### **Seminar on Recent developments on Real-time model updating**

Prof. Kelvin Yuen (Faculty of Science and Technology, University of Macau) paid a visit to our Center and delivered a seminar “Recent developments on Real-time model updating” to our team members on 4 September 2017.

Prof. Yuen received his PhD. in Civil Engineering, California Institute of Technology, USA (2002) and his research area includes inference, structural health monitoring, structural control, reliability of engineering system.

In the seminar, Prof. Yuen talked about the advances in Bayesian real-time model update and elaborated with some examples. A fruitful discussion was followed after the seminar.

Prof. Ni Y. Q. (Director of the CNERC-Rail) introduced Prof. Yuen in the seminar
