Advantage Data Vision Limited

Advantage Data Vision Limited leverages massive real-world, multi-omics datasets and patented AI algorithms to create a cloud-based platform that accurately predicts each patient's response to cancer immunotherapy. The explainable deep-learning engine guides clinicians, optimizes hospital resources, reduces adverse events, and accelerates pharmaceutical trials through precise patient stratification and risk assessment, delivering tangible value worldwide.

About PolyVentures

PolyU is committed to fostering innovation and entrepreneurship, cultivating next-generation entrepreneurs that are eager to tackle societal issues with innovative solutions. Via PolyVentures, our signature start-up ecosystem, the University supports PolyU start-ups in every stage of their entrepreneurial journeys – from education and ideation to incubation, acceleration, and fundraising. To equip them with necessary knowledge and skills for sustainable development and accelerated growth, a wide range of support, such as training, mentorship, shared office spaces, funding, and networking opportunities with business partners and investors, are available for our start-ups. PolyVentures serves as a super network that connects the academia, industry, and the capital market. It offers customised entrepreneurial support, incubates start-up projects, facilitates fundraising, and drives the translation of impactful research outcomes into real-world solutions, thereby bringing tangible benefits to society.
