My Top Ten: Hospital-based specialty contact lens practice cases

Barry A. Weissman,
O.D., Ph.D, FAAO
Professor, Southern California College of Optometry,
Marshall B. Ketchum University,
Fullerton, United States.

Hospital-based specialty contact lens practice is a very unique “nitch” sub-specialty. Not only are many of the ocular diseases encountered - both challenging and interesting - but many of the patients are under stress leading to additional management difficulties and secondary doctor stress. Although HIPPA will be respected, in this hour I will present the “top ten” such challenging cases recalled from more than 3 decades of my personal such practice, with the aim of providing insight as to both the challenges faced and my approach to some solutions.
