

<b>Subject Code</b>	ENGL3002
<b>Subject Title</b>	Research Methods for Language Studies
<b>Credit Value</b>	3
<b>Level</b>	3
<b>Pre-requisite / Co-requisite/ Exclusion</b>	None
<b>Objectives</b>	<p>This subject aims to develop students' awareness of the nature of applied language research and provide them with an understanding of language research by familiarising them with different approaches to research design and execution as well as methods of data collection, analysis, presentation, interpretation, and reporting. The subject serves as a preparatory course for undertaking the Capstone Project for Language Studies (ENGL4003), but can also be studied as a stand-alone course for developing research skills.</p>
<b>Intended Learning Outcomes</b>	<p>Upon completion of the subject, students will be able to:</p> <p><b>Category A: Professional/academic knowledge and skills</b></p> <ul style="list-style-type: none"> <li>a. demonstrate a sound awareness of the nature of applied language research</li> <li>b. understand fundamental concepts and new developments in applied language research</li> <li>c. produce a research proposal in an appropriate format</li> <li>d. design quantitative, qualitative and multi-method research</li> <li>e. analyse research data manually and with the help of computer programmes (e.g. SPSS)</li> </ul> <p><b>Category B: Attributes for all-roundedness</b></p> <ul style="list-style-type: none"> <li>f. work critically and creatively</li> <li>g. demonstrate analytical and evaluative skills</li> <li>h. apply effective strategies for conducting academic research in both independent and team modes</li> </ul>
<b>Subject Synopsis/ Indicative Syllabus</b>	<ol style="list-style-type: none"> <li>1. Fundamental concepts of applied language research</li> <li>2. Qualitative, quantitative and multi-method approaches to research</li> <li>3. Stages of literature review</li> <li>4. Establishing research problems and questions</li> <li>5. Research design techniques</li> <li>6. Data collection, analysis, triangulation and interpretation</li> </ol>

	<p>7. Statistical concepts and applications (e.g. descriptive statistics, correlations, <i>t</i>-tests, analysis of variance)</p> <p>8. Research proposal development and evaluation</p>																																																																														
<b>Teaching/ Learning Methodology</b>	Learning is primarily through interactive seminars. All assignments are designed to provide students with tasks that require the evaluation, synthesis and application of key concepts, approaches and techniques to designing and analysing studies in applied language research.																																																																														
<b>Assessment Methods in Alignment with Intended Learning Outcomes</b>	<table border="1"> <thead> <tr> <th rowspan="2">Specific assessment methods/tasks</th> <th rowspan="2">% weighting</th> <th colspan="8">Intended subject learning outcomes to be assessed</th> </tr> <tr> <th>a</th> <th>b</th> <th>c</th> <th>d</th> <th>e</th> <th>f</th> <th>g</th> <th>h</th> </tr> </thead> <tbody> <tr> <td>1. Literature Review</td> <td>15%</td> <td>✓</td> <td>✓</td> <td></td> <td></td> <td>✓</td> <td>✓</td> <td>✓</td> <td>✓</td> </tr> <tr> <td>2. Students are assessed in terms of both subject knowledge and generic skills through a combination of an individually assessed group presentation, one or more in-class/take-home mini-projects (e.g. data analysis report, literature review, etc.), and a full research proposal intended for the compulsory Capstone Project for Language Studies (ENGL4003) in the final year.</p> <p>All these assessment tasks, in an integrated manner, will contribute to the fulfilment of the subject's intended learning outcomes and to a long-term development of students' professional and academic knowledge and skills and their generic attributes, especially independent learning and critical analytic thinking abilities.</p>	Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed								a	b	c	d	e	f	g	h	1.
