Objectives	<p>This subject aims to introduce students to cross-cultural psychology, one of the important branches of psychology. Through lectures and seminar discussions, students will be able to describe and explain different definitions of culture and social behavior, and consider how diverse cultures carry impact on psychology of people from different parts of the world. In sum, students will be able to acquire classic and contemporary empirical theories, methods and research pertaining to psychological studies of culture.</p>																				
Intended Learning Outcomes	<p>Upon the completion of the subject, students will be able:</p> <ol style="list-style-type: none"> a. to understand fundamental concepts and theoretical perspectives pertinent to the study of culture and social behavior, and to the study of intercultural relations and communication; b. to know the approaches and findings of classic and contemporary empirical studies of cross-cultural psychology; c. to be familiar with methodological issues pertaining to the psychological study of culture. d. to master skills at cross-cultural investigation through engagement in group project and individual paper 																				

Subject Synopsis/ Indicative Syllabus	<p>The role of culture will be examined across a range of psychological areas, including</p> <ol style="list-style-type: none"> 1. perceptual and cognitive processes; 2. human development; 3. language; 4. gender; 5. personality; 6. social behavior. <p>Issues concerning cultural contact and intercultural relations will be considered, as well as the application of psychology in different areas such as health and organizational psychology.</p>																																																												
Teaching/Learning Methodology	<ol style="list-style-type: none"> 1. Lecture presentations <ul style="list-style-type: none"> - to provide the knowledge base and theoretical orientation necessary to do research independently 2. Seminar discussion <ul style="list-style-type: none"> - to provide insights into methodological short-comings and measure short-falls leading to faulty research 3. Group project <ul style="list-style-type: none"> - to provide an opportunity to apply theoretical orientation, knowledge base, and research skills to selected empirical projects 																																																												
Assessment Methods in Alignment with Intended Learning Outcomes	<table border="1" data-bbox="421 1279 1445 1899"> <thead> <tr> <th rowspan="2">Specific assessment methods/tasks</th> <th rowspan="2">% weighting</th> <th colspan="6">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th> </tr> <tr> <th>a</th> <th>b</th> <th>c</th> <th>d</th> <th></th> <th></th> </tr> </thead> <tbody> <tr> <td>1.
