

CNERC-Rail member attended the International Conference of Railways 2018 held in Barcelona, Spain

During 3-7 September 2018, Dr. Xiao Wang, Research Associate of CNERC-Rail, attended the International Conference of Railways 2018 held in Barcelona Spain. The conference involved more than 500 international delegates from railway bureaus, industrial companies and research institutes. Dr. Xiao Wang gave a presentation on “On-board Condition Monitoring of High-speed Train During Route Operations” in the Normal Session of “R0701-Condition Monitoring and Planning”. This presentation shared the previous work and research findings relating to the design and practice of condition monitoring system for in-service high-speed trains.

In addition, Dr. Wang was also invited to co-chair with Prof. Hitoshi Tsunashima and Prof. Yujin Lim for two Normal Sessions: “R0703-Condition Monitoring and Planning” and “R0704-Condition Monitoring and Planning”, at which 14 researchers presented their research findings. Experience and research relating to “Condition Monitoring” were shared and discussed among those researchers in the two sessions.
