Subject Description Form

Subject Code	COMP3S02
Subject Title	Socially Responsible Global Leadership in a Digital World
Credit Value	3
Level	3
Pre-requisite / Co-requisite/ Exclusion	Nil
Objectives	The objectives of this subject are to:
	 introduce the concepts of socially responsible leadership and global leadership, and to facilitate students to practice and demonstrate these competencies in practice; raise students' awareness of the impact of technology on community, and how technology can be responsibly used for social betterment; educate students about different mental models of leadership and global citizenship, and to facilitate them to identify their own models and the impact on their own social interactions and leadership; acquaint students with skills and competencies necessary for interacting with diverse groups of people, and to facilitate them to practice these skills and competencies develop students' sensitivity and empathy to people different from oneself nurture students' sense of civic responsibility and engagement.
Intended Learning Outcomes	 Upon completion of the subject, students will be able to: (a) identify and demonstrate attributes and competencies required of responsible global leaders (application) (b) describe the influence of technology on society and socially responsible uses of technology (academic) (c) link their own mental models about leadership and global citizenship with their social interactions and their ability to serve. (linkage) (d) function competently when engaging with cross-cultural and cross-institutional peers, to identify strategies and provide solutions to effectively serve communities in need. (application) (e) use written and/or verbal communication to analyze social issues and challenges from local, national and/or international points of view. (application) (f) demonstrate sensitivity and empathy for others, especially those different from oneself. (empathy) (g) reflect on their own role and responsibilities as a citizen and professional in society (reflect)

Subject Synopsis/ Indicative Syllabus

The topics in the course syllabus cover major issues relevant to global and cross-cultural competencies, leadership and social responsibility:

Concept and Practice of Service-Learning:

- Principles and concepts of service-learning
- Benefits of service-learning to students and the community
- Responsibilities, Ethics and Attitudes in service-learning
- Reflection as a tool for learning

Discipline-Specific Concepts, Issues and Skills

- The Social Change Model of leadership development. The Seven "C"s: consciousness of self, congruence, commitment, collaboration, common purpose, controversy with civility and citizenship.
- Impact of technology on societal needs and perceptions. Sustainable technology and impact of the lack of access to technology on society: economical, cultural, ethnic, political. Possible solutions to societal needs through technology. Technological Social Responsibility.
- Intercultural competence. Dimensions of cultural variability. Cultural competencies and cross-cultural communication. Causes, issues and impact of stereotyping, discrimination, cultural understanding and misunderstanding. Tolerance versus respect.
- Dimensions of global mindset. Intellectual, psychological and social capital. Developmental model of intercultural sensitivity. Ethnocentrism and ethnorelativism.
- Leadership as a social construct. Leadership attributes and behaviors and culture. Authority and decision-making across cultures.
- Teamwork and collaboration. Effective team processes. Teamwork in virtual spaces. Effective use of technology in team collaborations and communication.

Project-Specific Concepts, Issues and Skills

- Specific technical topics (e.g. structure of the Internet) and skills (e.g. programming, soldering, classroom management, etc) required for specific projects.
- Specific historical, cultural, and political background for off-shore sites (e.g. Cambodia, Rwanda), or targeted local communities (e.g. refugees, new immigrants, ethnic minorities).
- Health, safety and other issues relevant to the service project
- Moral and ethical concerns specific to the project and beneficiaries.
 Project planning, health, safety and other issues relevant to the projects

Teaching/Learning Methodology

e-Learning Module in Service-Learning

The e-learning module is developed and delivered by the Service-Learning and Leadership Office at PolyU, consisting of readings, exercises and assessments that are designed to introduce students to the basic concept and practice of service-learning.

Students are <u>required</u> to successfully complete the e-learning module <u>within the first four weeks</u> of the semester in which they are taking the subject.

Discipline-Specific e-Learning and Seminars

The discipline-specific learning activities will include both online modules and face-to-face seminars/discussion sessions. The online modules will deliver the academic content and include readings, quizzes, and online discussion forums.

The seminars and discussion sessions are designed to complement the online modules and will provide a forum for students to discuss these issues in small groups. The objective is to explore these issues in greater depth in an interactive setting.

Assessment tasks (class exercises, reflective essays) will be included to assess the learning outcomes and encourage participation.

Where appropriate, the class will take on the format of a *global class* that is held in conjunction with an overseas institution. This will involve online, linked lectures and/or interactive seminars with teachers and/or students from the partnering institution. Students will also have to complete projects in teams together with students from the other institution.

Project-Specific Seminars, Tutorials and/or Workshops

The project-specific seminars, tutorials and/or workshops are designed to: (a) develop students' understanding of the targeted community and other issues relating to the service-learning project, (b) provide training for students in generic skills in planning and delivering the service project. Guest experts and speakers will be invited to contribute to some of these sessions as appropriate. Where possible, a hands-on interactive format will be used.

Students are required to attend <u>all of</u> the discipline-specific and project-specific lectures, seminars and workshops and successfully complete <u>all</u> of the required assignments/learning tasks prior to participation in the service-learning project. Students who are not adequately prepared will not be allowed to continue in the course or participate in the service projects.

Service-learning Projects

Students will be required to take part in a cross-cultural, cross-institutional service project in underserved areas in Hong Kong or overseas that addresses genuine needs in an underserved community. The project will require collaboration with peers (e.g. fellow university students) from local as well as other higher education institutions (e.g. universities from the University Social Responsibility Network or from the Global Leadership and Civic Engagement Program.)

The service-learning projects will be designed to develop students' creativity, problem-solving, teamwork and communication abilities. Projects will emphasize hands-on tasks and involve team as well as

individual work. Students will be encouraged to research on specific problems. They will also be challenged to design and implement solutions, applying their discipline-specific knowledge to meet community needs.

Students may opt to undertake a pre-approved exchange service project or attachment organized by PolyU Service-Learning and Leadership Office and pre-approved by the teaching team. This project/attachment must meet the following requirements: (1) it must be at least 4 weeks in length and incorporate at least 40 service hours; (2) it must be hosted by a reputable university or NGO with a track record in service-learning; (3) it must involve students in direct, hands-on interaction with an underserved community; (4) it must enable students to develop a deeper understanding of global issues regarding social change and civic engagement; (5) it must be letter-grade assessed by a faculty member or a project supervisor who has substantive direct supervision of the student and expertise in education and civic engagement.

Students may be required to shoulder a portion of their incurred costs for overseas projects.

Review Sessions, Reflective Journals and Report

Students will be required to write reflective journals and reports before, during and after the service-learning project to demonstrate (a) their intellectual learning of the academic concepts and their ability to: (b) link their service-learning experiences with the academic focus/discipline-specific content of the subject, (c) reflect on their service-learning experience to identify their learning gains as well as areas for future improvements, (d) reflect on their roles and social responsibilities. Class presentations of their reflections and activities may also be required.

To guide students in using reflection as a tool for learning, and to assess their ability in achieving the above learning objectives, reflection and review sessions will also be held both <u>during</u> and <u>after</u> the service-learning project.

Assessment
Methods in
Alignment with
Intended Learning
Outcomes

Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed						
		a	b	c	d	e	f	g
E-Learning module in service-learning	Pass/fail							
Attitude, discipline and contribution during preparation (individual)	15%	✓			√	√		
Quality of preparation and project deliverables (group)	15%		✓		✓			

Performance during service delivery and Quality of Final Deliverables (individual, group)	40%	√	√		√		\	
Summative reflective journal (individual)	30%		✓	✓		✓	✓	✓
Total	100%							

Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:

The e-Learning Module in service-learning includes assignments and learning tasks that are designed to educate students about the theories and motivations behind service-learning and prepare them to learn effectively in service-learning.

During the preparation period, students will be required to participate in online and face-to-face discussion groups, and to write proposals and plans for the projects as preparation for service. Students' attitude, discipline and contribution towards these activities will be a demonstration of their ability to learn attributes and competencies required of responsible global leaders (ILO a), to function competently with diverse others in identifying strategies for addressing a social issue (ILO d), and to use written and verbal methods of communication to analyze and describe social issues (ILO e).

The quality of the project deliverables will assess students' ability to use technology responsibly for social betterment (ILO b), function competently when engaging with diverse others to provide solutions to effectively serve communities in need (ILO d).

The students' attitude and performance in the rendering of service, their collaboration with their teammates and the community and their degree of engagement with service recipients will require them to demonstrate attributes and competencies required of responsible global leaders (ILO a), use technology responsibly for social betterment (ILO b), function competently with diverse others to provide solutions to effectively serve communities in need (ILO d), and demonstrate sensitivity and empathy for others (ILO f).

The summative reflective report assesses students' ability to describe the influence of technology on society (ILO b), link their own mental models about leadership and global citizenship with their social interactions and ability to serve (ILO c), their empathy for the underserved communities (ILO f), their ability to reflect on their role and responsibilities in the society (ILO g), and their ability to use written communication to analyze and describe social issues and challenges (ILO e).

Class contact:	
 Lectures, tutorials and discussion groups 	20 Hrs.

		1				
Student Study	Workshops and labs	15 Hrs.				
	 Reflection sessions 	10 Hrs.				
	Other student study effort:					
	■ E-learning modules on leadership and service-learning	20 Hrs.				
Effort Expected	 Preparation and planning for project 	20 Hrs.				
	 Rendering of service 	40 Hrs.				
	 Reflection and review 	10 Hrs.				
	Total student study effort	135 Hrs.
