

MEET OUR START-UPS

3F-C19 Pharmaceuticals & Therapeutics

ABRAM Therapeutics Limited

ABRAM Therapeutics translate university discoveries into real-world impact. Our lead candidate ABarginase is designed to induce controlled transient amino acid starvation, helping reset the metabolic state to address obesity and related chronic conditions including diabetes and fatty liver.

Nephrokin®: a patented natural New Dietary Ingredient (NDI) for brain health

3F-G14 Pharmaceuticals & Therapeutics

Scar Free (Inno Tech) Company Limited

Scar Free (Inno Tech) is a start-up company established under the translational start-up postdoc program of The Hong Kong Polytechnic University. "Scar Free" is a novel multifunctional scar-healing composite dressing made by elevated-pressure screen-printing, using pressure garment fabric (PGF) and medical grade silicone (Biopor®AB). The compression-silicone dressing has a warp-knit self-pumping structure equipped function of PGF-SGS dual therapy, mechanotherapy and active moisture management for scar-healing.
