

## Subject Description Form

<b>Subject Code</b>	COMP2011					
<b>Subject Title</b>	Data Structures					
<b>Credit Value</b>	3					
<b>Level</b>	2					
<b>Pre-requisite / Co-requisite / Exclusion</b>	<b>Pre-requisite:</b> COMP1011/COMP1012/ENG2002					
<b>Objectives</b>	<p>The objectives of this subject are to:</p> <ol style="list-style-type: none"> <li>1. introduce students to basic concepts of data structures and algorithms; and</li> <li>2. teach students to apply simple data structures and algorithms in developing computer programs.</li> </ol>					
<b>Intended Learning Outcomes</b>	<p>Upon completion of the subject, students will be able to:</p> <ol style="list-style-type: none"> <li>(a) understand the properties of basic data structures;</li> <li>(b) identify the strengths and weaknesses of different data structures;</li> <li>(c) acquire specialised knowledge of various typical algorithms;</li> <li>(d) design and employ appropriate data structures and algorithms for developing computer applications; and</li> <li>(e) think critically for improvement in the solutions.</li> </ol>					
<b>Subject Synopsis/ Indicative Syllabus</b>	<table border="1" style="width: 100%;"> <tr> <td style="text-align: center;"><b>Topic</b></td> </tr> <tr> <td> <p><b>1. Programming and Algorithms</b></p> <p>Computer algorithms; types of algorithms; data structures; and abstract data types.</p> </td> </tr> <tr> <td> <p><b>2. Data Structures: Representation and Algorithms</b></p> <p>Linear structures: linked-lists, stacks, queues; tree structures: binary trees, balanced trees, tree traversals; and other common data structures: priority queues, heaps.</p> </td> </tr> <tr> <td> <p><b>3. Sorting</b></p> <p>Basic sorting algorithms: bubble sort, insertion sort, selection sort; and advanced sorting algorithms: quicksort, mergesort, heapsort.</p> </td> </tr> <tr> <td> <p><b>4. Searching</b></p> <p>Common searching algorithms: sequential search, binary search; and advanced searching algorithms: tree search, dictionary and hashing.</p> </td> </tr> </table>	<b>Topic</b>	<p><b>1. Programming and Algorithms</b></p> <p>Computer algorithms; types of algorithms; data structures; and abstract data types.</p>	<p><b>2. Data Structures: Representation and Algorithms</b></p> <p>Linear structures: linked-lists, stacks, queues; tree structures: binary trees, balanced trees, tree traversals; and other common data structures: priority queues, heaps.</p>	<p><b>3. Sorting</b></p> <p>Basic sorting algorithms: bubble sort, insertion sort, selection sort; and advanced sorting algorithms: quicksort, mergesort, heapsort.</p>	<p><b>4. Searching</b></p> <p>Common searching algorithms: sequential search, binary search; and advanced searching algorithms: tree search, dictionary and hashing.</p>
<b>Topic</b>						
<p><b>1. Programming and Algorithms</b></p> <p>Computer algorithms; types of algorithms; data structures; and abstract data types.</p>						
<p><b>2. Data Structures: Representation and Algorithms</b></p> <p>Linear structures: linked-lists, stacks, queues; tree structures: binary trees, balanced trees, tree traversals; and other common data structures: priority queues, heaps.</p>						
<p><b>3. Sorting</b></p> <p>Basic sorting algorithms: bubble sort, insertion sort, selection sort; and advanced sorting algorithms: quicksort, mergesort, heapsort.</p>						
<p><b>4. Searching</b></p> <p>Common searching algorithms: sequential search, binary search; and advanced searching algorithms: tree search, dictionary and hashing.</p>						

	<p><b>5. Applications</b></p> <p>Practical program development using combination of various data structures and algorithms, e.g., friends-book; and efficiency of the various approaches.</p>						
<b>Teaching/ Learning Methodology</b>	<p>The course material will be delivered as a combination of mass lectures and small group supervised tutorial and laboratory sessions. Lectures will provide the required knowledge while tutorials and laboratory sessions allow students to acquire hands-on experience on programming with different algorithms. Programming project provides students with a chance to integrate their knowledge on applying appropriate data structures and algorithms to solve practical problems.</p>						
<b>Assessment Methods in Alignment with Intended Learning Outcomes</b>	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed				
			a	b	c	d	e
	<b>Continuous Assessment</b>	<b>60%</b>					
	1. Laboratory Exercises	20%	✓		✓	✓	
	2. Programming Project	20%	✓	✓	✓	✓	✓
	3. Test	20%	✓	✓	✓	✓	
	<b>Examination</b>	<b>40%</b>	✓	✓	✓	✓	✓
Total	100%						
<b>Student Study Effort Expected</b>	Class contact:						
	▪ Lecture				39 Hrs.		
	▪ Tutorial/Lab				13 Hrs.		
	Other student study effort:						
	▪ Assignments, Quizzes, Projects, Self-study				55 Hrs.		
Total student study effort				107 Hrs.			
<b>Reading List and References</b>	<p><b>Reference Books:</b></p> <ol style="list-style-type: none"> <li>Goodrich, Michael T., Tamassia, Roberto, and Goldwasser, Michael H., <i>Data Structures and Algorithms in Java</i>, 6<sup>th</sup> Edition, Wiley, 2014.</li> <li>Sedgewick, Robert and Wayne, Kevin, <i>Algorithms</i>, 4<sup>th</sup> Edition, Addison-Wesley, 2011.</li> <li>Cormen, Thomas H., Leiserson, Charles E., Rivest, Ronald L. and Stein, Clifford, <i>Introduction to Algorithms</i>, 3<sup>rd</sup> Edition, MIT Press, 2009.</li> </ol>
