Save Water Before It Is Too Late

There are only 3% of fresh water on Earth and less than 1% is accessible for our daily use, others are trapped in ice caps and glaciers.

Fresh water is precious natural resource thus we have the responsibility to save water. Below are the tips to achieve sustainable use of fresh water in our daily life:

Laundry

≈ Use washing machines or dishwashers for full loads only

Save **20L*** water per day

Maintenances

≈ Check and fix dripping taps and water pipes promptly

Bathroom

≈ Reduce shower time by **2 minutes**
Save **96L*** water per day

≈ When brushing teeth, soaping hands or shaving, turn the water off
Save **26L*** water per day

≈ Use water efficient devices, such as washing machine, showerhead, etc.

≈ Install high efficiency toilet (e.g. dual flush cistern)

*Daily water (Litres) saved per family in four-member household (Source: Water Supplies Department)

Pantry/Kitchen

≈ Wash dishes in container filled with water instead of running tap
Save **28L*** water per day

≈ Install flow controller in water tap to reduce flows
