Center members had a meeting with Michael Quilligan from University of Limerick on the collaborative project of high-resolution-camera-based congested traffic load monitoring of Ting Kau Bridge

On 15 May, Center members had a meeting with Michael Quilligan from University of Limerick on the collaborative project of high-resolution-camera-based congested traffic load monitoring of Ting Kau Bridge. The recent progress on this project were introduced by both sides and a full proposal was prepared to Highways Department. The application of European Commission/Research Grants Council Collaborative Scheme 2017/18-I was also discussed during the meeting.
