A local grammar-based approach to corpus studies. The 16th Korea-Japan Workshop on Linguistics and Language Processing. Kyung Hee University, Seoul, Korea. 9-10 May 2014.

Abstract:
In this workshop, we will define local grammar and major research studies that have applied local grammar in the analysis of different English texts and corpora, e.g. a local grammar of definition sentences (Barnbrook, 2002). We will then examine the findings of an on-going research project that analyses the local grammar of disclaimers in a corpus of company interim and annual reports collected from the companies listed on the Hong Kong stock exchange. The procedure of corpus data analysis is illustrated.
