

	• S	mall group	discussion and workshops	
	>	interest. 1	e 1	according to their disciplines and p a service curriculum for the nts.
	>		are requested to utilize their well as their disciplines in the	r knowledge and skills of this eir service planning.
	>	> An instru	ctor is assigned to guide the s	tudents in the service planning.
	>	as specif	ic service delivery skills su misbehaviors of children and	oper attitudes of students, as well uch as classroom management, l adolescents are emphasized in

	classes) children adolesce	for the and	focusing on their positive development	provided by students of Faculty of Humanities

	•	Students of different disciplines utilize their general and specific knowledge and skills to provide the educational and supportive services Direct service delivery should be 40 hours		 Interest enhancement class, e.g. photography, video shooting, usage of information technology provided by students from Department of Computing Creativity enhancement class provided by students from School of Design "Inventor's training" class provided by students of Faculty of Applied Science and Textiles Home improvement project provided by students of Faculty of Construction and Environment Health education training provided by students of School of
Understand the needs, strengths and potentials of the underprivileged children and adolescents	•	Explore the strengths and potentials of the children/adolescents	•	Engaging the children/ adolescents through group activities Develop and monitor the development profile for children/ adolescents
Build up a sense of achievement for children and adolescents to further develop their potentials	•	Provide opportunities for underprivileged children and adolescents to experience the sense of achievement through participation and effort Build up aspirations and positive future orientation of children and adolescents Provide opportunities for family members to recognize the effort and strengths of service targets	•	Award presentation Ceremony with parents as the audience Cognitive exposure programme as rewards to children and adolescents, e.g. a day of university life Programme plan and evaluation

A A	The service project will take place either in the Chinese mainland or Hong Kong. For Hong Kong projects, students may implement the service on some consecutive dates during the holidays, or having two/three sessions during weekdays for one month, depending on the availability of service opportunities. For Chinese mainland projects, students are required to have a trip of around 10-11 days in the service site city (including travelling). Tentatively, the direct service (i.e., service involving direct contact with the service recipients) will cover 5 days. One or two days will be used for site visit and preparation, and one session for service round-up with the community partners.
• s	ervice proposal, reflective journals and group presentation
>	To illustrate students' ability to apply students' general and specific knowledge they acquire into direct service practice, students are expected to develop a service proposal serving the underprivileged children and adolescents. The service proposal would include the objectives, service targets, service content, schedule of work, and budget etc.
$\boldsymbol{\lambda}$	Reflective journals are used to demonstrate students' ability to reflect in their personal values, self-concepts, experiences, performance, and learning gains. Students are also expected to reflect on their roles and responsibility as a professional and as a responsible global citizen.
	As a round-up of the service project, students are required to make group presentations so as to integrate their knowledge and direct service experiences, and critically review the learning gains in implementation of the service. Recommendations of services in building child and adolescent competencies in underprivileged circumstances are also expected in the group presentation.

- Application of theories and concepts of child and adolescent development into practice and critical thinking (ILO2)
- Application of students' generic and specific knowledge they acquire to enhance the competence of children and adolescents (ILO 3)

· · · · · · · · · · · · · · · · · · ·					
	Performance of service project (fieldwork observation)	 Through on-site observation, instructors can assess the attitudes, efforts and performance of the students in rendering the services (ILO 2, ILO 3), their responsibilities as a professional in their chosen discipline and a global citizen (ILO4), their care and compassion towards the children and adolescents in need (ILO5), and their improvement in psychosocial competences such as problem-solving skills and decision-making capacity (ILO 6). Through reflective journals, students need to reflect on: Their ability in integrating the knowledge into real life situation and critical thinking (ILO 2 & 3); Their roles, responsibility and contribution as a professional and as a global citizen (ILO 4); Their passion in helping the underprivileged children and adolescents (ILO 5); Their demonstration and improvement in psychosocial competences (ILO6). 			
	Reflective journals				
	Group presentation	psychosocial competences (ILO6). As a round-up of the service project, students shoul consolidate their knowledge, experiences, skills, an learning gains into a group presentation. Recommendation of services in building child and adolescent competencies in underprivileged circumstances would also be expected in group presentation. The group presentation thus serve as important assessment strategies to assess students ability to integrate the knowledge and skills into practic and critical thinking (ILO 2, 3), understand their role and responsibility as a professional and a global citize (ILO 4), build up care and compassion with the needy (ILO 5), and students' reflection on their psychosocial competencies (ILO 6).			
Student Study	Class contact:				
Effort Expected	- Lectures and	seminars	9 Hrs.		
	- Small group and service p	discussion and workshops (pre-trip briefing lanning)	15 Hrs.		
		atation and wrap up meeting	6 Hrs.		
	Other student stu	dy effort:			
	- E-learning		10 Hrs.		
	- Service plann	ning and preparation (after class)	15 Hrs.		
	- Direct service	e delivery	40 Hrs.		
	- Post-field wo	rk integration and refection	22 Hrs.		
	- Reading and	self-study	18 Hrs.		
	Total student stud	ly effort	135 Hrs.

Note 1: Intended Learning Outcomes

Intended learning outcomes should state what students should be able to do or attain upon completion of the subject. Subject outcomes are expected to contribute to the attainment of the overall programme outcomes.

Note 2: Subject Synopsis/ Indicative Syllabus

The syllabus should adequately address the intended learning outcomes. At the same time over-crowding of the syllabus should be avoided.

Note 3: Teaching/Learning Methodology

This section should include a brief description of the teaching and learning methods to be employed to facilitate learning, and a justification of how the methods are aligned with the intended learning outcomes of the subject.

Note 4: Assessment Method

This section should include the assessment method(s) to be used and its relative weighting, and indicate which of the subject intended learning outcomes that each method purports to assess. It should also provide a brief explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes.
