	<p>Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:</p> <ul style="list-style-type: none"> <li>● The term paper is an articulation of one’s personal stance in teaching social work practice based on a good understanding of the development and issues in social work education internationally and locally, with a firm grasp of relevant literature. Hence, an academic paper in written form is required.</li> <li>● The seminar presentation provides a platform for sharing the student’s finding on a particular issue; feedbacks from classmates and teacher would stimulate student for more critical reflection and generate alternative views and ideas; hence dialogue, discussion and debate in oral form with visual aids are appropriate;</li> <li>● The co-reflection exercises provide opportunities to demonstrate the student’s approach in teaching social work practice in action; hence either a live session or a video-taped recording will be watched by classmates who would provide feedbacks and raise issues for helping the student to review, reflect, improve and innovate.</li> </ul>
