**Teaching/
Learning
Methodology**

The teaching and learning approach will be task-based, student-centered and interactive. There is a balance of individual effort and cooperative, interdependent learning. Academic texts and professional reports in audio-visual and print forms from diverse academic disciplines will be utilized to stimulate thinking and discussions. The subject, though focusing on developing competence in listening and speaking, also develops the skills of reading and writing for academic purposes.

Course work includes speaking and listening tasks such as working in pairs and small groups on interactive group discussions, preparing and delivering oral presentations, listening and taking notes in seminars and lectures, as well as completing self-designed practice activities to be conducted independently in the Centre for Independent Language Learning (CILL) or at other relevant venues outside class. The independent language learning component involves students keeping an assessed self-study journal for most of the duration of the subject.

The self-study journal (Weeks 4-14) focuses on developing speaking and listening skills and provides the format for students to develop autonomy in learning. The listening quiz (Week 8) gives students the

	<p>opportunity to assess skills development in listening to lectures. The vocabulary quiz (Week 12) is the means of assessing students' acquisition of key academic vocabulary, and the individual oral presentation (Weeks 6-14) provides the format for students to research, plan and deliver a presentation on an aspect of academic life.</p> <p>All this, in an integrated manner, will contribute to the fulfilment of the subject's intended learning outcomes and to a long-term development of students' professional and academic knowledge and skills and their generic attributes, including independent learning and critical analytic thinking abilities.</p>
