Group project | | 30% | 2 Individual assignment | 20% | | 2. MC quizzes | 40% | | 3. Class activities | 10% | |
| Items | Individual Assessment | Group Assessment | | | | | | | | | | | | | | | | |
| 1. Group project | | 30% | | | | | | | | | | | | | | | | |
| 2 Individual assignment | 20% | | | | | | | | | | | | | | | | | |
| 2. MC quizzes | 40% | | | | | | | | | | | | | | | | | |
| 3. Class activities | 10% | | | | | | | | | | | | | | | | | |
| Objectives | <p>This is an advanced study in the understanding of human behavior and the social environment specially designed for students pursuing a career in the social work or counselling profession. The subject begins by understanding the contributions and limitation of developmental psychology. Rather than merely using a biological, psychological or sociological approach to understanding human behaviors, the course aims to support students to adopt a multiple-perspective approach to understanding different behavioral/emotional issues across life stages. For those students who have insufficient background in the psychology or sociology, web-assisted material for self-study is encouraged to ensure optimal benefit from the present curriculum.</p> | | | | | | | | | | | | | | | | | |
| Intended Learning Outcomes | <p>Upon completion of the subject, students will be able to:</p> <ol style="list-style-type: none"> a. recognize the dynamic interactions between human behaviors and social environment. b. consider biophysical, psychological and sociological perspectives in analyzing behavioral/emotional issues across different life stages. | | | | | | | | | | | | | | | | | |

| | | | | | | | |
|--|--|--|-------------|---|---|---|---|
| | <p>c. recognize the ways in which different approaches to understanding human behaviors in social environment may lead to different assessments in human services.</p> <p>d. demonstrate the ability to identify, access, evaluate, and apply academic references related to understanding a case.</p> | | | | | | |
| Subject Synopsis/ Indicative Syllabus | <ul style="list-style-type: none"> • The biophysical, psychological and sociological perspectives • Issues in pregnancy and infancy • Issues in childhood • Issues in adolescence • Issues in young adulthood • Issues in middle adulthood • Issues in late adulthood | | | | | | |
| Teaching/Learning Methodology | <p>A number of learning teaching activities will be conducted to help students produce documentation of their learning demonstrating abilities to transfer and apply diagnostic and creative skills in selected professional roles within a social work or counselling context.</p> | | | | | | |
| Assessment Methods in Alignment with Intended Learning Outcomes | Specific assessment methods/tasks | | % weighting | Intended subject learning outcomes to be assessed (tick as appropriate) | | | |
| | | | | a | b | c | d |
| | 1. Group project | | 30% | √ | √ | √ | √ |
| | 2. Individual assignment | | 20% | √ | √ | √ | √ |
| | 3. MC quizzes | | 40% | √ | √ | | |
| | 4. Class activities | | 10% | √ | √ | √ | |
| | Total | | 100% | | | | |
| <p>Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:</p> <ol style="list-style-type: none"> 1. Group project is a group presentation, and a focused review of appropriate literature and clarity of discussion will be required. Students need to apply concepts and recognize the ways in which different approaches to understanding human behaviors may lead to different assessments. Completing group projects should have the following benefits: <p style="margin-left: 40px;">Students in the class have diverse training backgrounds, and completing group projects and conducting group presentations can facilitate students' sharing of their understanding and peer learning.</p> | | | | | | | |

| | | |
|--------------------------------------|--|---------|
| | <p>Giving students’ opportunities to conduct group project and present their project during class can facilitate their involvement in the class activities.</p> <p>For year 1 students, learning and sharing in a group also help them build a sense of community and belonging;</p> <ol style="list-style-type: none"> 2. For the MC quizzes, accuracy of understanding is essential. Students need to apply basic concepts in analyzing human behaviors. 3. For the class activities, active participation will be valued. Different types of activities, such as online polling or discussions, will be used to help students recognize, apply and evaluate related concepts. 4. The individual assignment enables students to read updated literature about human behaviour and social environment, and promote the ability of understanding and summarizing knowledge from literature. | |
| Student Study Effort Expected | Class contact: | |
| | <ul style="list-style-type: none"> ▪ Lecture | 39 Hrs. |
| | Other student study effort: | |
| | <ul style="list-style-type: none"> ▪ Reading and preparing for quiz | 35 Hrs. |
| | <ul style="list-style-type: none"> ▪ Preparing group project | 17 Hrs. |
| | <ul style="list-style-type: none"> ▪ Reading literature and completing individual assignment | 18 Hrs |
| Total student study effort | 109 Hrs. | |
