Greatest Human Rainbow in the world

The sky brightened over the Hong Kong Stadium on Sunday morning, 6 October, as **11,273** PolyU staff, students, alumni, friends and families united together and set a new world record. All wearing T-shirts and caps in seven rainbow colours, they formed the **largest Human Rainbow in the world**. This historic event, held in celebration of PolyU's 65th anniversary, aimed to raise fund for the University, the Children's Cancer Foundation and The Hong Kong Society for the Aged. **A big, big thank you** to all guests, sponsors, supporting parties and participants for helping to make the event a huge success! The last world record of the largest Human Rainbow was made by a group of 6,444 people at Transco Tower Park, Houston, Texas, in 1997.
