

Subject Description Form

Subject Code	BRE470
Subject Title	Information Technology and Building Information Modelling for Construction
Credit Value	3
Level	4
Pre-requisite / Co-requisite/ Exclusion	Nil
Objectives	This subject is intended to develop an understanding of the practical application of computer systems and packages in building life cycle process and the application of building information modelling (BIM) in construction.
Intended Learning Outcomes	<p>Upon completion of the subject, students will be able to:</p> <ol style="list-style-type: none"> a. understand and demonstrate knowledge of building life cycle process. b. understand and demonstrate knowledge of the application of computer systems, BIM, Artificial Intelligence (AI), and Big Data analytics in various procurement stages of a building project. c. appraise commercially available and tailor-made computer packages and BIM application in building life cycle process.
Subject Synopsis/ Indicative Syllabus	<p>The process of building life cycle.</p> <p>Identifying the benefits of construction IT/ BIM applications.</p> <p>Understanding core values of BIM, and its applicability in construction practice.</p> <p>The appraisal of IT/BIM systems in design, cost planning, procuring, project management and facility management.</p> <p>Understanding the fundamental theories behind AI and Big Data analytics, and existing tools.</p> <p>Exploring the use of AI and Big Data analytics in various construction applications.</p> <p>Exploring the extended use of BIM by combining it with AI and Big Data analytics.</p>

Teaching/Learning Methodology	Lectures and tutorials will be run throughout the semester period. A lecture schedule outlining the topics to be covered will be distributed to students in the first lecture of the semester. During the tutorials, students will be required to assess and use various IT/BIM tools (e.g., Revit, Navisworks, AI/Big Data analytics packages) and to prepare group assignments.																																																														
Assessment Methods in Alignment with Intended Learning Outcomes	<table border="1" data-bbox="443 405 1469 1010"> <thead> <tr> <th data-bbox="443 405 743 584" rowspan="2">Specific assessment methods/tasks</th> <th data-bbox="748 405 908 584" rowspan="2">% weighting</th> <th colspan="6" data-bbox="912 405 1469 510">Intended subject learning outcomes to be assessed (Please tick as appropriate)</th> </tr> <tr> <th data-bbox="912 517 1027 584">a</th> <th data-bbox="1032 517 1115 584">b</th> <th data-bbox="1120 517 1203 584">c</th> <th data-bbox="1208 517 1291 584"></th> <th data-bbox="1295 517 1378 584"></th> <th data-bbox="1383 517 1469 584"></th> </tr> </thead> <tbody> <tr> <td data-bbox="443 591 743 725">1.
