

### Subject Description Form

<b>Subject Code</b>	EIE3343 (for 42477 and 42480)
<b>Subject Title</b>	Computer Systems Principles
<b>Credit Value</b>	3
<b>Level</b>	3
<b>Pre-requisite</b>	<p><u>For 42477:</u> EIE2105 Digital and Computer Systems</p> <p><u>For 42480:</u> Nil</p>
<b>Co-requisite/ Exclusion</b>	Nil
<b>Objectives</b>	This subject provides students with a broad treatment of the fundamentals of computer operating systems and the related system programming techniques.
<b>Intended Subject Learning Outcomes</b>	<p><b>Upon completion of the subject, students will be able to:</b></p> <p><u>Category A: Professional/academic knowledge and skills</u></p> <ol style="list-style-type: none"> <li>1. Understand the basic structure of a computer operating system.</li> <li>2. Comprehend the basic concepts of file system and management, process control, scheduling and communication, as well as memory management.</li> <li>3. Develop software programs to implement the abovementioned system functions.</li> </ol> <p><u>Category B: Attributes for all-roundedness</u></p> <ol style="list-style-type: none"> <li>4. Understand the creative process when designing solutions to a problem.</li> </ol>
<b>Subject Synopsis/ Indicative Syllabus</b>	<p><b>Syllabus:</b></p> <ul style="list-style-type: none"> <li>• <u>Operating System Overview</u> OS objectives and functions Modern operating systems Microsoft windows overview UNIX and LINUX</li> <li>• <u>File System and Management</u> File organization and access File directories File sharing Secondary storage management System programming for file, directory and I/O access</li> <li>• <u>Process Description and Control</u> Definition of process Process description Process control Process communication System programming for process control and communication</li> <li>• <u>Threads and Scheduling</u> Processes and threads Thread management and scheduling Thread synchronization System programming for thread management</li> </ul>

	<ul style="list-style-type: none"> <li>• <u>Memory Management</u> Memory management requirement Memory partitioning Paging Segmentation Dynamic Link Library (DLL) System programming for memory management</li>   <li>• <u>Processor Scheduling</u> Types of processor scheduling Scheduling algorithms Multiprocessor scheduling Case study</li> </ul>
--	--

<b>Teaching/ Learning Methodology</b>	<b>Teaching and Learning Method</b>	<b>Intended Subject Learning Outcome</b>	<b>Remarks</b>
	Lectures	1, 2, 3	Fundamental principles and key concepts of the subject are delivered to students.
	Tutorials	1, 2, 3	Supplementary to lectures and are conducted with smaller class size; students will be able to clarify concepts and to have a deeper understanding of the lecture material; problems and application examples are given and discussed.
	Laboratory sessions	1, 2, 3, 4	Students will make use of software tools to develop system programs in order to resolve different system problems.
	Assignments	1, 2, 3	Through working assignment and end-of-chapter problems in text books, students will develop a firm understanding and comprehension of the knowledge taught.

<b>Assessment Methods in Alignment with Intended Subject Learning Outcomes</b>	<table border="1"> <thead> <tr> <th rowspan="2">Specific Assessment Methods/ Task</th> <th rowspan="2">% Weighting</th> <th colspan="4">Intended Subject Learning Outcomes to be Assessed (Please tick as appropriate)</th> </tr> <tr> <th>1</th> <th>2</th> <th>3</th> <th>4</th> </tr> </thead> <tbody> <tr> <td>1. <p><b>Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:</b></p> <table border="1"> <thead> <tr> <th>Specific Assessment Methods/Tasks</th> <th>Remark</th> </tr> </thead> <tbody> <tr> <td>Assignments, tests and examination</td> <td>End-of-chapter type problems used to evaluate students' ability in applying concepts and skills learnt in the classroom;</td> </tr> <tr> <td>Laboratory sessions</td> <td>Each student is required to answer several questions related to each lab session in the lab sheet and hand in his/her answers. Students need to think critically and creatively in order to come with an alternate solution for an existing problem.</td> </tr> </tbody> </table>						Specific Assessment Methods/Tasks	Remark	Assignments, tests and examination	End-of-chapter type problems used to evaluate students' ability in applying concepts and skills learnt in the classroom;	Laboratory sessions	Each student is required to answer several questions related to each lab session in the lab sheet and hand in his/her answers. Students need to think critically and creatively in order to come with an alternate solution for an existing problem.																																				
Specific Assessment Methods/Tasks	Remark																																														
Assignments, tests and examination	End-of-chapter type problems used to evaluate students' ability in applying concepts and skills learnt in the classroom;																																														
Laboratory sessions	Each student is required to answer several questions related to each lab session in the lab sheet and hand in his/her answers. Students need to think critically and creatively in order to come with an alternate solution for an existing problem.																																														
<b>Student Study Effort Required</b>	<b>Class contact (time-tabled):</b>																																														
	• Lecture	24 Hours																																													
	• Tutorial/Laboratory/Practice Classes	15 Hours																																													
	<b>Other student study effort:</b>																																														
	• Lecture: preview/review of notes; homework/assignment; preparation for test/quizzes/examination	36 Hours																																													
	• Tutorial/Laboratory/Practice Classes: preview of materials, revision and/or report writing	30 Hours																																													
<b>Total student study effort:</b>					<b>105 Hours</b>
