Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:

Tasks 1, 2 and 3 are assessed through teamwork and individual contribution. In developing learning artifacts or designing service ideas for schools and community centres, students are encouraged to collaborate with each other and the community to address specific needs of their care groups.

2. The actual learning artifact/service design will be built during lectures, with hands-on experience during seminars, out-of-class practice and assistance from teachers and IT experts moderating the course.

Several elements of design will be considered and executed for the successful implementation of the service/ product: creativity / innovation,

	<p>practicality, sustainability, attractiveness, and ease-of-use. Improvements to the service/ product will be considered based on feedback from workshops and during the actual delivery and usage phase</p> <p>3. The final assessment is a collaborative journal (individual implicit) to reflect on the students' experiences with the service learning project and to report on feedback received from peers and community members who have used the language learning product/service</p>

Note 1: Intended Learning Outcomes

Intended learning outcomes should state what students should be able to do or attain upon completion of the subject. Subject outcomes are expected to contribute to the attainment of the overall programme outcomes.

Note 2: Subject Synopsis/ Indicative Syllabus

The syllabus should adequately address the intended learning outcomes. At the same time over-crowding of the syllabus should be avoided.

Note 3: Teaching/Learning Methodology

This section should include a brief description of the teaching and learning methods to be employed to facilitate learning, and a justification of how the methods are aligned with the intended learning outcomes of the subject.

Note 4: Assessment Method

This section should include the assessment method(s) to be used and its relative weighting, and indicate which of the subject intended learning outcomes that each method purports to assess. It should also provide a brief explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes.
