Subject Description Form

Subject Code	BSE384							
Subject Title	Work-Integrated Education (WIE)							
Credit Value	2							
Level	3							
Pre-requisite Co-requisite Exclusion	IC354 Industrial Safety I <u>or</u> IC358 Industrial Safety I Nil Nil							
Objectives	The subject aims to enable students to: 1. develop the ability to apply theory and concepts into engineering practice; 2. develop awareness of work-place culture; and 3. develop all-roundedness attributes.							
Intended Learning Outcomes	a) appreciate the rapid changingb) have a better understanding	the subject, students will be able to: pid changing world of work; derstanding of workplace culture; and apployability and potential of commanding higher wages.						
Subject Synopsis/ Indicative Syllabus	WIE will take the form of an industrial attachment for a minimum period of 4 weeks, generally starting around July/August, in the summer following the completion of stage 2 study. It may be delivered in Hong Kong, Chinese Mainland or overseas. The expected outcomes will be achieved through effective learning engineering knowledge and understanding engineering fundamentals in the work environment.							
Teaching/Learning Methodology	A departmental WIE team comprising of the Departmental Training Co-ordinator, other staff members and the corresponding mentors will form to ensure that effective learning does take place. Each student will be assigned with an engineering tutor. It ensures that the student receives training relevant to the students' future profession. Staff members will be available to the student to discuss training, technical and professional matters. The team will also verify students' log book and assess his/her progress. It ensures that students meet the expected subject outcomes.							
Assessment Methods in Alignment with Intended Learning Outcomes	The assessment will be of pass or fail basis.							
	Specific assessment methods/tasks	% Intended subject learning outcomes to be weighting assessed (Please tick as appropriate)
