

About us

Paperclip Design (www.paperclipdesign.hk) is an award-winning industrial design studio focusing on aircraft and coach interior with ambitions to venture into train, automotive and contract furniture industry. Our core value is innovation, simplicity and elegance, and we are known for our inventive, functional solutions for tight spaces. Our subsidiary Butterfly Flexible Seating Solutions (www.butterflyseating.com) commercializes our seating concepts.

As a startup, we have a flat corporate structure- each member of the team has great impact on the future direction of the company. We are based in Fotan, and our own 5,000 sqft workshop is well-equipped with various machines such as laser-cut, CNC, & 3D printers. On the side we also run a co-working makerspace with lively community of creative startups.

Who we are looking for

We are looking for a mechanical engineer to help bring our concepts to life. You'll mainly be assisting our senior engineer in the entire product development life-cycle, which includes prototyping, CAD design, sourcing and testing of components, as well as liaising with manufacturers or suppliers.

If you are passionate about mechanical design, enjoys solving challenging problems, and has an urge to build things in hands-on manner, we want you to join us. We are looking for a versatile team player who can think outside the box and come up with smart solutions.

You should be willing to travel globally for projects and to China for working with suppliers, flexible with working hours (occasionally) due to our international partner base, and comfortable with using English as well as Mandarin to work with overseas suppliers and diverse team members. And, being in a small team, you should also be open to performing various non-engineering related tasks that support the growth of a start-up.

Roles & Responsibilities

- Develop technical solutions in CAD based on given constraints & requirements
- Design and build mockups with refined techniques such as laser-cut, 3D printing, CNC
- Sourcing for components and run tests to measure their level of function
- Prepare product drawings and technical documents
- Communicate with suppliers and manufacturers to facilitate/optimize manufacturing process

Qualifications & Requirements

- Bachelor's degree in mechanical engineering or related fields
- Minimum 2 years' experience in mechanical design (through employment or competitions)
- Proficiency in at least 1 major CAD software (preferably Solidworks)
- Proficiency in English (TOEFL score > 100) & Mandarin

Salary Range

HK\$16,000 – HK\$24,000 per month depending on experience

Application

Please send your CV, and a cover letter to: info@paperclipdesign.hk
