

Dear Students,

For your information and interest, **Castlegate Logistics Hong Kong Limited** is now inviting applications for its STEM internship position. Details are as follows:

Position: Operations Analyst Intern [JN273354 on PolyU's Job Board]

Duration: June - August 2023 (2 months)

Key Responsibilities:

- Using the operational data to measure the performance of different vendors to identify area of improvements
- Identify the gap in supplier experience and redesign the process
- Identify new business opportunities, or gap in existing operations
- Compare our service offering against other digital freight forwarders and traditional logistics companies
- Identify the gap in our system logic to further enhance the resources utilization
- Optimize the shipment strategy under different business requirements
- Communicate with CFS / Ocean agents / internal teams to ensure follow-through on replenishment orders and inventory commitments and to enable best real time decisions
- Work on different datasets to enable operations to monitor the business performance
- Support tech roadmap building and tool development (incl. defining product requirement, logic build, user acceptance test) to drive improvements in the end-to-end logistics systems, data, and processes; including light modelling to validate hypotheses, de-risk engineering, data science investments and require to do a high volume of data analysis
- Drive root cause analysis/reporting on operational issues, developing action plans and project managing improvements
- Conduct process mapping to identify the improvement opportunities and execute change management to implement
- Conduct research, quantitative analyses and build business models and prioritization matrices to drive decisions and development of value-added service (e.g. supplier product performance analysis; origin milk-run optimization)
- Align teams (Operations, Ocean, CFS etc.) to ensure strong execution and to understand and manage the drivers that impact operational execution

Qualifications:

- University Student in Bachelor's degree in Engineering, Information System, Business, Mathematics or a Supply Chain/Operations discipline
- Experience with Microsoft Office, and proficiency with SQL (or a system of equal complexity) / Python
- Strong quantitative experience, with the ability to conduct statistical analysis, generate insights and solutions or build a story and strategy from large data sets
- Strong written and verbal communication skills, with the ability to lead discussions and communicate effectively
- Quick learner with an analytical approach to solving problems as part of a team who has good communication skills
- Ability to work with people in a cross-functional environment
- Proficient in spoken and written English and Chinese; Cantonese & Putonghua
