

Choose Second-hand

Green Tips - Jul 2021

✦ Benefits of buying second-hand

1 Saving money

You may easily find your favourite brands and designer items second-hand at a lower price.

3 Reducing environmental impact

It helps preserve energy and natural resources. It also means less waste, emissions, unfair wages and animal cruelty.

2 Extending an item's lifecycle

Let others get good use out of the things that are in great condition but you don't use them for whatever reason.

4 Slowing down consumption

We can use resources more effectively and reduce the demand for new products.

✦ Start your second-hand journey

The Redress Closet

Offers a wide selection of high-quality clothing at accessible prices – from womens and menswear to accessories and bags.

Green Ladies & Green Little

Provides an eco-shopping platform for parents and kids by consignment model.

Anewtoys (再生玩具店)

Holds toys upcycling workshops and toys exchanging activities regularly.

The Book Cure (解憂舊書店)

Collects and sells extensive second-hand volumes, including fiction, comics, reference books, and tomes about films.
