

## Visit of Goldwave Steel Structures Engineering Limited

2021.04.07

Mr. Victor So and Mr. Alan Li Goldwave Steel Structures Engineering Limited visited CNERC on 7 April 2021. They visited the Structural Engineering Research Laboratory, Laboratory Y001, of the PolyU, and inspected the research and testing capabilities of CNERC for large scale structural tests. Both of them were introduced on a number of research and development projects on high strength S690 and S960 steels.

Prof. K. F. Chung reported the latest research activities and achievements of CNERC, and both Mr. Victor So and Mr. Alan Li expressed interests to collaborate with CNERC on the following:

- use of high strength S690 and S960 steels in construction;
- training of experienced welders on high strength steels; and
- development of innovative engineering applications for building structures.
