

### SUBJECT DESCRIPTION FORM

<b>Subject Code</b>	SN5119
<b>Subject Title</b>	Healthcare Innovation
<b>Credit Value</b>	3
<b>Level</b>	5
<b>Prerequisite</b>	Nil
<b>Objectives</b>	To provide students with the essential knowledge about the elements and the processes of innovations in healthcare, which includes innovative healthcare applications and the enabling technologies; conceptualization and design practice; market research, value proposition, business models, and entrepreneurship; diffusion of innovation and societal impact; clinical evaluation; basic understanding of intellectual property and patent.
<b>Intended Learning Outcomes</b>	<p>Upon completion of the subject, students will be able to:</p> <ol style="list-style-type: none"> <li>a. appreciate the significance, needs and benefits of innovations in healthcare to the society;</li> <li>b. understand the basic concepts as well as values and roles of technologies in enabling innovations in healthcare;</li> <li>c. delineate the elements and process of healthcare innovations, as well as the business and social aspects of the innovations;</li> <li>d. understand the issues of healthcare innovations, including safety, clinical evaluation, intellectual property rights, and professional ethics; and</li> <li>e. demonstrate the ability to take part in innovations for healthcare.</li> </ol>
<b>Subject Synopsis/ Indicative Syllabus</b>	<ol style="list-style-type: none"> <li>1. Innovative healthcare applications with technologies in the areas of:             <ol style="list-style-type: none"> <li>a. rehabilitation engineering, including assistive technologies, prosthesis and orthotics;</li> <li>b. medical imaging;</li> <li>c. biosensors;</li> <li>d. social network and communication; and</li> <li>e. virtual reality.</li> </ol> </li> <li>2. Elements of the innovation process, including:             <ol style="list-style-type: none"> <li>a. user centred design;</li> <li>b. user journey;</li> <li>c. market research and analysis;</li> <li>d. user analysis;</li> <li>e. value proposition;</li> <li>f. business model and financing;</li> <li>g. user behaviour, channels and acceptance;</li> <li>h. pitching; and</li> <li>i. entrepreneurship.</li> </ol> </li> <li>3. Clinical evaluation, trials and FDA registration, safety and professional ethics.</li> <li>4. Value and protection of intellectual property, a general overview of the patent</li> </ol>

	<p>application and legal issues.</p> <p>5. Social innovation: research on social challenges and opportunities to cultivate interdisciplinary innovative design solution for social impact and societal change in healthcare.</p>																																					
<p><b>Teaching and Learning Methodology</b></p>	<p>Students are introduced to the processes and issues of innovations in healthcare through lectures on the basis, case studies, guest talks by practitioners in the industry, and student-direct groups projects. Active learning is emphasized through discussions and critiques.</p> <ul style="list-style-type: none"> <li>The lectures cover the concepts and processes of innovations in healthcare, the business models, marketing strategies, entrepreneurship, societal impacts, clinical concerns, and intellectual property rights.</li> <li>Case studies of healthcare innovations are provided to illustrate the elements and issues involved in the innovation processes to reinforce the basic concepts discussed in the lectures.</li> <li>The student-directed group projects provide an opportunity for students to put theory in practice and reinforce the knowledge they have gained in the classes. The project groups will be formed with students of different backgrounds to nurture interdisciplinary learning from peers and to stimulate innovative ideas. The students will conceptualize a potential innovation for healthcare in the project, carrying it through from idea to market.</li> </ul>																																					
<p><b>Assessment Methods in Alignment with Intended Learning Outcomes</b></p>	<table border="1" data-bbox="443 1048 1452 1503"> <thead> <tr> <th rowspan="2">Specific assessment methods/tasks</th> <th rowspan="2">% weighting</th> <th colspan="5">Intended subject learning outcomes to be assessed</th> </tr> <tr> <th>a</th> <th>b</th> <th>c</th> <th>d</th> <th>e</th> </tr> </thead> <tbody> <tr> <td>Written Test</td> <td>30%</td> <td></td> <td>√</td> <td>√</td> <td>√</td> <td></td> </tr> <tr> <td>Group project presentation</td> <td>70%</td> <td>√</td> <td>√</td> <td>√</td> <td>√</td> <td>√</td> </tr> <tr> <td>Total</td> <td>100%</td> <td colspan="5"></td> </tr> </tbody> </table> <p><i>Explanation of the appropriateness of the assessment methods in assessing the intended learning outcomes:</i></p> <p>The performance of the students is evaluated based on a written test and their group projects by continuous assessment. The written test will be arranged at the end of the semester to assess the students' understanding of basic concepts and knowledge introduced in the lectures.</p> <p>The assessments of the group projects are made in the two stages of the learning process:</p> <ul style="list-style-type: none"> <li>Interim presentation: Students will pitch their idea of healthcare innovation in a clear and concise manner about the motivations, significance and the intended outcomes. They will also delineate the structure and components, and demonstrate that considerable deliberations have been made and the feasibility of the project.</li> <li>Final presentation: Students will give a complete and comprehensive presentation</li> </ul>					Specific assessment methods/tasks	% weighting	Intended subject learning outcomes to be assessed					a	b	c	d	e	Written Test	30%		√	√	√		Group project presentation	70%	√	√	√	√	√	Total	100%

	of the proposed healthcare innovation, addressing all aspects of the innovation from idea to market in details. A poster is required to vividly highlight the main points of the innovation.	
<b>Student Study Effort Expected</b>	Class contact:	
	Lectures, seminars and invited talks	21 Hrs.
	Tutorials and Presentations	16 Hrs.
	Test	2 Hrs.
	Other student study effort:	
	Student group project and report writing	33 Hrs.
	Self-directed study	38 Hrs.
	Total student study effort	110 Hrs.
