

## Subject Description Form

<b>Subject Code</b>	BRE349
<b>Subject Title</b>	Building Services I
<b>Credit Value</b>	3
<b>Level</b>	3
<b>Pre-requisite</b>	BRE2031
<b>Objectives</b>	<p>This subject is intended to:</p> <ol style="list-style-type: none"> <li>1. Provide students with an overview of the various building services engineering systems in modern buildings,</li> <li>2. Understand the basic design intent of various building services systems and their integration with the building fabric and architectural features.</li> </ol>
<b>Intended Learning Outcomes</b>	<p>Upon completion of the subject, students will be able to:</p> <ol style="list-style-type: none"> <li>a. Possess a knowledge of the system configuration and operation of various building services systems.</li> <li>b. Relate how different building services systems can help to control and improve the indoor environment.</li> <li>c. Identify the relationships between the design of building services systems and the overall building design.</li> <li>d. Appreciate the cost and value relationship on the selection of appropriate building services systems.</li> <li>e. Relate issues on environmental impact to the design of building services systems and overall building design.</li> </ol>
<b>Subject Synopsis/ Indicative Syllabus</b>	<p>Plumbing &amp; Drainage Water supply and drainage system for high rise buildings. Simple design on pipe sizing for plumbing and drainage pipes. Sewage treatment process.</p> <p>Electricity: Assessment of electricity demand. Lightning protection. Safety and Earthing provisions for electricity distribution within buildings.</p> <p>HVAC/MVAC: Assessment on the efficiency of air-conditioning and air mixing processes. Large scale air conditioning system configurations and operations.</p> <p>Internal transportation: The configuration and operation of lifts and escalators. Assessment to the quality of services for lift operation.</p> <p>Fire Services: Prevention, detection and suppression systems. Passive approach to Fire Services. Integration of fire services system to other building services systems.</p>

<b>Teaching/Learning Methodology</b>	<p>The learning and teaching approaches for the subject comprises lectures, tutorials and laboratories.</p> <p>Lectures aims at delivering the basic core of concepts whilst ideas and operations will be further elaborated and discussed in the tutorials. Presentation by students during tutorials on selected topics will also be arranged. Laboratories are provided to allow students to relate theories and concepts to real situations.</p>																																																																			
<b>Assessment Methods in Alignment with Intended Learning Outcomes</b>	<table border="1" data-bbox="443 465 1471 958"> <thead> <tr> <th rowspan="2">Specific assessment methods/tasks</th> <th rowspan="2">% weighting</th> <th colspan="6">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th> </tr> <tr> <th>1</th> <th>2</th> <th>3</th> <th>4</th> <th>5</th> <th></th> </tr> </thead> <tbody> <tr> <td>1. Laboratory Report</td> <td>8%</td> <td>√</td> <td>√</td> <td></td> <td></td> <td></td> <td>√</td> <td></td> </tr> <tr> <td>2.
