

Student Feedback for APSS1A21/M in 2017/18

1. Service Leadership is an informative and inspirational subject which benefits my personal growth. Studying this subject helps me to connect my experiences with the theories and reminds me that I should pay more attention to what are the expressed needs of the people around me or even the whole society.
2. I learnt lots of new concepts that break my old thoughts such as everyone can be a leader. I used to think I have no potential being a leader. The lectures, like new dishes, really brought me pleasure and encouragement in appreciating myself.
3. I learn a lot from this course, and it makes me think.
4. In discussion, we can think critically and try to understand how other think.
5. It is really useful to my study and future (working). It lights up my life like a light bulb does. The leadership skills are meaningful!!!
6. The class seems simple or even boring. But when you look back, you will realize that it is so important to build up our character and leadership. Just like water, simple but important.
7. The elaboration and introduction of different characters and people's attributes help me reflect myself in the past.
8. The course helps me reflect on myself just like what a mirror does.
9. They teach with heart and funny!
10. The atmosphere is good. Interaction is encouraged. A nice lecture!
