

Congratulations !

Prof. CS Poon's group won the
Academy Award 2017 for Best
Contribution to "Sustainable
Production" Globally

Prof. C.S. Poon's group won the Academy Award 2017 for Best Contribution to "Sustainable Production" Globally

23rd SETAC Europe LCA Case Studies Symposium
Consequential LCA for Decision Support
27–28 November 2017 | Barcelona, Spain
Organised in cooperation with the International Life Cycle Academy

The [Awards of the International Life Cycle Academy](#) are given to honour contributions of outstanding quality, within the last or current year, within the field of quantitative sustainability assessment.

There are 6 Award categories:

- Best contribution to LCA modelling
- Best contribution to sustainable production
- Best contribution to sustainable consumption
- Best contribution to policy application of LCA
- Best contribution to LCA communication or teaching
- Best contribution to LCA quality

A total of 1905 papers appeared for years 2016/17 after November 2016.

Sponsored by

Best Contribution to Sustainable Production

In the category *Best contribution to Sustainable Production*, the task of selection was more difficult, with an initial selection of 134 contributions, out of which 56 papers were reviewed in detail. Only 4 papers made it to the final nominations.

In the end, the Award goes to the author of a very thorough study on the allocation of supplementary cementitious materials, from **The Hong Kong Polytechnic University**.

Md. Uzzal Hossain, C.S. Poon, Y.H. Dong, D. Xuan (2018). Evaluation of environmental impact distribution methods for supplementary cementitious materials. Renewable and Sustainable Energy Reviews 82(1): 597-608.*
