

Subject Description Form

Subject Code	APSS6402														
Subject Title	Issues in Health Sociology														
Credit Value	3														
Level	6														
Pre-requisite/ Co-requisite/ Exclusion	Nil														
Assessment Methods	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 50%;">100% Continuous Assessment</th> <th style="width: 25%;">Individual Assessment</th> <th style="width: 25%;">Group Assessment</th> </tr> </thead> <tbody> <tr> <td>Class participation/discussion</td> <td style="text-align: center;">10%</td> <td style="text-align: center;">0%</td> </tr> <tr> <td>Presentation</td> <td style="text-align: center;">30%</td> <td style="text-align: center;">0%</td> </tr> <tr> <td>Final paper</td> <td style="text-align: center;">60%</td> <td style="text-align: center;">0%</td> </tr> </tbody> </table> <ul style="list-style-type: none"> The grade is calculated according to the percentage assigned; The completion and submission of all component assignments are required for passing the subject; and Student must pass the specific component(s) (standard of passing) if he/she is to pass the subject. 			100% Continuous Assessment	Individual Assessment	Group Assessment	Class participation/discussion	10%	0%	Presentation	30%	0%	Final paper	60%	0%
100% Continuous Assessment	Individual Assessment	Group Assessment													
Class participation/discussion	10%	0%													
Presentation	30%	0%													
Final paper	60%	0%													
Objectives	<p>The subject aims to deepen students' understanding of the relationship between health, culture, and society and how they impact each other. Special attention is given to the application of sociological concepts and theories to the critical analysis of current trends and issues of health beliefs, health practices, and health policies. This subject also facilitates students' development of a global outlook and a critical mind, helps students to understand and analyze health issues at macro-level from different aspects, and trains students for advancing analytical and communicative skills that are essential for understanding health issues critically.</p>														

<p>Intended Learning Outcomes</p> <p><i>(Note 1)</i></p>	<p>Upon completion of the subject, students will be able to:</p> <ol style="list-style-type: none"> a. understand the relationships between health, culture, and society b. critically analyze and evaluate current trends in health-related issues both locally and globally c. apply sociological concepts and theories to analyse and reflect on various health-related conditions, beliefs, behaviours, and systems
<p>Subject Synopsis/ Indicative Syllabus</p> <p><i>(Note 2)</i></p>	<ol style="list-style-type: none"> 1. Choice of remedies and medical systems 2. Sick role 3. The social construction of health, medical knowledge, and illness 4. Health inequality: health and disease in relation to social class and race 5. Health and disease in relation to gender: the diseased body and regulation of bodies 6. Disease-associated stigma and discrimination 7. Mass media and health representation 8. Health care provider-patient interaction and communication 9. The social construction of health care as professionals 10. McDonaldization of health care
<p>Teaching/Learning Methodology</p> <p><i>(Note 3)</i></p>	<p><u>Lecture</u> Lectures are used to provide students with the basic and necessary knowledge on topics listed in the syllabus. To overcome the didactical nature of traditional ways of lecturing, the lectures in this subject are conducted in a more dialogical and interactive manner, and students are encouraged to raise questions or initiate discussion during the lectures. Time will be allotted in each class for a class discussion, in which students should be prepared to analyze and critique course concepts, and relate the lecture materials and readings with their daily clinical practice.</p> <p><u>Presentation</u> Presentations will be given by each student in the last two classes. Topics of presentation are based on the final paper of students. Students will be expected to participate in the discussion after each presentation.</p> <p><u>Class participation/discussion</u> Students will be expected to participate in weekly discussions on course material.</p>

<p>Assessment Methods in Alignment with Intended Learning Outcomes</p> <p><i>(Note 4)</i></p>	<p>Specific assessment methods/tasks</p>	<p>% weighting</p>	<p>Intended subject learning outcomes to be assessed (Please tick as appropriate)</p>

	<p>Total</p>	<p>100 %</p>					
	<p>Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:</p> <p>Class participation and presentations are essential to developing students’ analytical ability, verbal communication, and presentation skills. The topic of presentation can be related to their final papers.</p> <p>In their final papers, students will be expected to choose a health-related topic and conduct a critical analysis by using sociological concepts that they have learnt in class. Students will need to elaborate their arguments in written form, to deepen their analysis, to demonstrate their critical and analytical thinking, and to organize different materials in a systematic and logical manner.</p>						
<p>Student Study</p>	<p>Class contact:</p>						

Effort Required	▪ Lecture	33 Hrs.
	▪ Presentation	6 Hrs.
	Other student study effort:	
	▪ Pre-lecture reading	15 Hrs.
	▪ Post-lecture revision	20 Hrs.
	▪ Preparation for presentation	30 Hrs.
	▪ Preparation for final paper	45 Hrs.
	Total student study effort	149 Hrs.

Note 1: Intended Learning Outcomes

Intended learning outcomes should state what students should be able to do or attain upon completion of the subject. Subject outcomes are expected to contribute to the attainment of the overall programme outcomes.

Note 2: Subject Synopsis/ Indicative Syllabus

The syllabus should adequately address the intended learning outcomes. At the same time over-crowding of the syllabus should be avoided.

Note 3: Teaching/Learning Methodology

This section should include a brief description of the teaching and learning methods to be employed to facilitate learning, and a justification of how the methods are aligned with the intended learning outcomes of the subject.

Note 4: Assessment Method

This section should include the assessment method(s) to be used and its relative weighting, and indicate which of the subject intended learning outcomes that each method purports to assess. It should also provide a brief explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes.
