

## Distinguished Chair Professor Inaugural Lecture on "Dynamics, Control and Monitoring of Long-span Bridges"

On 28 May 2019 (Tuesday), Prof. Yozo Fujino, Distinguished Professor, Institute of Advanced Sciences, Yokohama National University, Japan and Distinguished Chair Professor, Department of Civil and Environmental Engineering, PolyU, gave a seminar on **“Dynamics, Control and Monitoring of Long-span Bridges”**. Prof. Yozo Fujino reviewed his research on dynamics, control and monitoring of large civil structures, particularly long-span bridges for the past 40-years. He also discussed his research direction and shared his research experience during the lecture.

Prof. Yozo Fujino was giving the presentation

Prof. Y. L. Xu, Dean of Faculty of Construction and Environment (right) presented the souvenir to the distinguished speaker, Prof. Yozo Fujino (left)
