Guide on adding a new site in the Check Point VPN client software to use China Telecom express secure VPN service

Microsoft Windows OS:

- Make sure the VPN client software is up and running. If it is running, you should find the icon in the status bar.
- If not, click on the Windows icon, search for application with name “Check Point Endpoint Security VPN”. Click to launch the application.
- Right click on the icon and select VPN Options
• On the Sites tab, click New to launch the Site Wizard.

• Click Next to continue
• Enter “ctexpress.polyu.edu.hk” as the server address and click Next
• Click “Trust and Continue” to trust the site’s certificate

![Image of security certificate warning]

• Leave login option as default and click Next
• Select “Username and Password” as the authentication method

• The site configuration is now completed. Click Finish to end the Site Wizard.
Site created successfully
• Right click on the icon and select **Connect**

![Connect option](image)

• You can now choose to connect to the new site.

![Endpoint Security login](image)
**Apple Mac OS:**

- Run the Check Point Endpoint Security (Check Point VPN Client) and click “**Connect to...**”

- Click Site and click [New Site]
• You will be led to a Welcome page. Click **Next**.

Welcome to the Site Wizard

The wizard will guide you through the configuration of a new site for the VPN client.
• Enter “ctexpress.polyu.edu.hk” as the server address, then click **Next**.

  ![Site Wizard](Site%20Wizard.png)

  To continue, fill in the required information and click next.

  - **Server address or Name:** ctexpress.polyu.edu.hk
  - **Display name:** ctexpress.polyu.edu.hk

• **Use default setting “Username and Password”** and click **Next**

  ![Site Wizard](Site%20Wizard.png)

  **Authentication Method**
  Select the authentication method to be used.
