

THE HONG KONG POLYTECHNIC UNIVERSITY

**DEPARTMENT OF CONSTRUCTION
MANAGEMENT AND INTELLIGENCE**

**Senior Year Intake into Undergraduate Degree
Programme**

BSc (Hons) in Building Engineering & Management

BSc (Hons) in Property Management

BSc (Hons) in Surveying

For Student Intake 2026 - 2027

September 2026

This Programme Requirement Document is subject to review and changes, which the programme offering University / Faculty / Department / School can, decide to make from time to time. Students will be informed of the changes as and when appropriate.

This document should be read in conjunction with the Academic Registry Handbook on Academic Regulations and Procedures.

BSc (Hons) in Building Engineering & Management

1. General Information

Summary of Programme Details:

Name of University:	The Hong Kong Polytechnic University
Faculty:	Construction and Environment (FCE)
Department:	Construction Management and Intelligence (CMI)
Programme:	BSc (Hons) in Building Engineering and Management (BEM)
Mode of Attendance:	Full-time
Mode of Operation:	Credit-Based Programme
Mode of Finance:	UGC Funded
Duration:	Normally two years
Total Credits Requirements:	69 credits (plus 2 training credits)
Commencing:	September 2026
Level of Award:	BSc (Hons) in Building Engineering and Management

Contributing Departments / Centres

Host Department: Construction Management and Intelligence (CMI)

Contributing Departments and Centre:

- Department of Applied Mathematics (AMA)
- English Language Centre (ELC)
- Chinese Language Centre (CLC)

Programme Planning Committee

Head of the Department
Associate Head (Teaching)
Undergraduate Scheme Chair
BEM Award Co-ordinator

2. **Programme Aims, Objectives and Outcomes**

2.1 **Programme Aims**

The BEM programme aims to produce graduates who can develop into highly competent and professional building engineers for Hong Kong, China and the international market. It aims to equip students with the knowledge and ability in the planning and management of construction projects and facilities so that they will be able to contribute effectively to project and facilities management teams engaged in complex building projects.

2.2 **Programme Outcomes**

Programme outcomes refer to the intellectual abilities, knowledge, skills and attributes that an all-rounded preferred graduate from BEM programme should possess.

To ensure fulfilment of the goal of developing all-round students with professional competence, it is required that outcome statements encompass the following two categories of learning outcomes:

Professional/Academic Knowledge and Competence

Upon successful completion of the programme, the graduate is expected to have acquired the ability: -

- (i) To possess knowledge of building engineering principles, processes and methods for the successful completion of all types of construction projects.
- (ii) To use the techniques, skills and engineering principles for different types of construction.
- (iii) To apply construction management knowledge and skills in personnel, financial and operational practices and communication aspects required for efficient building production.
- (iv) To identify, structure and analyse diverse problems arising from the changing social, economic, environmental and technological pressures.
- (v) To solve identified construction problems with appropriate solutions.
- (vi) To evaluate alternative strategic options.
- (vii) To select appropriate construction materials, practices and methods in compliance with sustainable development.
- (viii) To exercise professional judgement in the consideration of alternatives in complex situations.

Attributes for All-roundedness

As all undergraduate programmes are under the CMI Degree scheme, the attributes for all-roundedness listed are the same under the scheme.

Upon successful completion of the programme, the students are expected to possess the following attributes for all-roundedness:-

- (i) To possess skills to identify, analyse and solve problems.
- (ii) To have an understanding of professional, social and ethical responsibilities.
- (iii) To communicate effectively.
- (iv) To reflect on knowledge gap for life time learning.
- (v) To contribute as team member and to lead effectively.
- (vi) To identify contemporary issues.

Note: PolyU aspires to develop all its students as all-round graduates with professional competence, and has identified a set of highly valued graduate attributes can be developed through the curricular activities of this programme, some (including the all-rounded attributes of ‘to reflect on knowledge gap for life time learning’ and ‘to identify contemporary issues’ contained therein in the curriculum mappings of the Majors in BSc (Hons) in Building Engineering & Management) are primarily addressed through co-curricular activities offered by faculties, departments, and various teaching and learning support units of the University. Students are encouraged to make full use of such opportunities to develop these attributes.

Graduate attributes and institutional learning outcomes for undergraduate degree programmes

- (i) **Socially responsible leaders with a strong sense of national pride and a global outlook:** Be able to Care about and understand local, national and global issues, and be able to think globally, act responsibly, and lead with integrity and pride for the benefit of society and a sustainable future.
- (ii) **Future-ready professionals who possess technical acumen:** Be able to integrate and apply in-depth discipline knowledge and specialised skills, leverage changing and emerging technologies for work, function in variable interdisciplinary contexts, and demonstrate professionalism and entrepreneurial spirit at work.
- (iii) **Critical thinkers and creative problem solvers:** Be able to critically evaluate information and arguments, draw logical and informed conclusions, identify problems and formulate innovative solutions, in both professional and everyday contexts.
- (iv) **Effective Communicator and Collaborators:** Be able to communicate effectively in English and Chinese in professional and everyday contexts*, collaborate with people from diverse backgrounds and different perspectives, and contribute to effective teamwork and positive group dynamics.
- (v) **Adaptable and resilient lifelong learners:** Committed to continual learning and self-improvement, engage in learning with a sense of purpose, manage their own learning, adapt to different learning situations, and deal effectively with the arising stress and challenges.

* The expectation to communication in Chinese does not apply to foreign students.

BSc (Hons) in Property Management

1. General Information

Summary of Programme Details:

Name of University:	The Hong Kong Polytechnic University
Faculty:	Construction and Environment (FCE)
Department:	Construction Management and Intelligence (CMI)
Programme:	BSc (Hons) in Property Management (PMT)
Mode of Attendance:	Full-time
Mode of Operation:	Credit-Based Programme
Mode of Finance:	UGC Funded
Duration:	Normally two years
Total Credits Requirements:	72 credits (plus 2 training credits)
Commencing:	September 2026
Level of Award:	BSc (Hons) in Property Management

Contributing Departments / Centres

Host Department: Construction Management and Intelligence (CMI)

Contributing Departments and Centre:

- Applied Social Sciences (APSS)
- English Language Centre (ELC)
- Chinese Language Centre (CLC)

Programme Planning Committee

Head of the Department
Associate Head (Teaching)
Undergraduate Scheme Chair
PMT Award Co-ordinator

2. **Programme Aims, Objectives and Outcomes**

2.1 **Programme Aims**

The PMT Programme aims to provide students with a broad-based and inter-disciplinary education in the context of property and housing management as well as facilities and corporate asset management and to develop them as all-rounders who can understand and work with the interplay between social, economic, political, legal, technological and commercial issues and problems incidental to the property and real estate asset management. Students are equipped with the ability to identify the issues and to solve the strategic and operational problems in property management. It is intended to prepare students for a professional career in property and real estate asset management in Hong Kong and the region with the essential knowledge and prerequisite skills for the profession.

2.2 **Programme Outcomes**

Programme outcomes refer to the intellectual abilities, knowledge, skills and attributes that an all-rounded preferred graduate from PMT programme should possess.

To ensure fulfilment of the goal of developing all-round students with professional competence, it is required that outcome statements encompass the following two categories of learning outcomes:

Professional/Academic Knowledge and Competencies

Upon successful completion of the programme, the students are expected to attain the following abilities:-

- (i) To apply professional and vocational knowledge in property management, including its operational logistics and multi-disciplinary facets.
- (ii) To identify and solve problems in property management practices.
- (iii) To communicate effectively with social skills as a competent property manager.
- (iv) To practise as a professional property manager in compliance with the legal and ethical requirements of the profession.
- (v) To appreciate the multi-disciplinary dimensions of property management practices and the interests of the stakeholders in the industry.
- (vi) To explore options for the property management practices with creative and critical mind-set.

Attributes for All-roundedness

As all undergraduate programmes are under the CMI Degree scheme, the attributes for all-roundedness listed are the same under the scheme.

Upon successful completion of the programme, the students are expected to possess the following attributes for all-roundedness:-

- (i) To possess skills to identify, analyse and solve problems.
- (ii) To have an understanding of professional, social and ethical responsibilities.
- (iii) To communicate effectively.
- (iv) To reflect on knowledge gap for life time learning.
- (v) To contribute as team member and to lead effectively.
- (vi) To identify contemporary issues.

Note: PolyU aspires to develop all its students as all-round graduates with professional competence, and has identified a set of highly valued graduate attributes that can be developed through the curricular activities of this programme, some (including the all-rounded attributes such as ‘to reflect on knowledge gap for life time learning and to identify contemporary issues’ contained therein in the curriculum mappings of the Majors in BSc (Hons) in Building Engineering & Management, BSc (Hons) in Property Management and BSc (Hons) in Surveying) are primarily addressed through co-curricular activities offered by faculties, departments, and various teaching and learning support units of the University. Students are encouraged to make full use of such opportunities to develop these attributes.

Graduate attributes and institutional learning outcomes for undergraduate degree programmes

- (i) **Socially responsible leaders with a strong sense of national pride and a global outlook:** Be able to Care about and understand local, national and global issues, and be able to think globally, act responsibly, and lead with integrity and pride for the benefit of society and a sustainable future.
- (ii) **Future-ready professionals who possess technical acumen:** Be able to integrate and apply in-depth discipline knowledge and specialised skills, leverage changing and emerging technologies for work, function in variable interdisciplinary contexts, and demonstrate professionalism and entrepreneurial spirit at work.
- (iii) **Critical thinkers and creative problem solvers:** Be able to critically evaluate information and arguments, draw logical and informed conclusions, identify problems and formulate innovative solutions, in both professional and everyday contexts.
- (iv) **Effective Communicator and Collaborators:** Be able to communicate effectively in English and Chinese in professional and everyday contexts*, collaborate with people from diverse backgrounds and different perspectives, and contribute to effective teamwork and positive group dynamics.
- (v) **Adaptable and resilient lifelong learners:** Committed to continual learning and self improvement, engage in learning with a sense of purpose, manage their own learning, adapt to different learning situations, and deal effectively with the arising stress and challenges.

* The expectation to communication in Chinese does not apply to foreign students.

BSc (Hons) in Surveying

1. General Information

Summary of Programme Details:

Name of University:	The Hong Kong Polytechnic University
Faculty:	Construction and Environment (FCE)
Department:	Construction Management and Intelligence (CMI)
Programme:	BSc (Hons) in Surveying (SUV)
Mode of Attendance:	Full-time
Mode of Operation:	Credit-Based Programme
Mode of Finance:	UGC Funded
Duration:	Normally two years
Total Credits Requirements:	72 credits (plus 2 training credits)
Commencing:	September 2026
Level of Award:	BSc (Hons) in Surveying

Contributing Departments / Centres

SUV Deputy Award Co-ordinator

2. **Programme Aims, Objectives and Outcomes**

2.1 **Programme Aims**

The Programme aims to prepare students with fundamental knowledge and skills in the inter-disciplinary professions of land, property and construction for their immediate employability and lifelong learning. The Programme underpins surveying studies with the disciplines of economics, law; sustainability, management and technology. Graduates will first enter the professions of building surveying, quantity surveying, planning & development, property and facility management or general practice surveying as graduate trainees, with full potentials to readily become full-fledged professional surveyors and take leading and strategic roles in the profession and business of land, property and construction and contribute to the community through their chosen professional services.

2.2 **Programme Outcomes**

Programme outcomes refer to the intellectual abilities, knowledge, skills and attributes that an all-round preferred graduate from surveying programme should possess.

To ensure fulfilment of the goal of developing all-round students with professional competence, it is required that outcome statements encompass the following two categories of learning outcomes:

Professional/Academic Knowledge and Competencies

Upon successful completion of the programme, the students are expected to attain the following abilities:-

- (i) To comprehend and identify issue and problems concerning land, property and construction at project level.
- (ii) To comprehend and identify issue and problems concerning land, property and construction at corporate level.
- (iii) To comprehend and identify issue and problems concerning land, property and construction at industry level.
- (iv) To comprehend and identify issues and problems concerning land, property and construction at macro social-economic and political level.
- (v) To advise clients through rendering surveying services.
- (vi) To identify, formulate and solve problems related to the surveying profession and real estate industry.
- (vii) To analyse and interpret data of the industry
- (viii) To formulate and implement strategies, policies and solutions for sustainable development and construction.

Attributes for All-roundedness

As all undergraduate programmes are under the CMI Degree scheme, the attributes for all-roundedness listed are the same under the scheme.

Upon successful completion of the programme, the students are expected to possess the following attributes for all-roundedness:-

- (i) To possess skills to identify, analyse and solve problems.
- (ii) To have an understanding of professional, social and ethical responsibilities.
- (iii) To communicate effectively.
- (iv) To reflect on knowledge gap for life time learning.
- (v) To contribute as team member and to lead effectively.
- (vi) To identify contemporary issues.

Note: PolyU aspires to develop all its students as all-round graduates with professional competence, and has identified a set of highly valued graduate attributes that can be developed through the curricular activities of this programme, some (including the all-rounded attributes such as ‘to reflect on knowledge gap for life time learning and to identify contemporary issues’ contained therein in the curriculum mappings of the Majors in BSc (Hons) in Building Engineering & Management, BSc (Hons) in Property Management and BSc (Hons) in Surveying) are primarily addressed through co-curricular activities offered by faculties, departments, and various teaching and learning support units of the University. Students are encouraged to make full use of such opportunities to develop these attributes.

Graduate attributes and institutional learning outcomes for undergraduate degree programmes

- (i) **Socially responsible leaders with a strong sense of national pride and a global outlook:** Be able to Care about and understand local, national and global issues, and be able to think globally, act responsibly, and lead with integrity and pride for the benefit of society and a sustainable future.
- (ii) **Future-ready professionals who possess technical acumen:** Be able to integrate and apply in-depth discipline knowledge and specialised skills, leverage changing and emerging technologies for work, function in variable interdisciplinary contexts, and demonstrate professionalism and entrepreneurial spirit at work.
- (iii) **Critical thinkers and creative problem solvers:** Be able to critically evaluate information and arguments, draw logical and informed conclusions, identify problems and formulate innovative solutions, in both professional and everyday contexts.
- (iv) **Effective Communicator and Collaborators:** Be able to communicate effectively in English and Chinese in professional and everyday contexts*, collaborate with people from diverse backgrounds and different perspectives, and contribute to effective teamwork and positive group dynamics.
- (vi) **Adaptable and resilient lifelong learners:** Committed to continual learning and self-improvement, engage in learning with a sense of purpose, manage their own learning, adapt to different learning situations, and deal effectively with the arising stress and challenges.

* The expectation to communication in Chinese does not apply to foreign students.

3. **General Entrance Requirements**

Students admitted to the undergraduate programmes offered by the Department will undergo a common first year curriculum. Students would continue their prescribed study programme / major or to select other programmes / major offered by all departments within the Faculty of Construction and Environment after the first year of study. Students are required to indicate their priority on preferred programmes / majors by the end of Semester 2 in the first year of study. If a student prefers a new programme / major to pursue in upper years, he/she will be subjected to a selection and ranking mechanism to determine the eligibility on changing the programme / major.

3.1 **Normal Applicants**

The basic entrance requirement is a Higher Diploma or Associate Degree in Construction related discipline or equivalent from a recognized institution.

3.2 **Selection**

Selection of applicants for admission is based on academic qualifications and other relevant qualifications. Short-listed applicants may be required to attend an interview. The purpose of the interview is to assess the applicants:-

- Command of spoken English;
- Depth and breadth of general knowledge, and
- Motivation for entering the programme.

The final selection of students will be based on a balance of academic attainment, motivation, and the interview report, if any.

In all cases, the final decision as to the suitability of any applicant will be the sole discretion of the Head of Department.

4. **Intended Learning Outcomes, Curriculum Mapping, Programme Curriculum and Progression Pattern of Programmes**

BSc (Hons) in Building Engineering & Management

4.1 **Subject Descriptions**

‘Level’ codes reflect the intellectual demand on the students. The levels of the subjects are coded according to a common coding system of the Hong Kong Polytechnic University.

Level Code Explanation

- | | | |
|---|---|--|
| 1 | = | Some subject intended learning outcomes are at the exit level for Associate Degree/Higher Diploma; intended to be taken during year 1 of a 4-year degree programme or year 1 of an Associate Degree/Higher Diploma programme; usually have no pre-requisite. |
| 2 | = | The majority of the subject intended learning outcomes are at the exit level for Associate Degree/Higher Diploma; intended to be taken during year 2 of a 4-year degree programme or the final year of an Associate Degree/Higher Diploma programme; some subjects at this level may have prerequisites. |
| 3 | = | Some subject intended learning outcomes are at the exit level for Bachelor’s degree while the rest at the exit level for Associate Degree/Higher Diploma; intended to be taken during year 3 of a 4-year degree programme; usually require the completion of subjects at the preceding levels as a prerequisite. |
| 4 | = | The majority of the subject intended learning outcomes are at The exit level for Bachelor’s degree while the rest at the exit level for Associate Degree/Higher Diploma; intended to be taken during the final year of a 4-year degree programme; usually require the completion of subjects at the preceding levels as a pre-requisite. |

The **typical progression patterns of BSc (Hons) in Building Engineering & Management** illustrate the semesters in which these subjects are recommended to be taken, if the programme of the Major is to be completed in the minimum time.

NOTE

***Programme Curriculum displays the Major Requirement for the Major in Building Engineering & Management only.**

Details of the General University Requirements (GUR) can be found from their respective websites provided by the University

Intended Learning Outcomes of BEM programme

To ensure fulfilment of the goal of developing all-round students with professional competence stipulated by the University, it is required that outcome statements encompass the following two categories of learning outcomes:-

A. Professional/Academic Knowledge and Competence

Upon successful completion of the programme, the graduate is expected to action the following abilities:-

- (i) To possess knowledge of building engineering principles, processes and methods for the successful completion of all types of construction projects.
- (ii) To use the techniques, skills and engineering principles for different types of construction.
- (iii) To apply construction management knowledge and skills in personnel, financial and operational practices and communication aspects required for efficient building production.
- (iv) To identify, structure and analyse diverse problems arising from the changing social, economic, environmental and technological pressures.
- (v) To solve identified construction problems with appropriate solutions.
- (vi) To evaluate alternative strategic options.
- (vii) To select appropriate construction materials, practices and methods in compliance with sustainable development.
- (viii) To exercise professional judgement in the consideration of alternatives in complex situations.

B. Attributes for All-roundedness

As all undergraduate programmes are under the CMI Scheme, the attributes for all-roundedness listed are the same under the scheme.

Upon successful completion of the programme, the students are expected to possess the following attributes for all-roundedness:-

- (i) To possess skills to identify, analyse and solve problems.
- (ii) To have an understanding of professional, social and ethical responsibilities.
- (iii) To communicate effectively.
- (iv) To reflect on knowledge gap for life time learning.
- (v) To contribute as team member and to lead effectively.
- (vi) To identify contemporary issues.

Relationship between the programme intended learning outcomes (PILOs) of the BEM and the Institutional learning outcomes of PolyU

ILOs of BEM Programme (Category A)	Institutional Learning Outcomes				
	Socially responsible leaders with a strong sense of national pride and a global outlook	Future-ready professionals who possess technical acumen	Critical thinkers and creative problem solvers	Effective communicators and collaborators	Adaptable and resilient lifelong learners
(i)	X	X	X	X	
(ii)		X	X	X	X
(iii)			X	X	
(iv)	X		X		X
(v)		X	X		
(vi)			X	X	X
(vii)	X				X
(viii)			X	X	X
ILOs of BEM Programme (Category B)	Socially responsible leaders with a strong sense of national pride and a global outlook	Future-ready professionals who possess technical acumen	Critical thinker and creative problem solvers	Effective communicators and collaborators	Adaptable and resilient lifelong learners
(i)		X	X	X	
(ii)	X	X	X	X	X
(iii)			X	X	X
(iv)	X	X			X
(v)	X	X	X	X	
(vi)		X	X	X	

Curriculum Mapping: BSc (Hons) in Building Engineering & Management

This curriculum map gives a holistic view of the degree to which each intended learning outcome will be taught and assessed in your programme.

The following indicators (I, R, A) to show the treatment of the programme outcome in a subject:

I	(Introduced)	That the learning leading to the particular intended outcome is introduced in that subject.
R	(Reinforced)	That the learning leading to the particular intended outcome is reinforced in that subject.
A	(Assessed)	That the performance which demonstrates the particular intended outcome is assessed in that subject

BRE299	Work-Integrated Education (WIE)	-	-	-	-	-	CMI/ Employers / IC	2.0	2 training credits	100%	-

- NOTE:**
1. Students must meet the Language and Communication Requirements (LCR); otherwise the students are required to take additional LCR subjects.
 2. Students must complete and pass the 6 credits CAR subjects to meet the requirements for 9 credits GUR, and all the subjects listed in Level 2, Level 3, and Level 4 in Stages 3 and 4 prior to their graduation.
 3. Students must complete the Work-Integrated Education (WIE) with satisfactory results before they can graduate.

* International Study Tour is to take place in the Summer Semester. Students need to commence preparation, organization and liaison work of their study tour from Semester 1 of Stage 3.

T/S = Tutorial/Seminar

Lab. (Pract.) = Laboratory (Practical)

PW = Project Work

CW = Coursework

GS = Guided Study

CA = Continuous Assessment

BRE4281	Construction Engineering Management
BRE4393	Temporary Work Design (cont'd)
BRE466	Capstone Project
BRE462	Advanced Construction Technology

Notes:

1. Senior year intake students need to take (non-credit-bearing) Essential Components of General Education and should be completed in the first year of study.
2. * Senior year intake students need to take 2 CAR subjects (6 credits) with 3 credits from the subjects offered in cluster CAR (M) - Chinese History and Culture, and another 3 credits from the subjects in cluster CAR (A) - English Language Subject with embedded English Reading and Writing Requirements. CAR (A) should be completed in the first year of study.
3. Service-Learning Subject (SL) is a compulsory subject in senior year curriculum and the credits are not transferrable.
4. ** Planning for study tour, field study or comparative study shall be commenced from Semester 1 of year 1. The study tour or field study is expected to be arranged and completed by the end of Year 1 and assessment to be finalized by Semester 1 of year 2.
5. All CMI Level 3 and Level 4 subjects of a particular Major or discipline offered in Semester two are available as electives to students of another Major or discipline within the Department, subject to subject offering schedule, fulfilment of pre-requisite and/or co-requisite requirements and time-tabling constraints. (Note: not applicable for SYB)
6. *** The Department reserves the rights to review/revise the subjects to be offered and the time of offer.

BSc (Hons) in Property Management

Subject Descriptions

‘Level’ codes reflect the intellectual demand on the students. The levels of subjects are coded according to a common coding system of the Hong Kong Polytechnic University.

Level Code Explanation

- | | | |
|---|---|--|
| 1 | = | Some subject intended learning outcomes are at the exit level for Associate Degree/Higher Diploma; intended to be taken during year 1 of a 4-year degree programme or year 1 of an Associate Degree/Higher Diploma programme; usually have no pre-requisite. |
| 2 | = | The majority of the subject intended learning outcomes are at the exit level for Associate Degree/Higher Diploma; intended to be taken during year 2 of a 4-year degree programme or the final year of an Associate Degree/Higher Diploma programme; some subjects at this level may have prerequisites. |
| 3 | = | Some subject intended learning outcomes are at the exit level for Bachelor’s degree while the rest at the exit level for Associate Degree/Higher Diploma; intended to be taken during year 3 of a 4-year degree programme; usually require the completion of subjects at the preceding levels as a prerequisite. |
| 4 | = | The majority of the subject intended learning outcomes are at The exit level for Bachelor’s degree while the rest at the exit level for Associate Degree/Higher Diploma; intended to be taken during the final year of a 4-year degree programme; usually require the completion of subjects at the preceding levels as a pre-requisite. |

The **typical progression patterns of BSc (Hons) in Property Management** illustrate the semesters in which these subjects are recommended to be taken, if the programme of the Major is to be completed in the minimum time.

‘*Electives*’ are those subjects which are optional. These give students some choices in composing their study programme.

NOTE

***Programme Curriculum displays the Major Requirements for the Major in Property Management only.**

Details of the General University Requirements (GUR) can be referred to their respective websites provided by the University

Intended Learning Outcomes of PMT programme

To ensure fulfilment of the goal of developing all-round students with professional competence stipulated by the University, it is required that outcome statements encompass the following two categories of learning outcomes:-

A. Professional/Academic Knowledge and Competence

Upon successful completion of the programme, the graduate is expected to action the following abilities:-

- (i) To apply professional and vocational knowledge in property management, including its operational logistics and multi-disciplinary facets.
- (ii) To identify and solve problems in property management practices.
- (iii) To communicate effectively with social skills as a competent property manager.
- (iv) To practice as a professional property manager in compliance with the legal and ethical requirements of the profession.
- (v) To appreciate the multidisciplinary dimensions of property management practices and the interests of the stakeholders in the industry.
- (vi) To explore options for the property management practices with creative and critical mind-set.

B. Attributes for All-roundedness

As all undergraduate programmes are under the CMI Scheme, the attributes for all-roundedness listed are the same under the scheme.

Upon successful completion of the programme, the students are expected to possess the following attributes for all-roundedness:-

- (i) To possess skills to identify, analyse and solve problems.
- (ii) To have an understanding of professional, social and ethical responsibilities.
- (iii) To communicate effectively.
- (iv) To reflect on knowledge gap for life time learning.
- (v) To contribute as team member and to lead effectively.
- (vi) To identify contemporary issues.

Relationship between the programme intended learning outcomes (PILOs) of the PMT and the Institutional learning outcomes of PolyU

ILOs of PMT Programme (Category A)	Institutional Learning Outcomes				
	Socially Responsible leaders with a strong sense of national pride and a global outlook	Future-ready professionals who possess technical acumen	Critical Thinkers and creative problem solvers	Effective Communicators And collaborators	Adaptable and resilient lifelong Learners

BSc (Hons) in Surveying

Subject Descriptions

‘Level’ codes reflect the intellectual demand on the students. The levels of the subjects are coded according to a common coding system of the Hong Kong Polytechnic University.

Level Code Explanation

- | | | |
|---|---|--|
| 1 | = | Some subject intended learning outcomes are at the exit level for Associate Degree/Higher Diploma; intended to be taken during year 1 of a 4-year degree programme or year 1 of an Associate Degree/Higher Diploma programme; usually have no pre-requisite. |
| 2 | = | The majority of the subject intended learning outcomes are at the exit level for Associate Degree/Higher Diploma; intended to be taken during year 2 of a 4-year degree programme or the final year of an Associate Degree/Higher Diploma programme; some subjects at this level may have prerequisites. |
| 3 | = | Some subject intended learning outcomes are at the exit level for Bachelor’s degree while the rest at the exit level for Associate Degree/Higher Diploma; intended to be taken during year 3 of a 4-year degree programme; usually require the completion of subjects at the preceding levels as a prerequisite. |
| 4 | = | The majority of the subject intended learning outcomes are at The exit level for Bachelor’s degree while the rest at the exit level for Associate Degree/Higher Diploma; intended to be taken during the final year of a 4-year degree programme; usually require the completion of subjects at the preceding levels as a pre-requisite. |

The **typical progression patterns of BSc (Hons) in Surveying** illustrate the semesters in which these subjects are recommended to be taken, if the programme of the Major is to be completed in the minimum time.

NOTE

***Programme Curriculum displays the Major Requirements for the Major in Surveying only.**

Details of the General University Requirements (GUR) can be found from their respective websites provided by the University.

Intended Learning Outcomes of Surveying programme

To ensure fulfilment of the goal of developing all-round students with professional competence stipulated by the University, it is required that outcome statements encompass the following two categories of learning outcomes:-

A. Professional/Academic knowledge and competencies

Upon successful completion of the programme, the students are expected to attain the following abilities:-

- (i) To comprehend and identify issues and problems concerning land, property and construction at project level.
- (ii) To comprehend and identify issues and problems concerning land, property and construction at corporate level.
- (iii) To comprehend and identify issues and problems concerning land, property and construction at industry level.
- (iv) To comprehend and identify issues and problems concerning land, property and construction at macro social-economic and political level.
- (v) To advise clients through rendering surveying services.
- (vi) To identify, formulate and solve problems related to the surveying profession and real estate industry.
- (vii) To analyse and interpret data of the industry.
- (viii) To formulate and implement strategies, policies and solutions for sustainable development and construction.

B. Attributes for All-roundedness

As all undergraduate programmes are under the CMI Scheme, the attributes for all-roundedness listed are the same under the scheme.

Upon successful completion of the programme, the students are expected to possess the following attributes for all-roundedness:-

- (i) To possess skills to identify, analyse and solve problems.
- (ii) To have an understanding of professional, social and ethical responsibilities.
- (iii) To communicate effectively.
- (iv) To reflect on knowledge gap for life time learning.
- (v) To contribute as team member and to lead effectively.
- (vi) To identify contemporary issues

BRE464	Urban Planning

Notes:

1. Senior year intake students need to take (non-credit-bearing) Essential Components of General Education) and should be completed in the first year of study.
2. Senior year intake students need to take 2 CAR subjects (6 credits) with 3 credits from the subjects offered in cluster CAR (M) - Chinese History and Culture, and another 3 credits from the subjects in cluster CAR (A) - English Language Subject with embedded English Reading and Writing Requirements. CAR (A) should be completed in the first year of study.
3. Service-Learning Subject (SL) is a compulsory subject in senior year curriculum and the credits are not transferrable.
4. ** Planning for study tour, field study or comparative study shall be commenced from Semester 1 of year 1. The study tour or field study is expected to be arranged and completed by the end of Year 1 and assessment to be finalized by Semester 1 of year 2.
5. All CMI Level 3 and Level 4 subjects of a particular Major or discipline offered in Semester two are available as electives to students of another Major or discipline within the Department, subject to subject offering schedule, fulfilment of pre-requisite and/or co-requisite requirements and time-tabling constraints. (Note: not applicable for SYB)
6. *** The Department reserves the rights to review/revise the subjects to be offered and the time of offer.

General University Requirements (GUR) and Curriculum Framework for Senior Year Programmes

Areas	Credits
Cluster-Area Requirements (CAR) 3 credits from CAR (M) “Chinese History and Culture” 3 credits from specially designed CAR (A) English Language Subject with embedded English Reading and Writing Requirements - Students are required to fulfil the English and Chinese Reading & Writing Requirements	6
Service-Learning (SL)	3
(New) Essential Components of General Education E-modules on: - Academic Integrity - Artificial Intelligence and Data Analytics - Innovation and Entrepreneurship - National Education	Non-credit-bearing
Language and Communication Requirements (LCR) Having met the equivalent standard of the Undergraduate Degree Language and communication Requirement (LCR)	
Total	9

No further credit transfer will be given to the required GUR unless the student is admitted on qualifications more advanced than Associate Degree/Higher Diploma and has also completed comparable components in their earlier studies.

*Students not meeting the equivalent standard of the Undergraduate Degree LCR will be required to take additional LCR subjects. These students will have to take in an assessment test to ascertain the LCR subjects required.

*The admission of students to UGC-funded Articulation Degree programmes and Senior Year intakes on the basis of qualification(s) more advanced than Associate Degree/Higher Diploma is subject to the conditions stipulated by UGC governing the UGC-funded Senior Year places

5. Assessment

Assessment plays an important role in enhancing students' learning. Assessment is the process of finding out and putting a value on a student's achievements in studying a programme. It is a means to measure the learning outcomes/goals of a subject/programme. With the movement from a norm-referenced to a criterion-referenced model of measurement in this University, students are assessed and measured of their performance against an explicit set of standards. Therefore, the prime objective of assessment is to enable students to demonstrate their abilities in attaining the intended learning outcomes and fulfilling the intended learning outcomes and requirements of a subject/programme. Assessment is also served as feedback both to students of their performance and learning in progress and attainment of the subject/programme and to the teaching faculty of their teaching.

Different assessment methods including formative and summative assessments are adopted as deemed appropriate to the subjects depending on the natures of the subject disciplines and the alignment of the intend learning outcomes of the courses. The assessment methods are contained therein in the subject specifications, which are distributed to all students in the beginning of the academic year. It is also reinforced by the subject lecturers by informing the students at the learning commencement on the assessment modes, standards and criteria.

With the move to criterion-referenced assessment, rubrics are developed to assess student performance with a scoring scale along a task-specific continuousness of criteria for some subjects. Students' work is evaluated against scoring standards/criteria. Rubrics must be specified for all major assessment items at the subject level, made available to students before the assessment, and used for grading the assessment. As a rule of thumb:

- (i) For subjects without examinations, rubrics should be required for single assessment items with a weighting of 30% or above of the subject's overall assessment.
- (ii) For subjects with examinations, rubrics should be required for single assessment items with a weighting of 20% or above of the subject's overall assessment.

In most other subjects, the student performance in each subject is assessed through a combination of coursework and examination. Weightings are allocated to coursework and examination of a subject, e.g. 30% and 70%, 40% and 60% or 50% and 50% respectively. Coursework includes assignments, case studies, seminar/tutorial presentation, role-playing, fieldwork, tests and other forms of learning activities. Grades will be assigned to reflect both individual contribution and group effort in the case it is not an individual piece of work. Examination is an end of unit/subject assessment. Grades are usually awarded to the written examinations. Marking schemes are provided to ensure assessment and grading on student performance are based on criteria and standards. The quality of examination papers and marking schemes is scrutinized by the external examiners and departmental academic advisor.

Other than projects and dissertation, where appropriate, some subjects can employ 100% continuous assessment. Usually, students are assessed in their performance attainment of technical skills over an extended period of time, for example, measurement, estimating & documentation, and engineering surveying.

In the case of group projects, both aggregating grades and assigning grades are given to group effort and individual contribution in a group. This is to ensure that there will be no 'non performer'. Moreover, peer interactive learning in project proposal/solutions, and different components of the project, presentations, reports and communication are included in the grading for the group effort.

5.1 **Assessment Method**

Students' performance in a subject is assessed by either of the following methods:-

- (a) Coursework only: To pass a subject by this method, a student must attain a minimum Grade 'D' in coursework (tests, assignments, projects, laboratory work, field exercises, presentations and other forms of classroom participation).
- (b) Examination and Coursework (the weighting of each component is stated in the Subject Portfolio): To pass a subject by this method a student must attain a minimum Grade 'D' in coursework and a minimum Grade 'D' in the examination.
- (c) Continuous Assessment: Both **Project-based** and **Capstone Project** are of this type of assessment where students are assessed through a period of time with stages of work and progress together with the final products of works. The 'Guidance Notes for the Capstone projects' detailed the assessment and process.

Assessment methods and parameters are determined by the Subject Leader who will inform the students of the details at the beginning of each semester.

Grading (in accordance with C1-8 General Assessment Regulations of AR Handbook on Academic Regulations and Procedures)

At the end of each semester, students will be informed of the grade achieved for each subject normally.

Assessment grades shall be awarded on a criterion-reference basis. A student's overall performance in a subject shall be graded as follows:-

<i>Subject Grade</i>	<i>Short Description</i>	<i>Elaboration on subject grading description</i>
A+ A A-	Excellent	Demonstrates excellent achievement of intended subject learning outcomes by being able to skilfully use concepts and solve complex problems. Shows evidence of innovative and critical thinking in unfamiliar situations, and is able to express the synthesis or application of ideas in a logical and comprehensive manner.
B+ B B-	Good	Demonstrates good achievement of intended subject learning outcomes by being able to use appropriate concepts, and solve problems. Shows the ability to analyse issues critically and make well-grounded judgements in familiar or standard situations, and is able to express the synthesis or application of ideas in a logical and comprehensive manner.
C+ C C-	Satisfactory	Demonstrates satisfactory achievement of intended subject learning outcomes by being able to solve relatively simple problems. Shows some capacity for analysis and making judgements in a variety of familiar and standard situations, and is able to express the synthesis or application of ideas in a manner that is generally logical but fragmented.
D+ D	Pass	Demonstrates marginal achievement of intended subject learning outcomes by being able to solve relatively simple problems. Can make basic comparisons, connections and judgements and express the ideas learnt in the subject, though there are frequent breakdowns in logic and clarity.
F	Fail	Demonstrates inadequate achievement of intended subject learning outcomes through a lack of knowledge and/or understanding of the subject matter. Evidence of analysis is often irrelevant or incomplete.

Note:

- Marking rubrics aligned with these Grade Descriptors need not include all aspects of the grade descriptor.
- Marking rubrics aligned with these Grade Descriptors may include other aspects aligned with particular subject matter or field of study requirements but are not included in the grade descriptor.

'F' is a subject failure grade, whilst all others (from 'D' to 'A+') are subject passing grades. No credit will be earned if a subject is failed.

The grade points assigned to subject grades attained by students are as follows:

Grade	New Grade Point	Short Description
A+	4.3	Excellent
A	4.0	
A-	3.7	
B+	3.3	Good
B	3.0	
B-	2.7	
C+	2.3	Satisfactory
C	2.0	
C-	1.7	
D+	1.3	Pass
D	1.0	
F	0.0	Failure

At the end of each semester/term, a Grade Point Average (GPA) will be computed based on the grade point of the subject overall grade as follows:-

$$GPA = \frac{\sum_{n=1}^N \text{Subject Grade Point}_n \times \text{Subject Credit Value}_n}{\sum_{n=1}^N \text{Subject Credit Value}_n}$$

where N = number of all subjects (inclusive of failed subjects) taken by the student up to and including the latest semester/term. For subjects which have been retaken, only the grade point obtained in the final attempt will be included in the GPA calculation

In addition, the following subjects will be excluded from the GPA calculation:-

- (i) Exempted subjects
- (ii) Ungraded subjects
- (iii) Incomplete subjects
- (iv) Subjects for which credit transfer has been approved, but without any grade assigned¹
- (v) Subjects from which a student has been allowed to withdraw (i.e. those with the code 'W')

Subject which has been given an "S" code, i.e. absent from all assessment components, will be included in the GPA calculation and will be counted as "zero" grade point. GPA is thus the unweighted cumulative average calculated for a student, for all relevant subjects taken from the start of the programme to a particular reference point of time. GPA is an indicator of overall performance, and ranges from 0.00 to 4.30 from 2020/21.

¹ Subjects taken in PolyU or elsewhere and with grades assigned, and for which credit transfer has been approved, will be included in the GPA calculation.

The Weighted GPA will be used as a guide to help determine award classifications, and the level weighting to different subjects of all disciplines and programmes will need to be specified in the Programme Requirement Document.

Weighted GPA will be computed as follows:-

$$\text{Weighted GPA} = \frac{\sum_{n=1}^N \text{Subject Grade Point}_n \times \text{Subject Credit Value}_n \times W_n}{\sum_{n=1}^N \text{Subject Credit Value}_n \times W_n}$$

where W_n = weighting to be assigned according to the level of the subject

N = number of all subjects counted in GPA calculation as set out in Section 5, except those exclusions specified below

For calculating the Weighted GPA (and award GPA) to determine the Honours classification of students who satisfy the graduation requirements of Bachelor's degree awards, a university-wide standard weighting¹ will be applied to all subjects of the same level, with a weighting of 2 for Level 1 and 2 subjects, a weighting of 3 for Level 3 and 4 subjects. Same as for GPA, Weighted GPA is ranges from 0.00 to 4.30 from 2020/21.

Any subjects passed after the graduation requirement has been met will not be taken into account of in the grade point calculation for award classification.

Progression/Academic Probation/De-registration

The Board of Examiners shall, at the end of each semester (except for Summer Term unless there are students who are eligible to graduate after completion of Summer Term study is mandatory for the programme), determine whether each student is

- (i) eligible for progression towards an award; or
- (ii) eligible for an award; or
- (iii) required to be de-registered from the programme

When a student has a Grade Point Average (GPA) lower than 1.70, he will be put on academic probation in the following semester. If a student is able to pull his GPA up to 1.70 or above at the end of the semester, the status of “academic probation” will be lifted. The status of “academic probation” will be reflected on e-student but not in transcript of studies.

¹ Requests for deviation from this University-wide standard require specific approval by the APRC.

A student will have 'progressing' status unless he falls within any one of the following categories which shall be regarded as grounds for de-registration from the programme:-

- (i) the student has reached the final year of the normal period of registration for that programme, as specified in the Programme Requirement Document, unless approval has been given for extension ; or
- (ii) the student has reached the maximum number of retakes allowed for a failed compulsory subject; or
- (iii) the student's GPA is lower than 1.70 for two consecutive semesters and his Semester GPA in the second semester is also lower than 1.70; or
- (iv) the student's GPA is lower than 1.70 for three consecutive semesters.

When a student falls within any of the categories as stipulated above, except for category (i) with approval for extension, the Board of Examiners shall de-register the student from the programme without exception.

A student may be de-registered from the programme enrolled before the time frame specified above, if his academic performance is poor to the extent that the Board of Examiners deems that his chance of attaining a GPA of 1.70 at the end of the programme is slim or impossible.

The progression of students to the following academic year will not be affected by the GPA obtained in the Summer Term, unless Summer Term study is mandatory for all students of the programme and constitutes a requirement for graduation, and is so specified in the Programme Requirement Document.

If the student is not satisfied with the de-registration decision of the Board of Examiners, he can lodge an appeal. All such appeal cases will be referred directly to the Academic Appeals Committee (AAC) for final decision. Views of Faculties/Schools/Departments will be sought and made available to AAC for reference.

5.2 **Retaking of Subjects**

Students may only retake a subject which they have failed (i.e. Grade F or S or U). Retaking of subjects is with the condition that the maximum study load of 21 credits per semester is not exceeded. In cases where a student takes another subject to replace a failed elective subject, the fail grade will be taken into account in the calculation of the GPA, despite the passing of the replacement subjects.

The number of retakes of a subject should be restricted to two, i.e. a maximum of three attempts for each subject is allowed. Students need to submit a request to the Faculty/School Board for the second retake of a failed subject. Students who have failed a compulsory subject after two retakes and have been de-registered can submit an appeal to the Academic Appeals Committee (AAC) for a third chance of retaking the subject. In case AAC does not approve further retakes of a failed compulsory subject or the taking of an equivalent subject with special approval from the Faculty, the student concerned would be de-registered and the decision of the AAC shall be final within the University.

5.3 **Appeals**

Appeals against the decision of the Subject Assessment Review Panel must be made within one calendar week after the public announcement of the examination results. A student should make the appeal to the Head of the CMI Department. The Department will inform the student of the appeal result and, if the appeal is successful, the Department will inform the Faculty.

6. Progression and Award

6.1 Progression

A student will have 'progressing' status unless he falls within the following categories, either of which may be regarded as grounds for deregistration from the programme:-

- (i) the student has exceeded the maximum period of registration for that programme, as specified in the Programme Requirement Document (applicable to students admitted in or before 2019/20); or
- (ii) the student has reached the final year of the normal period of registration for that programme, as specified in the Programme Requirement Document, unless approval has been given for extension (applicable to students admitted in or after 2020/21); or
- (iii) the student has reached the maximum number of retakes allowed for a failed Compulsory subject; or
- (iv) the student's GPA is lower than 1.70 for two consecutive semesters and his/her Semester GPA in the second semester is also lower than 1.70; or
- (v) the student's GPA is lower than 1.70 for three consecutive semesters.

6.2 Graduation Requirements

A student will be eligible for award if all the following conditions are satisfied:-

- (i) accumulation of the requisite number of credits for the particular award, as defined in the definitive programme document; and
- (ii) satisfying the residential requirement for at least one third of the credits required for the award to be completed under the current enrolment at PolyU; and
- (iii) satisfying the National Education (NE) requirement¹ (applicable to students admitted in or after 2022/23)
- (iv) satisfying the Academic Integrity and Ethics (AIE) requirement (applicable to students admitted in or after 2024/2025); and
- (iv) satisfying all requirements as defined in the definitive programme document and as specified by the University; and
- (v) having a Grade Point Average (GPA) of 1.70 or above at the end of the programme.

A student is required to graduate as soon as all the conditions for award are satisfied.

¹ All students enrolling on offshore programmes (regardless of their nationality) will be waived from the NE requirement. NE requirement can also be waived for students who are non-HK residents enrolling on online programmes on a case-by-case basis, i.e. if they submit a request to ask for a waiver. Waiver should not be granted to students enrolling on online programme who are residing in HK or have the right of abode in HK.

6.3 **Guidelines for Award Classification**

The following are guidelines for the Boards of Examiners when determining award classifications. The BoE will exercise its judgement as to the award for each student and may use other relevant information.

Honours Degree	Guidelines
1 st	The student's performance/attainment is outstanding, and identifies him as exceptionally able in the field covered by the programme in question.
2:i	The student has reached a standard of performance/attainment, which is more than satisfactory but less than outstanding.
2:ii	The student has reached a standard of performance/attainment judged to be satisfactory, and clearly higher than the "essential minimum" required for graduation.
3 rd	The student has attained the "essential minimum" required for graduation at a standard ranging from just adequate to just satisfactory.

The following table indicates the ranges of award GPA for determining award classifications:

Honours classification	All other programmes	Award GPA
1st	Distinction	3.60 – 4.30
2:i	Credit	3.00 – 3.59
2:ii	Pass	2.40 – 2.99
3rd		1.70 – 2.39

A Pass-without-Honours degree award will be recommended only under exceptional circumstances, when the student has demonstrated a level of final attainment which is below the 'essential minimum' required for graduation with Honours from the programme in question, but when he has nonetheless covered the prescribed work of the programme in an adequate fashion, while failing to show sufficient evidence of the intellectual calibre expected of Honours degree graduates.

Subject Portfolio

Level 2 Subjects:

BRE204 Structure I

BRE299 Work- Integrated Education

Level 3 Subjects:

BRE302	Structure II
BRE315	Property Valuation
BRE326	Maintenance Technology & Management
BRE336	Development Control Law
BRE337	Property Law
BRE345	Measurement, Documentation & Estimating
BRE349	Building Services I
BRE350	Project Management and Procurement
BRE362	Urban Economics and Property Investment
BRE363	Construction Economics
BRE364	Construction Contract Law and Administration
BRE365	International Study
BRE366	Analytical Skills and Methods
BRE369	Integrated Professional Workshop II
BRE370	Intermediate Construction Technology & Materials
BRE371	Introduction Property Management
BRE397	Property Management Accounting

Level 4 Subjects:

BRE415	Dispute Resolution
BRE418	Real Estate Development
BRE426	Geotechnical and Foundation Engineering
BRE427	Applied Property Investment
BRE4281	Construction Engineering Management
BRE4291	Real Estate Marketing
BRE431	Housing Studies
BRE435	Design, Adaptation and Conversion
BRE436	Applied Property Valuation
BRE437	Facility Management
BRE439	Engineering Contract Procedure
BRE4393	Temporary Work Design
BRE440	Cost and Value Management
BRE442	Forecasting & Competition in the Built Environment
BRE453	Building Services II
BRE461	Environmental Impact and Assessment
BRE462	Advanced Construction Technology
BRE463	Business Valuation and Accounts
BRE464	Urban Planning (Workshops)
BRE465	Asset Management
BRE466	Capstone Project
BRE469	Integrated Professional Workshop III
BRE471	Advanced Property Management
BRE472	Information Technology and Building Information Modelling for Construction Management

Service Teaching:

AMA1110	Basic Mathematics I – Calculus and Probability & Statistics
AMA290	Engineering Mathematics
APSS118	Self Understanding and Communication Skills
APSS4533	Health and Society
CLC3231P	Chinese Communication for Construction and Land Use
CSE20290	Introduction to Geotechnology
ELC3421	English for Construction and Environmental Professionals
LSGI2961	Engineering Surveying
