Subject Description Form

Subject Code	APSS5390				
Subject Title	Practicum in Mental Health Care				
Credit Value	3				
Level	5				
Pre-requisite / Co-requisite/ Exclusion	APSS5620 Individual and Group Counseling Skills Workshop*, and one of the following courses in matching with student's selected approach for practice: APSS513 Advanced Practice Method: Brief Therapy APSS5115 Social Constructionism and Collaborative Dialogic Approach APSS5626 Mindfulness-based Programme in Mental Health and Social Care APSS5760 Evolution in Family Therapy: Structural & Systemic Approaches APSS5779 Narrative Therapy APSS537 Use of Creative Arts in Mental Health Care * For students who have completed a one semester skill building workshop in any social work or counseling degree programme, they can apply to waive the requirement of APSS5620 to programme leader.				
Assessment Methods	100% Continuous Assessment	Individual Assessment			
	 Case or group planning and proposal Performance in supervision 	40%			
	3. Documentation	20%			
	 the grade is calculated according to the percentage assigned; the completion and submission of all component assignments are required for passing the subject; and student must pass the specific component(s) (standard of passing) if he/she is to pass the subject. 				
Objectives	Through exposure to real life situations and handling of assignments in agency settings, students are expected to develop competence in applying one clinical approach in mental health care. This subject also facilitates the integration of theory and practice and the development of professional qualities of the students.				

Intended Learning Outcomes	Upon completion of the subject, students will be able to:a. Apply the knowledge gained from the coursework to work with the real life individual, family cases, or therapeutic group.b. Utilize supervisory feedback to further develop their practice competence.				
	c. Develop and main	tain an approp	riate use of self i	n the clinical con	text.
Subject Synopsis/ Indicative Syllabus	The following activities aim to enhance student's competence in realizing the education outcomes of the practicum training:				
	1. Learning Experiences The students will start the practicum in accordance to their plans endorsed by the clinical supervisor and agency staff of the practicum setting.				
	2. Clinical Supervision The student will be provided with group and individual supervision by a clinical supervisor on a weekly /bi-weekly basis.				
	3. Practicum Evaluation Practicum evaluation is an on-going process and is carried out continuously. The evaluation is a comprehensive appraisal of the student's performance on the job, competence in integrating theory and practice with individual, family cases, or therapeutic group in the special social, cultural, and community contexts.				
Teaching/Learning Methodology	By means of group learning, supervision, live-case consultation and observation, students are assisted by their supervisors to try to practice professional values, knowledge, and skills in a designated service setting. Through induction and workshops, guided observations, reflection exercises, and group supervision sessions, students are enabled to apply their selected approach into practice, and make personal and contextual reflection.				
Assessment					
Methods in Alignment with Intended Learning	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed (Please tick as appropriate) a b c		
Outcomes	1. Case or group planning and proposal	40%	V	V	v
	2. Performance in supervision	40%	V	V	
	3. Documentation	20%	V	V	V
	Total100%Explanation of the appropriateness of the assessment methods in assessing the inten learning outcomes: Evaluation is a continuous, on-going and interactive proc involving active participation of both the student and the clinical supervisor. Dur supervisory sessions, student's performance is discussed. At the mid-placem evaluation, the supervisor will conduct a verbal informal session to provide a thoro feedback to students. A formal evaluation session will be held at the end of practicum. In sum, the following assessment methods are used to align with learning outcomes:Ongoing assessments of students' performance through supervision, live-c consultation and observation. Students will be given a grade in accordance with				

	following assessment criteria:					
	• Performance in Supervision: Preparation before supervision and participation during supervision.					
	• Case or group planning and proposal: Showing perceptual competencies (determine who the client is; integrate client feedback, assessment, contextual information, and diagnosis with treatment goal and plan; distinguish differences between content and process issues and their impact on therapy, etc.). Conceptual competencies (apply selected approach into assessment and diagnosis; understand principles of human development, family development and processes; know which models, modalities, and/ or techniques are most effective for the presenting problem, etc.) Executive competencies (apply models; diagnose and assess client problems systemically and contextually, etc.) Therapist's utilization of self (self-awareness; creativity; openness, etc.)					
	Documentation: Concreteness, Preciseness, On time, Confidentiality					
Student Study	Class contact:					
Effort Expected	Group learning, observation and clinical supervision	24 Hrs.				
	 Direct client contact hours 	15 Hrs.				
	Other student study effort:					
	 Planning for case, family cases or group programme, and preparation for supervision 	ume, 40 Hrs.				
	Documentation	20 Hrs.				
	Total student study effort	99 Hrs.
