Objectives	<p>This is an elective subject for those who are committed to acquire knowledge in developing innovative family interventions with the goal of promoting the welfare of families in social work and related human service contexts. This course offers a critical understanding on the current practice knowledge and research development in family-centred social work. With such an understanding, the students can begin to formulate a personal stance as well as an organizational framework in family- centred social work practice.</p>														
Intended Learning Outcomes	<p>Upon completion of the subject, students will be able to:</p> <ol style="list-style-type: none"> a. Develop a critical understanding on the historical and current development of family-centred theory and practice in local and international contexts; b. Examine the role of philosophical traditions and social theories on the evolution of family-centred social work; c. Appraise the state-of-the-art of the practice model development in family-centred social work with a special focus on developing indigenous practice in the Chinese contexts; 														

	<p>d. Evaluate the state-of-the-art of the research development in family-centred practice;</p> <p>e. Formulate a personal stance and an organizational framework in family-centered social work and related professional contexts.</p>
<p>Subject Synopsis/ Indicative Syllabus</p>	<p>1 Critical review on</p> <ul style="list-style-type: none"> • The historical and current development of family-centred theory and practice in Hong Kong and in the international scene • The major theoretical frameworks informing the family-centred social work practice. Some of the major theories include: Phenomenology, Feminism, Ecological framework, Social Exchange and Choice Theory, Family conflict Theory, Family Life Course Theory and Critical Theory • The influence of post-modernism in family-centred social work practice <p>2 Reflective examination on</p> <ul style="list-style-type: none"> • The state-of-the-art of the practice model development in family-centered practice for social work. Some of these models include: <ul style="list-style-type: none"> - Narrative approach - Family resilience approach - Social support networks - Critical reflection approach - Family empowerment approach - Asset building model - Community-based approach • Integration of the current practice modes developed in the West and local practice • Indigenization of family-centred practice models in the Chinese contexts • Inter-professional collaboration and conflicts in implementing family-centred practice in social work, family therapy, health care, and related human services • Issues in family-centered social work: changing value and ethics, changing family forms, gender roles and relations, cultural diversity and socio-economic disparity. • Development of a personal stance as well as an organisational position towards family-centred social work <p>3 Critical appraisal on</p> <ul style="list-style-type: none"> • The state-of-the-art of the research development in family-centred social work • The current debates in family-centred practice research <ul style="list-style-type: none"> - Nomothetic-idiographic debate - Integration of evidence based practice and practice based evidence - Integration of outcome and process research

	<ul style="list-style-type: none"> - Integration of quantitative and qualitative family research - Integration of practice with policy 																																								
Teaching/Learning Methodology	<p>The main pedagogical approach for this subject is based primarily on the experiential learning framework. A wide range of experientially-based teaching-learning activities will be employed to facilitate the students' learning, such as portfolio, reflective journals, peer review journal, reflective team, case study, role-play, workshop, and group presentation. The instructor will act as a coach to support the students to gain both the conceptual and experiential understanding on the subject syllabus.</p>																																								
Assessment Methods in Alignment with Intended Learning Outcomes	<table border="1" data-bbox="430 699 1430 1192"> <thead> <tr> <th rowspan="2">Specific assessment methods/tasks</th> <th rowspan="2">% weighting</th> <th colspan="5">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th> </tr> <tr> <th>a</th> <th>b</th> <th>c</th> <th>d</th> <th>e</th> </tr> </thead> <tbody> <tr> <td>1. Portfolio</td> <td>50%</td> <td>✓</td> <td>✓</td> <td>✓</td> <td>✓</td> <td>✓</td> </tr> <tr> <td>2.
